› Unistyle WiFi Sprinkler Timer 2 Zone - Instruction Manual

## Unistyle SMT201

# Unistyle WiFi Sprinkler Timer 2 Zone - Instruction Manual

Model: SMT201

## INTRODUCTION

---

This manual provides comprehensive instructions for the setup, operation, and maintenance of your Unistyle WiFi Sprinkler Timer 2 Zone. This smart irrigation controller allows for remote management of your garden watering system via the "SmartLife" app, offering features like timed irrigation, spray mode, and rain delay functions.

## PRODUCT OVERVIEW & WHAT'S IN THE BOX

---

Your Unistyle WiFi Sprinkler Timer package includes the following components:

## what's in the Box

Fuselage x1

Manual x3

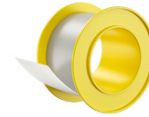

Gateway x1

Silicone Gasket \* 1

Adapter Down x1

Raw Material Belt x1

*Image: Visual representation of all items included in the product packaging.*

- **Fuselage** (Main Timer Unit) x1
- **Manual** x3 (Quick Guide)
- **Gateway** (USB WiFi Hub) x1
- **Silicone Gasket** x1
- **Adapter Down** (USB Power Adapter) x1
- **Raw Material Belt** (Thread Seal Tape) x1

## SETUP

### 1. Battery Installation & Gateway Power

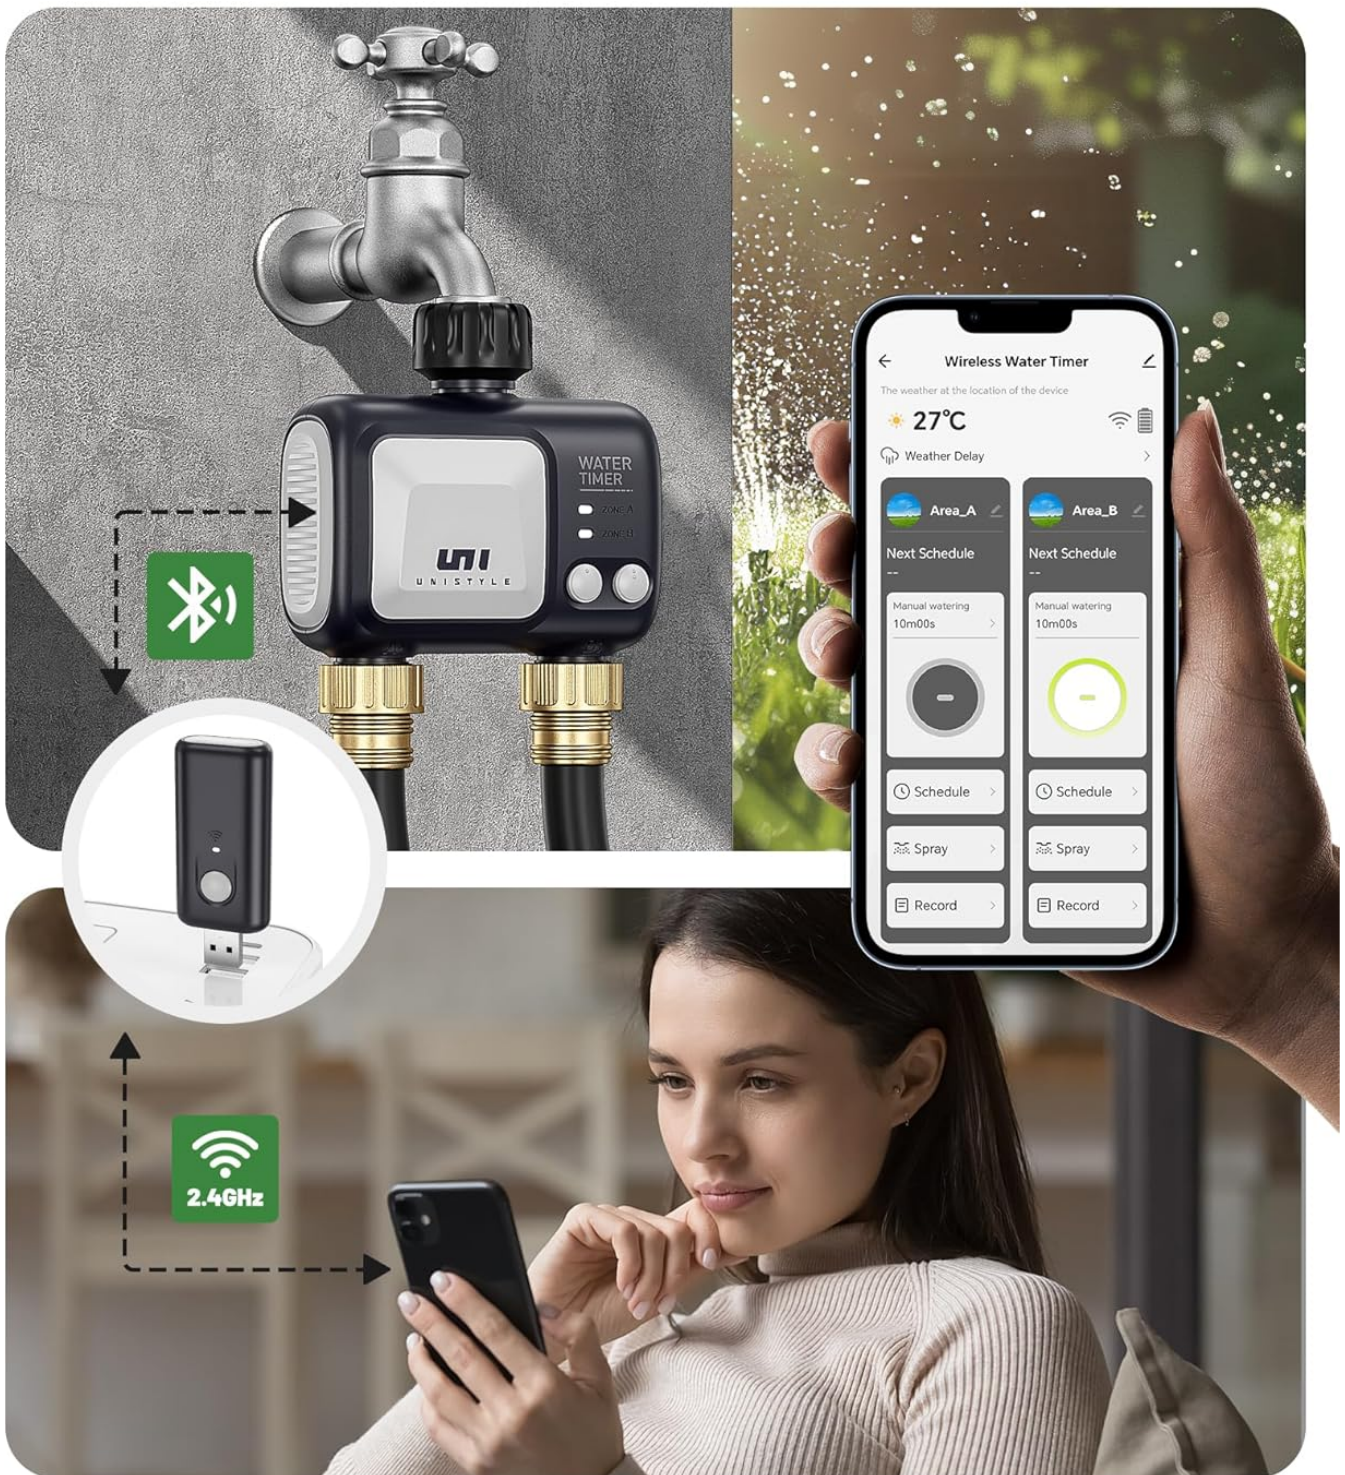

Before use, install 2 AA batteries into the timer unit. Ensure the battery cover is securely closed to maintain the IP54 waterproof rating. The USB WiFi hub (gateway) requires power via the provided adapter or any standard USB power source.

*Image: Open battery compartment for 2 AA batteries.*

## 2. App Download and Account Creation

Download the "SmartLife" app from your device's app store. Register for a new account or log in if you already have one.

## 3. Gateway Pairing (Smart Pairing)

Ensure your phone's WiFi (2.4GHz only) and Bluetooth are enabled. In the SmartLife app, navigate to the home screen, click the "+" button, and select "Add Device". Follow the on-screen prompts for Smart Pairing. Make sure the gateway is powered on and its indicator light blinks rapidly (press and hold the gateway button if needed). Enter your

WiFi information and password.

**Note:**

- If network pairing fails within 120 seconds, check the gateway device and reset the connection, or switch network pairing methods.
- Keep the hub and timer within 30 feet for stable connection.

#### 4. Water Timer Pairing

Connect the timer to your water pipe. Press and hold the button on the timer for 5-10 seconds until its indicator light blinks, indicating it has entered pairing mode. In the SmartLife app, click the blue "Add" button to add the wireless timer water valve. Wait for the corresponding program to finish downloading, then click "Done".

#### 5. Associating Timer with Gateway

After adding the water timer, you will need to associate it with the gateway. In the app, click "Associate to" and select the corresponding gateway. Click "Associate" and then "Finish". This step is crucial for remote control functionality.

**Note:**

- The automatic watering program will stop when rain delay or manual watering is turned on. The program will resume when manual watering is stopped, but the remaining watering time during the program restart will not be performed.

## OPERATING MODES

---

The Unistyle WiFi Sprinkler Timer offers various modes for flexible irrigation control.

### 1. Timed Irrigation Mode (Scheduled)

Program your watering schedule through the app's scheduled page. You can set the start time (00:00-23:59), duration (1 second to 59 minutes 59 seconds), and watering cycle frequency (e.g., Mon-Sun, odd day, even day, every day). Up to 5 different watering modes can be set for each zone.

*Image: App interface for configuring spray irrigation, suitable for misting and cooling.*

### 3. Rain Delay

Manually set a watering delay for 1-7 days to conserve water during rainy periods. The system can also integrate with smart weather predictions to automatically skip irrigation on rainy days.

*Image: Rain delay feature in the app, allowing users to pause watering for a set number of days or based on weather forecasts.*

#### **4. Manual Watering**

For immediate watering needs, you can manually activate either zone directly from the app or by pressing the buttons on the timer unit. Manual watering duration can be set from 1 second to 59 minutes 59 seconds.

## 5. Irrigation Records

The SmartLife app keeps a detailed record of all irrigation activities, allowing you to monitor your watering history and ensure efficient water usage.

## MAINTENANCE

### 1. Durable Waterproof Design

The timer is constructed from high-quality ABS plastic with UV-resistant material. The connector is made of 30% reinforced nylon, capable of handling water pressure from 7.25 psi to 116 psi. The battery cover features an IP54 waterproof rubber ring, silicone gasket, and threaded sealing tape for outdoor durability.

Image: Durable threaded outlet for secure hose connection.

## 2. Battery Replacement

When the battery level is low (indicated in the app), replace both AA batteries with new alkaline batteries. Do not mix old and new batteries.

## 3. General Care

Clean the timer periodically with a damp cloth. Ensure all connections are tight to prevent leaks. During freezing temperatures, disconnect the timer and store it indoors to prevent damage.

## TROUBLESHOOTING

---

- **Network Pairing Failure:** If the gateway or timer fails to pair within 120 seconds, ensure your phone's WiFi (2.4GHz) and Bluetooth are on. Reset the gateway by pressing and holding its button until the indicator blinks rapidly. Try pairing again.
- **Connection Issues:** The smart irrigation timer has a communication range of up to 30 feet with the gateway. Ensure the gateway is always plugged into a power source and is not too far from the timer unit.
- **Timer Not Responding:** Ensure you are using brand new alkaline batteries and not mixing old and new ones.
- **Problems Linking the Machine:** Refer to the operation video provided on the product page for visual guidance.
- **Disconnection During OS Download:** If disconnection occurs while downloading the operating system, long-press the machine button to restart the machine and re-download the operating system.
- **Unexpected Watering:** If a zone activates unexpectedly, ensure no schedules are inadvertently set for that zone in the app. Always cap unused outlets to prevent water damage.

## SPECIFICATIONS

---

| Feature              | Detail   |
|----------------------|--|
| Product Dimensions   | 7.13 x 5.67 x 2.48 inches  |
| Item Weight          | 1.15 pounds  |
| Model Number         | SMT201   |
| Brand                | Unistyle   |
| Material             | Plastic (ABS with UV-resistant material, 30% reinforced nylon connector) |
| Water Pressure Range | 7.25 psi to 116 psi  |
| Waterproof Rating    | IP54   |
| WiFi Compatibility   | 2.4GHz only  |
