Fagor Commercial FG2308

FAGOR FG2308 Steam Generator Iron User Manual

Model: FG2308

1. Introduction

Thank you for purchasing the FAGOR FG2308 Steam Generator Iron. This manual provides essential information for the safe and efficient use of your appliance. Please read these instructions carefully before first use and keep them for future reference.

2. Safety Instructions

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Ensure the voltage indicated on the appliance corresponds to your mains voltage before connecting.
- Do not immerse the iron or its base in water or any other liquid.
- Never leave the iron unattended while it is switched on or connected to the power supply.
- Keep the iron and its cord out of reach of children and pets.
- The soleplate and steam emitted are extremely hot and can cause burns. Handle with care.
- Always place the iron on a stable, heat-resistant surface.
- Unplug the iron from the power outlet before filling or emptying the water tank, and when not in use.
- Do not operate the iron with a damaged cord or plug, or if the appliance has been dropped or damaged.
- Use only distilled or demineralized water to prevent limescale buildup and ensure optimal performance.

3. Product Overview

The FAGOR FG2308 is a powerful steam generator iron designed for efficient garment care. Familiarize yourself with its components for proper use.

Image 1: FAGOR FG2308 Steam Generator Iron. This image displays the complete steam generator iron unit, including the iron, the water tank base, and the connecting hose. The iron features a ceramic soleplate and an ergonomic handle. The base unit houses the 1.5-liter water tank.

Key Features:

- **2800 Watts Power:** Ensures rapid heating and strong steam output.
- **1.5 Liter Water Tank:** Provides extended ironing sessions without frequent refills.
- **120 g/min Steam Output:** Delivers continuous, powerful steam for effective wrinkle removal.
- **Ceramic Soleplate:** Offers smooth gliding and even heat distribution.
- **Powerful Steam Shot:** For stubborn creases and vertical steaming.
- **Vertical Steam Function:** Allows for steaming hanging garments and drapes.

4. Setup

Follow these steps to prepare your steam generator iron for its first use.

1. **Unpacking:** Carefully remove the iron and all accessories from the packaging. Retain the packaging for storage or transport.
2. **Positioning:** Place the steam generator base on a stable, flat, and heat-resistant surface, such as an ironing board designed for steam generators.
3. **Filling the Water Tank:**
    - Ensure the iron is unplugged.
    - Remove the water tank from the base or open the filling cap.
    - Fill the tank with clean, distilled or demineralized water up to the maximum fill line. Do not overfill.
    - Close the filling cap securely or reinsert the water tank into the base.
4. **Power Connection:** Plug the power cord into a grounded electrical outlet.

5. Operating Instructions

Operating your FAGOR FG2308 steam generator iron is straightforward. Follow these steps for effective ironing.

1. **Power On:** Press the power button on the base unit. The indicator light will illuminate, signaling that the iron is heating up.
2. **Temperature Selection:** Adjust the temperature dial on the iron to the appropriate setting for your fabric type. Refer to garment care labels. The iron will reach the selected temperature, and the indicator light may change or turn off when ready.
3. **Steam Generation:** Once the iron is hot and the steam ready indicator (if present) is lit, press the steam trigger on the iron handle to release steam. For continuous steam, some models may have a lock button for the steam trigger.
4. **Ironing:** Glide the iron smoothly over the fabric. For stubborn creases, use the powerful steam shot function by pressing the steam boost button.
5. **Vertical Steaming:** Hold the iron vertically, close to the hanging garment, and press the steam trigger to release steam. This is ideal for refreshing clothes, curtains, or delicate fabrics.
6. **Refilling Water:** If the water tank runs empty during use, the iron will stop producing steam. Unplug the iron, refill the tank as described in the Setup section, and then reconnect power to resume ironing.
7. **Power Off:** After use, press the power button to turn off the appliance. Unplug the power cord from the outlet.

6. Maintenance

Regular maintenance ensures the longevity and optimal performance of your steam generator iron.

6.1. Cleaning the Soleplate

- Ensure the iron is cool and unplugged.
- Wipe the soleplate with a damp cloth and a non-abrasive cleaner if necessary.
- Do not use abrasive pads or harsh chemicals, as these can damage the ceramic coating.

6.2. Descaling

Limescale buildup can affect steam performance. Descale your iron regularly, especially if you live in a hard water area.

- Refer to the specific descaling instructions provided in your product packaging, as procedures may vary.
- Generally, this involves filling the tank with a descaling solution (or water and vinegar, if recommended by the

manufacturer) and running the steam function in a well-ventilated area until the tank is empty.

- Rinse the tank thoroughly with clean water afterwards.

6.3. Storage

- Allow the iron to cool completely before storing.
- Empty any remaining water from the tank.
- Wrap the power cord neatly.
- Store the iron in a dry, safe place, out of reach of children.

7. Troubleshooting

If you encounter issues with your FAGOR FG2308, consult the table below for common problems and solutions.

Problem	Possible Cause	Solution
Iron does not heat up.	Not plugged in; power switch off; faulty outlet.	Check power connection; ensure power switch is on; try a different outlet.
No steam is produced.	Water tank empty; iron not hot enough; steam button not pressed; limescale buildup.	Fill water tank; wait for iron to heat up; press steam button; descale the iron.
Water leaks from soleplate.	Temperature too low for steam; overfilled water tank.	Increase temperature setting; do not overfill the water tank.
Brown stains on fabric.	Impurities in water; soleplate dirty; descaling needed.	Use distilled water; clean soleplate; descale the iron.

If the problem persists after trying these solutions, please contact customer support.

8. Specifications

Technical details for the FAGOR FG2308 Steam Generator Iron.

- **Model Number:** FG2308 (Manufacturer Reference: S71000243)
- **Brand:** Fagor Commercial
- **Power:** 2800 Watts
- **Water Tank Capacity:** 1.5 Liters
- **Steam Output:** 120 g/min
- **Soleplate Material:** Ceramic
- **Special Features:** Powerful steam shot, Vertical steam
- **Weight:** 3.29 Kilograms
- **Recommended Use:** Ironing general household garments, suitable for various fabric types including heavy materials and delicate fabrics.

9. Warranty and Support

For warranty information, please refer to the documentation provided at the time of purchase. This typically includes details on coverage, duration, and terms and conditions.

For technical support, spare parts, or service inquiries, please contact your retailer or the Fagor Commercial customer service department. Contact details can usually be found on the Fagor Commercial official website or in your purchase documentation.
