# Skechers Boys Tough Trax Shoes Instruction Manual

Model: Tough Trax

## 1. PRODUCT OVERVIEW

The Skechers Boys Tough Trax shoes are designed for active children, featuring a durable synthetic upper and a comfortable rubber sole. These pull-on sneakers are built for ease of use and resilience in various activities.

Key features include:

- Synthetic upper material for durability.
- Rubber sole for traction and comfort.
- Pull-on closure for easy wearing.

## 2. SETUP AND FIRST USE

Upon receiving your Skechers Tough Trax shoes, follow these steps for initial setup:

1. **Unboxing:** Carefully remove the shoes from their packaging. Inspect them for any visible damage or manufacturing defects.
2. **Initial Fit Check:** Have the user try on both shoes. Ensure there is adequate space (approximately a thumb's width) between the longest toe and the front of the shoe. The heel should feel secure without excessive slipping.
3. **Adjusting Closure:** The shoes feature a pull-on design, often accompanied by a hook-and-loop strap for a secure fit. Adjust the strap to ensure the shoe is snug but not overly tight across the instep.

### 3. OPERATING INSTRUCTIONS

These shoes are designed for everyday wear and various activities. Follow these guidelines for optimal use:

- **Wearing:** Slide the foot into the shoe. If present, secure the hook-and-loop strap firmly but comfortably.
- **Activity:** Suitable for walking, running, and general play. The rubber sole provides good grip on most surfaces.
- **Environment:** Best used in dry to moderately damp conditions. Avoid prolonged exposure to extreme wetness to preserve material integrity.

### 4. MAINTENANCE AND CARE

Proper care will extend the lifespan of your Skechers Tough Trax shoes:

- **Cleaning:**
  - For surface dirt, wipe with a damp cloth and mild soap.
  - Do not machine wash or tumble dry, as this can damage materials and adhesives.
  - Allow shoes to air dry naturally at room temperature, away from direct heat or sunlight.
- **Storage:** Store shoes in a cool, dry place when not in use.
- **Odor Control:** If odors develop, remove insoles (if removable) and air them out. Baking soda can be sprinkled inside the shoes overnight to absorb odors.

## 5. TROUBLESHOOTING

This section addresses common concerns you might encounter:

- **Issue:** Shoe feels too tight or too loose.  
**Solution:** Re-check the sizing against the user's foot. Ensure the hook-and-loop strap (if present) is adjusted correctly. Consider consulting a size guide if unsure.
- **Issue:** Excessive wear on the sole.  
**Solution:** Sole wear is normal with use. If wear is unusually rapid or uneven, it might indicate an incorrect fit or gait. Regular inspection can help identify when replacement is needed.
- **Issue:** Odor build-up.  
**Solution:** Refer to the "Odor Control" sub-section under Maintenance for recommended steps.
