MAINTENANCE

To ensure the longevity and appearance of your storage cabinet, follow these simple maintenance guidelines:

- **Cleaning:** The melamine-coated particleboard surface is easy to clean. Use a soft, damp cloth with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Dusting:** Regularly dust the cabinet with a soft, dry cloth to prevent dust buildup.
- **Spills:** Wipe up spills immediately to prevent staining or damage to the surface.
- **Weight Distribution:** Distribute weight evenly across the top surface and within the drawers to prevent tipping or structural stress.

TROUBLESHOOTING

If you encounter any issues with your storage cabinet, refer to the following common troubleshooting tips:

- **Drawers Not Sliding Smoothly:** Ensure that all drawer slides are correctly installed and aligned. Check for any obstructions within the drawer tracks. If the issue persists, re-check the assembly steps for the drawers.
- **Wobbly Cabinet:** Verify that all screws and fasteners are securely tightened. Ensure the cabinet is placed on a level surface. If using wheels, ensure they are properly installed and locked if stationary use is desired.

- **Damaged Wheels:** In some cases, wheel lock levers may be damaged during shipping. If a wheel is damaged, contact customer support for a replacement.
- **Assembly Difficulty:** If you find the assembly instructions unclear, review them carefully, paying close attention to diagrams and part numbers. It may be helpful to re-examine the orientation of similar-looking parts.
