JISULIFE FA53-2

JISULIFE Portable Fan Pro1S 2025 User Manual

Model: FA53-2

INTRODUCTION

Thank you for choosing the JISULIFE Portable Fan Pro1S 2025. This powerful and compact personal fan is designed to provide exceptional cooling with its 9700 RPM turbine engine, 100-level adjustable wind speed, and smart LED display. Featuring a durable aluminum alloy shell and a 5000mAh battery for up to 40 hours of cooling, it's an ideal companion for travel and daily use. This manual provides essential information for safe and efficient operation, maintenance, and troubleshooting.

SAFETY INFORMATION

Please read all safety instructions before using the fan to prevent injury or damage.

- Do not insert fingers or any objects into the fan grille.
- Keep the fan away from water and moisture.
- Do not disassemble or modify the fan. Repairs should only be performed by qualified personnel.
- Keep out of reach of children.
- Use only the provided charging cable or a certified equivalent.
- Avoid exposing the fan to extreme temperatures or direct sunlight for prolonged periods.

PRODUCT OVERVIEW

Familiarize yourself with the components and key features of your JISULIFE Portable Fan Pro1S 2025.

- **Turbine Engine:** Provides powerful airflow up to 9700 RPM.
- **LED Display:** Shows current wind speed (1-100 levels) and remaining battery power.
- **Scroll Switch:** For precise adjustment of wind speed.
- **Power Button:** Controls power on/off and battery level check.
- **USB-C Charging Port:** For fast charging.
- **Safety Lock:** Prevents accidental activation.
- **Aluminum Alloy Shell:** Durable and aesthetically pleasing design.

SETUP

Charging the Battery

Before first use, fully charge the fan. The fan is equipped with a 5000mAh battery and supports fast charging.

1. Locate the USB-C charging port on the fan.
2. Connect the provided USB-C cable to the fan's charging port.
3. Connect the other end of the USB-C cable to a compatible USB power adapter (not included) or a computer's USB port.
4. The LED display will indicate charging status. A full charge takes approximately 2 hours.

Long Battery Life · Flash Charge

Ultra-long battery life **40 hours**

2hrs flash charge

OPERATING INSTRUCTIONS

Powering On/Off

1. To power on the fan, press and hold the power button for a few seconds until the LED display illuminates.
2. To power off the fan, press and hold the power button again until the display turns off.

Adjusting Wind Speed

The fan features 100 levels of adjustable wind speed.

1. Once the fan is powered on, rotate the scroll switch located on the side of the fan.
2. Rotate upwards to increase the wind speed.

3. Rotate downwards to decrease the wind speed.
4. The LED display will show the current wind speed level (1-100).

Checking Battery Level

The LED display provides real-time battery information.

- When the fan is on, the LED display will show the current wind speed and a battery icon indicating the remaining charge.
- To quickly check the battery level when the fan is off, double-click the power button. The display will briefly show the battery percentage.

Uniquely Crafted Button Design with Intricate Details

Scroll the knob, Check the wind level

Double-click the power button,
Check the battery level

Cleaning the Fan

Regular cleaning helps maintain optimal performance.

- Ensure the fan is powered off and unplugged before cleaning.
- Use a soft, dry cloth to wipe the exterior of the fan.
- For dust accumulation on the fan grille, use a soft brush or compressed air to gently remove it.
- Do not use abrasive cleaners, solvents, or immerse the fan in water.

Battery Care and Storage

- To prolong battery life, avoid fully discharging the battery frequently.
- If storing the fan for an extended period, charge it to approximately 50% and store it in a cool, dry place. Recharge every 3-6 months to prevent deep discharge.

TROUBLESHOOTING

If you encounter issues with your fan, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Fan does not turn on.	Low battery; Safety lock engaged; Malfunction.	Charge the fan fully; Disengage the safety lock; Contact customer support if issue persists.
Weak airflow.	Low battery; Fan grille obstructed; Incorrect speed setting.	Charge the fan; Clean the fan grille; Increase wind speed using the scroll switch.
Fan not charging.	Cable or adapter issue; Charging port damage.	Try a different USB-C cable and power adapter; Ensure cable is fully inserted; Contact customer support.
LED display not working.	Malfunction.	Restart the fan; Contact customer support.

SPECIFICATIONS
