SHENZHEN SMART CONNECT TECHNOLOGY CO., LTD NB-100

PLAUD Note Digital AI Voice Recorder User Manual

Model: NB-100

Introduction

The PLAUD Note is a cutting-edge digital AI voice recorder designed to enhance productivity through advanced recording, transcription, and summarization capabilities. Combining OpenAI's Whisper STT model with ChatGPT-4o and Claude 3.7, it offers efficient and accurate text transcription in 112 languages. Its sleek, portable design and powerful AI features make it an ideal assistant for both professional and personal use, helping you capture important conversations, meetings, and ideas with ease.

Setup

1. Initial Charging

Before first use, fully charge your PLAUD Note using the provided magnetic charging cable. Connect the cable to the device and a standard USB power adapter (not included). A full charge provides up to 30 hours of continuous recording or 60 days of standby time.

2. App Installation and Pairing

1. Download the PLAUD APP from your device's app store (iOS/Android).
2. Open the app and follow the on-screen instructions to create an account or log in.
3. Ensure Bluetooth is enabled on your smartphone. The PLAUD Note connects via Bluetooth for initial pairing and data transfer.
4. The app will guide you through the pairing process. Once paired, the device will automatically connect when in range.

3. Attaching the Protective Case and Magnetic Ring

The package includes a protective case and a magnetic ring. The case provides protection and allows the PLAUD Note to magnetically attach to your smartphone, which is essential for phone call recording. The magnetic ring can be affixed to non-magnetic phone cases to enable this feature.

Operating Instructions

Recording Modes

The PLAUD Note features a dual-mode precision recording system, activated by a single button press.

- **Phone Call Recording:** Attach the PLAUD Note to the back of your smartphone using the magnetic case. Press the one-touch recording button (red indicator) to activate the advanced Vibration Conduction Sensor (VCS). This captures clear recordings of phone calls by picking up the internal sound of the phone.
- **Note Recording:** For general voice notes, meetings, or presentations, place the PLAUD Note on a flat surface. Press the one-touch recording button (white indicator) to begin recording ambient audio. The two built-in microphones with AI-powered voice enhancement ensure clear sound and reduce background noise.

Image: Demonstrates the two primary recording modes: recording phone calls by attaching the PLAUD Note to a smartphone, and recording notes or meetings by placing the device on a surface.

AI-Powered Features (via PLAUD APP)

After recording, transfer your audio files to the PLAUD APP for advanced AI processing.

- **Accurate Transcription:** The app provides fast and accurate transcription in 112 languages. It can automatically segment paragraphs and apply speaker labels to differentiate between speakers.
- **Intelligent Summarization:** Leveraging advanced AI models (GPT-4o, Gemini 2.5 Pro, Claude 3.7 Sonnet), the app can generate summaries, meeting minutes, and to-do lists from your transcribed audio. Over 15 professional summary templates are available.
- **Cloud Storage & Management:** PLAUD apps and web portals offer unlimited cloud storage, allowing you to effortlessly manage, sort, and share audio files, transcriptions, and summaries.

Maintenance

Battery Management

The PLAUD Note is equipped with a long-lasting battery. To maximize battery life, avoid extreme temperatures and store the device in a cool, dry place when not in use. Recharge the device when the battery indicator shows low power.

Storage Capacity

With 64 GB of built-in memory, the PLAUD Note can store up to 480 hours of audio. Regularly transfer recordings to the PLAUD APP's unlimited cloud storage to free up local device memory and ensure data backup.

Cleaning

Wipe the device with a soft, dry cloth. Do not use liquid cleaners or abrasive materials, as they may damage the device's

finish or internal components.

Troubleshooting

Problem	Possible Cause	Solution
Device not turning on	Low battery; Device malfunction	Charge the device fully. If problem persists, contact support.
Poor recording quality	Device not positioned correctly; Excessive background noise; Microphone obstruction	Ensure device is placed optimally. Reduce background noise. Check for obstructions around microphones.

Problem	Possible Cause	Solution
App not connecting to device	Bluetooth off; Device out of range; App glitch	Ensure Bluetooth is on and device is close. Restart both device and app. Re-pair if necessary.
Transcription errors	Poor audio quality; Unclear speech; Complex terminology	Improve recording conditions. Review and edit transcriptions manually in the app.
Cannot access cloud storage	No internet connection; App/server issue	Check internet connection. Ensure app is updated. Try again later or contact support.
