Findepot SD-3-4871-B

Findepot 44-48" W x 71" H Pivot Glass Shower Door Instruction Manual

Model: SD-3-4871-B | Brand: Findepot

1. Introduction and Overview

This manual provides detailed instructions for the installation, operation, and maintenance of your Findepot Pivot Glass Shower Door. Please read all instructions carefully before beginning installation to ensure proper function and safety. This shower door is designed for a width range of 44-48 inches and a height of 71 inches, featuring a 1/4 inch (6mm) clear tempered glass panel.

2. Product Features

- **Adjustable Design:** The width of this pivot shower door can be adjusted from 44 to 48 inches without cutting, accommodating various bathroom sizes. It features a 130° opening angle for convenient entry and exit.
- **Easy-Clean Coating:** The glass is treated with an easy-clean coating to resist water stains and soap buildup, simplifying maintenance.
- **Enhanced Bathroom Safety:** Constructed with 1/4 inch (6mm) ANSI certified tempered glass. The glass panel is covered with an explosion-proof film to prevent scattering of shards in case of accidental breakage.
- **Dry and Wet Separation:** Designed to effectively prevent water splashes and leaks from escaping the shower area, keeping the rest of the bathroom dry.
- **Reversible Installation:** The shower door can be installed to open from either the left or right side, adapting to your bathroom layout.
- **Durable Components:** All accessories, including the aluminum frame and 304 stainless steel handle, are made from high-

quality, corrosion-resistant materials to prevent rust, chipping, or scratching.

4. Safety Information

Your Findepot shower door is designed with safety in mind. It features 1/4 inch (6mm) ANSI certified tempered glass, which is significantly stronger than regular glass and designed to break into small, blunt pieces if shattered. An additional explosion-proof film further enhances safety by holding glass fragments together in the event of breakage.

- Always handle glass panels with care.
- Ensure all components are securely fastened during installation.
- Do not apply excessive force to the glass or frame.
- Regularly inspect the door for any signs of damage or loose parts.

5. Installation Guide

Installation of the Findepot Pivot Glass Shower Door requires careful attention to detail. It is recommended to have two people for certain steps, especially when handling the glass panels due to their weight. Please follow the detailed instructions provided in the packaging. Below are key considerations:

5.1. Pre-Installation Checks

- **Unpack and Inspect:** After receiving the package, carefully unpack all components and check against the parts list in your manual to ensure everything is present and undamaged. If any accessories are missing or damaged, contact customer support immediately.
- **Measure Opening:** Confirm your shower opening width is within the 44-48 inch range.
- **Tools Required:** Gather all necessary tools as specified in your manual (e.g., drill, level, measuring tape, silicone sealant).

5.2. Drilling and Anchoring

When drilling into tile or masonry, it is crucial to use the correct drill bit size for the provided wall anchors. Based on user feedback, use a **6 mm masonry drill bit** for the wall anchors. Do *not* use a 5/16 inch (8 mm) bit, as this may result in holes that are too large for the anchors, compromising stability.

5.3. Reversible Door Installation

The door is designed for reversible installation, meaning it can be configured to open from either the left or right side. Determine your preferred opening direction before assembling the frame and installing the glass panels.

Image 6.2: Illustration of the door's opening and closing mechanism.

7. Maintenance

Proper maintenance will ensure the longevity and pristine appearance of your Findepot shower door. The easy-clean coating on the glass significantly reduces the effort required for cleaning.

- **Regular Cleaning:** For daily cleaning, wipe down the glass with a soft cloth or squeegee after each use to prevent water spots.
- **Deep Cleaning:** Use a mild, non-abrasive glass cleaner or a solution of white vinegar and water. Avoid harsh chemicals, abrasive pads, or scouring powders, as these can damage the glass coating and frame finish.

- **Frame Care:** Clean the aluminum frame with a soft, damp cloth. Do not use abrasive cleaners or steel wool.
- **Seal Inspection:** Periodically check the shower door sealing strips and bottom aluminum seal for wear or damage. Replace if necessary to maintain water tightness.

8. Troubleshooting

If you encounter any issues with your shower door, refer to the following common troubleshooting tips:

Problem	Possible Cause / Solution
Water leaks from door	Check that all sealing strips are properly installed and intact. Ensure the bottom seal is making full contact with the shower base. Verify that the door is closing completely and the magnetic strip is engaging. Reapply silicone sealant if necessary.
Door does not close properly	Check for obstructions in the pivot mechanism. Ensure the wall jambs are plumb and the door frame is square. Adjust hinges if they are out of alignment.
Glass appears scratched or damaged	Inspect the glass for any manufacturing defects upon receipt. Avoid using abrasive cleaning tools or harsh chemicals that can damage the surface.
Missing parts upon delivery	Refer to the parts list in your manual. Contact Findepot customer support immediately with details of the missing components.

9. Warranty and Support

Findepot is committed to providing high-quality products and excellent customer service.

- **Warranty:** This product comes with a lifetime dedicated after-sales support. Specific warranty details may be provided with your purchase documentation.
- **Returns:** Enjoy a 30-day no-questions-asked return policy.
- **Customer Support:** Our team aims to reply to all inquiries within 24 hours.
