5. OPERATING INSTRUCTIONS

5.1 Mattress Placement

Once assembled, place your mattress directly onto the wooden slats. A box spring is not required for this bed frame. The recommended mattress thickness is 8-10 inches.

5.2 Weight Capacity

The bed frame is designed to support a maximum weight of 550 lbs (249 kg), including the mattress and occupants.

5.3 Canopy Use

The canopy frame is designed to allow for customization with decorative curtains or drapes (not included). Ensure any added materials do not obstruct airflow or create a fire hazard.

6. MAINTENANCE

6.1 Cleaning

Wipe the bed frame with a dry cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners, which may damage the finish.

6.2 Airflow and Mattress Freshness

The slat base design allows air to circulate freely beneath your mattress, helping to keep the underbed space cool and ensuring your mattress stays fresher for longer. Periodically check for any obstructions to airflow.

6.3 Hardware Checks

Regularly inspect all bolts and screws to ensure they remain tight. Re-tighten as necessary to maintain stability and prevent wobbling.

7. TROUBLESHOOTING

7.1 Bed Frame Wobbles

- Ensure all bolts and screws are fully tightened.
- Verify that the bed frame is assembled on a level surface.
- Check that all parts are correctly aligned according to the assembly instructions.

7.2 Squeaking Noises

- Tighten all hardware connections.
- Ensure slats are properly seated and not rubbing against the frame.
- Consider applying felt pads or wax to contact points between metal/wood components if squeaking persists.
