3. SETUP AND ASSEMBLY

3.1 Chest Mount Assembly

The chest mount features a vest-like design for comfort and stability. It is compatible with various action cameras and smartphones.

Vest Design

Designed for comfort, it fits snugly without shaking allowing you to adjust freely when you create.

- 1. Wearing the Head Mount:** Place the head strap around your head. Adjust the Velcro straps to achieve a snug and comfortable fit. The sponge pad helps prevent shifting and is easy to clean. It is ideal for head circumferences between 50-70cm.
- 2. Attaching Your Device:** Use the included long thumb screw to attach your action camera or phone clamp to the mount on the head strap.

3.3 Attaching Phone Clamps

Two phone clamps are provided for use with either the chest or head mount.

- Open the phone clamp and securely place your smartphone inside.
- Attach the phone clamp to the desired mount (chest or head) using the quick-release system or thumb screw, depending on the mount.

Wide Compatibility

Equipped with a phone clamp, this chest strap is compatible with various action cameras and phones.

5. MAINTENANCE

To ensure the longevity and proper functioning of your ULANZI Phone Chest and Head Mount Kit, follow these maintenance guidelines:

- Cleaning:** Wipe the straps and plastic components with a damp cloth. For the sponge pad on the head mount, it can be cleaned with mild soap and water, then air-dried. Avoid harsh chemicals.
- Storage:** Store the kit in a cool, dry place away from direct sunlight and extreme temperatures.
- Inspection:** Periodically check all straps, buckles, and mounting points for signs of wear or damage. Replace any damaged components immediately to prevent device loss.

6. TROUBLESHOOTING

If you encounter issues with your ULANZI Phone Chest and Head Mount Kit, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Device feels loose on the mount.	Improper attachment; worn quick-release mechanism.	Ensure the quick-release is fully engaged or the thumb screw is tightened. Inspect for wear.
Straps are uncomfortable or too tight/loose.	Incorrect strap adjustment.	Adjust the Velcro straps for a comfortable and secure fit.
Cannot switch between vertical/horizontal modes.	Button not pressed (head mount); mechanism obstructed.	For head mount, ensure the button is pressed before rotating. Check for any obstructions.
Image/video is shaky.	Mount not secure; excessive movement during activity.	Ensure all straps are tightened and the device is firmly attached. Minimize sudden movements.
