Please read all safety instructions before assembly and use. Failure to follow these instructions may result in injury or damage to the product.

- **Maximum Load Capacity:** The top surface of the TV cabinet can support a maximum weight of 24 kg. Do not exceed this limit to prevent structural damage or tipping.

- **Stable Placement:** Always place the TV cabinet on a flat, level, and stable surface. Uneven surfaces can cause instability and risk of tipping.
- **Wall Anchoring:** If wall anchoring hardware is provided, it is highly recommended to secure the cabinet to a wall to prevent tipping, especially in households with children or pets.
- **Avoid Overloading:** Distribute weight evenly across shelves and drawers. Do not overload drawers or place excessively heavy items on shelves.
- **Children's Safety:** Do not allow children to climb on or play with the TV cabinet. Keep small parts away from children during assembly.
- **Proper Handling:** When moving the assembled cabinet, always lift it with assistance. Do not drag the cabinet, as this may damage the legs or structure.
