

TP-Link Archer NX200

TP-Link Archer NX200 AX1800Mbps Wi-Fi 6 5G Router User Manual

Model: Archer NX200

INTRODUCTION

The TP-Link Archer NX200 is a high-performance 5G CPE Router designed to provide fast and reliable internet connectivity. Featuring AX1800Mbps Wi-Fi 6 technology, it offers dual-band speeds of up to 4.67 Gbps, making it ideal for demanding applications like Ultra HD streaming, rapid file downloads, and smooth video conferencing. With its integrated SIM card slot, the Archer NX200 provides plug-and-play 5G network access. It is also EasyMesh-compatible, allowing for seamless whole-home Wi-Fi coverage when paired with other EasyMesh products. The router includes a Gigabit WAN/LAN port, enabling it to function as a traditional wireless router with cable, fiber, or DSL modems.

Image: The TP-Link Archer NX200 router and its retail packaging, highlighting its 5G and Wi-Fi 6 capabilities.

SETUP

1. SIM Card Installation

The Archer NX200 supports a SIM card for 5G network access. Ensure the router is powered off before inserting or removing the SIM card.

1. Locate the SIM card slot on the bottom of the router.
2. Insert your 5G/4G SIM card into the slot until it clicks into place. Ensure the SIM card is oriented correctly as indicated by the diagram near the slot.
3. If using a smaller SIM card (Nano or Micro), use the appropriate adapter to fit the standard SIM slot.

Whole-Home EasyMesh

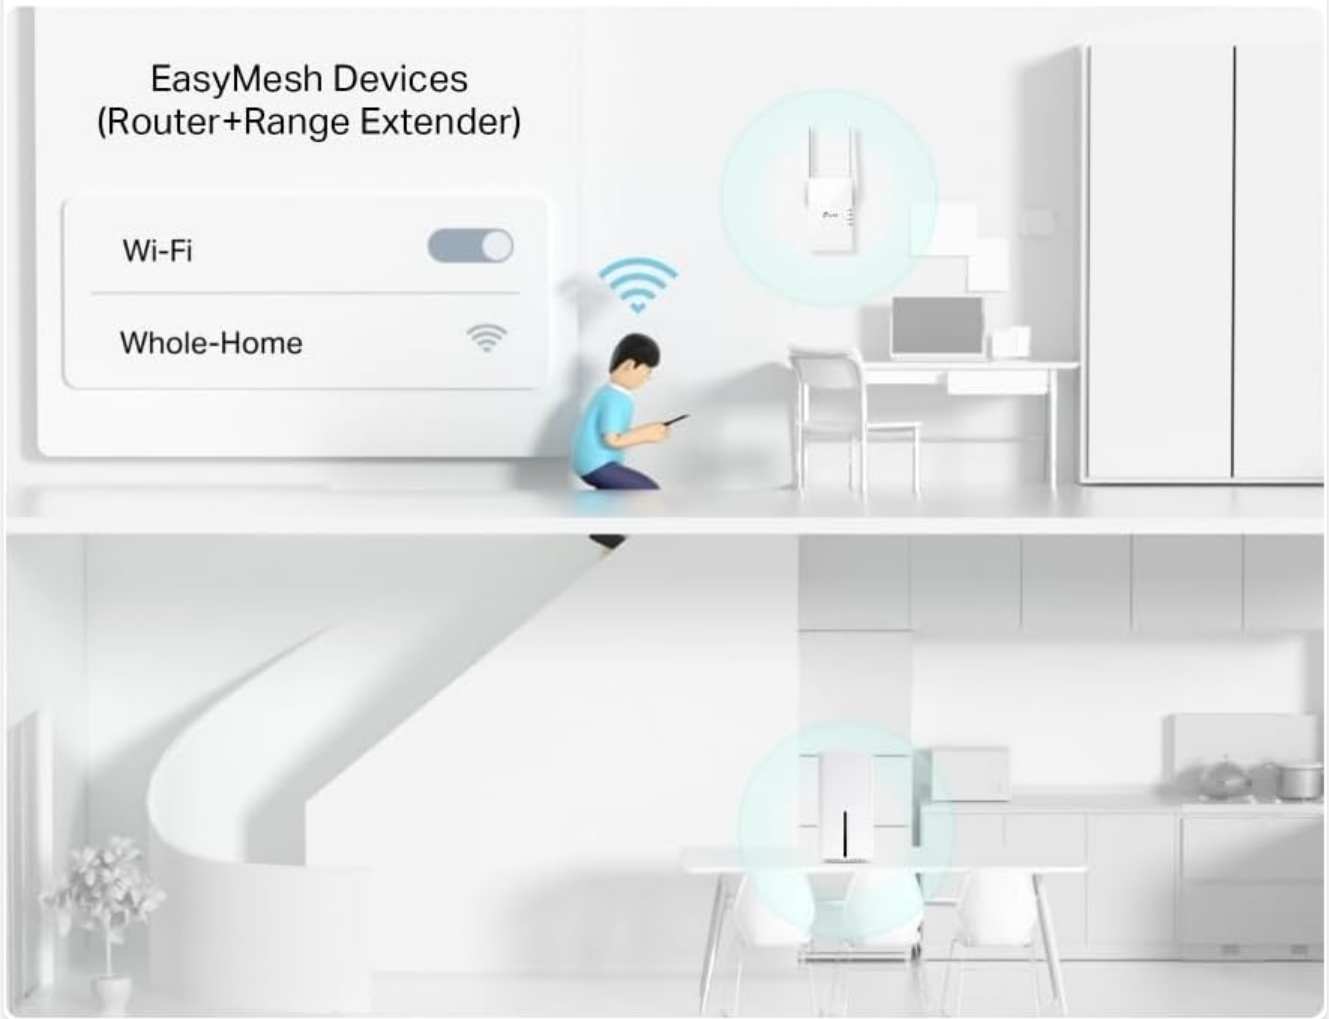

Image: Bottom view of the Archer NX200 router, illustrating the SIM card insertion process. The router can be used in various environments such as lodging, farms, temporary stores, and holiday homes.

2. Powering On and Initial Connection

1. Connect the provided power adapter to the router's power port and plug it into a wall outlet.
2. Wait for the router's LED indicators to stabilize, indicating it has successfully powered on and established a network connection.
3. Connect your device (computer, smartphone, tablet) to the router's Wi-Fi network using the SSID (network name) and password printed on the label at the bottom of the router. Alternatively, connect via an Ethernet cable to one of the LAN ports.

Image: Rear view of the Archer NX200 router, displaying the external antenna connectors, reset/WPS button, LAN ports, LAN/WAN port, and power input.

3. Accessing the Web Management Interface

For advanced configuration, access the router's web management interface:

1. Open a web browser on a device connected to the router.
2. Type <http://tplinkwifi.net> or <http://192.168.1.1> into the address bar and press Enter.
3. Log in using the default username and password (usually "admin" for both, or as specified on the router's label). You will be prompted to change the password upon first login for security.

Alternatively, use the TP-Link Tether app for simplified setup and management:

Image: Screenshots of the TP-Link Tether app interface, showing network status, connected clients, and firmware update options. The app is available on App Store and Google Play.

Download the Tether App: http://www.tp-link.com/common/promos/app_tether_v2.html

OPERATING INSTRUCTIONS

Wi-Fi Connectivity

The Archer NX200 provides dual-band Wi-Fi 6 connectivity, operating on both 2.4 GHz and 5 GHz frequencies for optimal performance.

- **2.4 GHz Band:** Ideal for wider coverage and connecting older devices. Speed up to 574 Mbps.
- **5 GHz Band:** Provides higher speeds (up to 1201 Mbps) and less interference, suitable for bandwidth-intensive activities like gaming and 4K streaming.

Unrivalled Speed, Feel No Lag

Deliver download speed up to 4.67 Gbps with the latest mobile network technologies.^s

EasyMesh Compatibility

The Archer NX200 is EasyMesh-compatible, allowing it to co-work with other EasyMesh products to create a unified Mesh Wi-Fi network. This provides seamless whole-home coverage with a single Wi-Fi name, eliminating dead zones and ensuring uninterrupted streaming as you move around your home.

WAN/LAN Port Usage

The Gigabit WAN/LAN port allows the Archer NX200 to function as a traditional wireless router, compatible with existing cable, fiber, or DSL modems. This provides flexibility for various internet connection types.

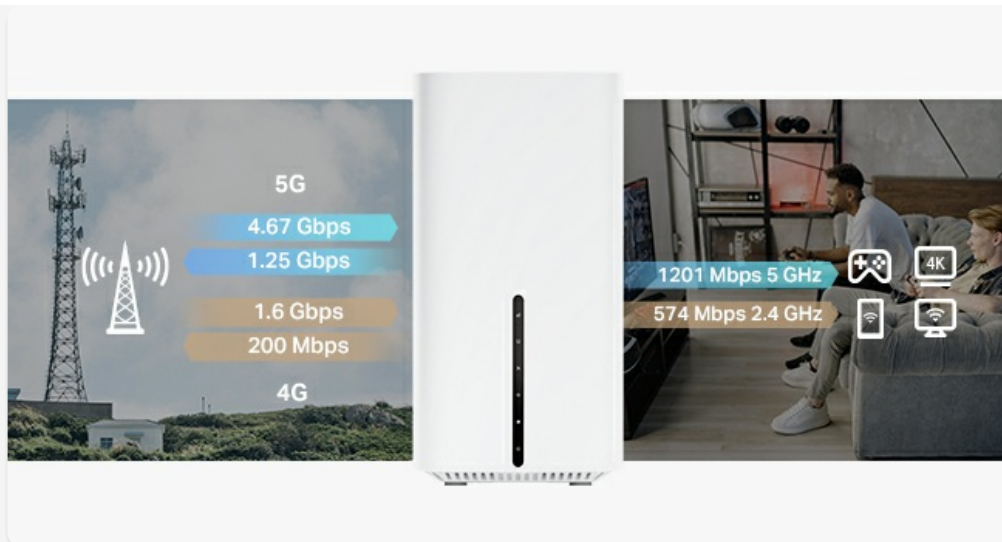

Image: Diagram demonstrating the flexibility of the Archer NX200's WAN/LAN port, showing its ability to connect to an existing modem for traditional broadband internet access.

MAINTENANCE

- **Firmware Updates:** Regularly check for and install firmware updates via the web management interface or the Tether app to ensure optimal performance, security, and access to new features.
- **Cleaning:** Keep the router clean and free from dust. Use a soft, dry cloth for cleaning. Do not use liquid cleaners or aerosols.
- **Ventilation:** Ensure the router is placed in a well-ventilated area to prevent overheating. Do not cover ventilation openings.
- **Restart:** If you experience network issues, try restarting the router by unplugging the power adapter for 10 seconds and then plugging it back in.

TROUBLESHOOTING

No Internet Access

- Verify that the SIM card is correctly inserted and activated with your mobile network provider.
- Check the signal strength indicators on the router. If the signal is weak, try relocating the router to an area with better reception.
- Ensure the WAN/LAN cable is securely connected if using a wired internet source.
- Restart the router and your connected devices.
- Log into the web management interface or Tether app to check the network status and any error messages.

Slow Wi-Fi Speed

- Ensure your devices are connected to the 5 GHz band for higher speeds, if supported.
- Reduce interference by moving the router away from other electronic devices (e.g., microwaves, cordless phones).
- Check for obstacles like thick walls or large metal objects that might block the Wi-Fi signal.
- Limit the number of active devices or bandwidth-intensive applications on your network.

Cannot Access Web Management Page

- Ensure your device is connected to the router's network (either Wi-Fi or Ethernet).

- Verify that you are using the correct address:<http://tplinkwifi.net> or <http://192.168.1.1>.
- Clear your browser's cache and cookies, or try a different web browser.
- Temporarily disable any firewall or antivirus software on your computer.

SPECIFICATIONS

Feature	Detail
Model	Archer NX200
Wi-Fi Standard	Wi-Fi 6 (802.11ax)
Wi-Fi Speeds	AX1800 (1201 Mbps on 5 GHz, 574 Mbps on 2.4 GHz)
5G Download Speed	Up to 4.67 Gbps
Connectivity	5G, 4G, Wi-Fi, Gigabit WAN/LAN Port
SIM Card Slot	Yes (Plug & Play)
Mesh Compatibility	EasyMesh-Compatible
Dimensions	9.9 x 9.9 x 1.9 cm
Weight	1.17 kg
Operating System	RouterOS
Included Components	Archer NX200 Router

WARRANTY AND SUPPORT

TP-Link products typically come with a limited warranty. For specific warranty terms and conditions applicable to your region, please refer to the warranty card included with your product or visit the official TP-Link website.

Technical Support

For technical assistance, troubleshooting, or further inquiries, please visit the official TP-Link support website. You can find FAQs, firmware updates, and contact information for customer support.

- **TP-Link Support Website:** <https://www.tp-link.com/support/>
- **TP-Link Community Forums:** Engage with other users and TP-Link experts for solutions and discussions.

Via, TP-LINK CORPORATION PTE. LTD. hereby declares that under our own responsibility, our devices fully comply with the applicable security requirements in Schedule 1 of The Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Regulations 2023.

Schedule 1 specifies security requirements that relate to manufacturers of relevant connectable products which includes the TP-Link brand and its subsidiaries. This includes the following:

1. Password is unique per device or defined by the user of the device, and the password which is unique per device is generated by using a security mechanism that reduces the risk of automated attacks against a class or type of device.

2. Users can report vulnerabilities to TP-Link via https://www.tp-link.com/tp-link-security-advisory/. Furthermore, users will receive acknowledgment of the receipt of a security issues report and status updates until the reported security issue is resolved.

3. TP-Link will provide security updates for its products during the pre-defined support period. The defined support period will end 3 years after the product's end-of-life date. Up-to-date information concerning the defined support periods for the entire TP-Link product range are listed below.
