Collective Minds CM00149

Collective Minds Xbox Strikepack Horizon Vista M.O.D. Pack

INSTRUCTION MANUAL

Product Overview

The Collective Minds Xbox Strikepack Horizon Vista M.O.D. Pack is an advanced accessory designed to enhance your gaming experience on Xbox Series X|S and Xbox One controllers. It provides four programmable back buttons and a wide range of MODS, including anti-recoil, aimbot controller enhancements, and macros, all customizable via the StrikePack Central App. This wired connection ensures ultra-responsive and low-latency performance for competitive gaming.

Key Features

- **4 Programmable Back Buttons:** Assign any button or action to the back buttons for enhanced control and faster response times.
- **App-Powered Customization:** Use the StrikePack Central App (iOS 15+ or Android 9+) to create, edit, and share anti-recoil settings, macros, and other advanced MODS.
- **Next-Level MODS:** Features anti-recoil, controller enhancements, rapid-fire, and FPS-specific mods, giving you a competitive edge.
- **Seamless Compatibility:** Designed for Xbox Series X|S (1914 controllers) and Xbox One (1537, 1697, & 1708 controllers); Elite controllers are not supported. Wired connection ensures lag-free gaming.
- **Wired Precision Performance:** Enjoy low-latency, reliable performance with a direct wired connection, perfect for competitive gaming.

Setup Guide

What's in the Box

- Collective Minds Xbox Strikepack Horizon Vista M.O.D. Pack device
- USB connection cable
- Instruction manual (this document)

Physical Installation

To install the Strikepack, carefully attach it to the back of your compatible Xbox Series X|S (1914 controllers) or Xbox One (1537, 1697, & 1708 controllers). Ensure a secure fit. Connect the Strikepack to your console using the provided USB cable. The device operates via a wired connection for optimal performance.

App Installation & Firmware Update

Download the **StrikePack Central App** from your device's app store. It is compatible with iOS 15+ and Android 9+ devices. Before first use, it is crucial to update the firmware of your Strikepack via a PC or Mac. To do this, you **MUST** disconnect the U-shaped USB Adapter from the mod pack and the controller before connecting the device to your computer. This ensures your computer can properly recognize the mod pack for the update process.

Operating Instructions

Using Programmable Back Buttons

The Strikepack features four precision back buttons. These buttons can be programmed to replicate any standard controller input, allowing for quicker access to actions without removing your thumbs from the analog sticks. Refer to the StrikePack Central App for detailed instructions on mapping these buttons to your preferred functions.

App-Powered Customization (M.O.D.s)

The StrikePack Central App is the primary interface for customizing your Strikepack. Through the app, you can:

- Create and edit custom anti-recoil settings for various weapons.
- Program complex macros for executing multiple actions with a single button press.
- Access and configure other advanced MODs, such as rapid-fire and controller enhancements.
- Share your custom configurations with other users.

The app allows for detailed adjustments to optimize your gameplay. Ensure your smartphone is connected to the internet for app functionality and updates.

Maintenance

To ensure the longevity and optimal performance of your Strikepack, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the device. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** Store the Strikepack in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Cable Care:** Avoid sharp bends or kinks in the USB cable. Always grasp the connector, not the cable, when plugging or unplugging.

Troubleshooting

Issue	Possible Cause	Solution
-------	----------------	----------

Issue	Possible Cause	Solution
Strikepack not turning on / not recognized by console.	Loose connection; power issue; firmware outdated.	Ensure the USB cable is securely connected to both the Strikepack and the console. Try unplugging and re-plugging the power cord from the controller. Verify firmware is up to date via the StrikePack Central App or PC/Mac.
Paddles/Buttons not mapping or losing mapped functions.	Incorrect mapping procedure; app synchronization issue.	Ensure you are following the correct mapping procedure in the StrikePack Central App. Re-sync the device with the app. Check for app updates.
MODs (e.g., rapid fire, aim assist) not working in games.	Game incompatibility; console restrictions.	Some games or console platforms may have measures to detect and prevent the use of certain MODs. Ensure the MODs are configured correctly for the specific game in the app. Note that some advanced MODs may not function as expected on console games due to system limitations.
StrikePack Central App not connecting or crashing.	App version outdated; device compatibility; software conflict.	Ensure your smartphone meets the minimum OS requirements (iOS 15+ or Android 9+). Update the app to the latest version. Restart your smartphone and the Strikepack.
