Jura E8

Jura E8 Automatic Coffee Machine Instruction Manual

Model: E8 (15648)

This manual provides essential information for the setup, operation, maintenance, and troubleshooting of your Jura E8 automatic coffee machine.

1. INTRODUCTION

The Jura E8 is a fully automatic coffee machine designed to prepare a wide range of coffee specialties from freshly ground beans. It offers 17 beverage options, allowing for personalized coffee experiences at the touch of a button. This machine features an advanced P.A.G.2 grinder, an eighth-generation 3D brewing unit, and an intuitive 3.5-inch color display for ease of use.

2. SETUP

Follow these steps for the initial setup of your Jura E8 coffee machine:

- 1. Unpacking:** Carefully remove all packaging materials and place the machine on a stable, level surface.
- 2. Power Connection:** Connect the power cable to the machine and then to a grounded power outlet.
- 3. Water Tank:** Remove the water tank, rinse it, and fill it with fresh, cold water. Insert the water filter if provided, then reinsert the tank into the machine.

Figure 2: Filling the water tank.

4. **Bean Hopper:** Open the aroma preservation cover and fill the bean hopper with fresh coffee beans.

Figure 3: Filling the bean hopper.

5. **Initial Start-up:** Follow the on-screen instructions on the 3.5-inch color display for the initial setup process, which typically includes language selection, water hardness setting, and rinsing cycles.

3. OPERATING INSTRUCTIONS

The Jura E8 offers a user-friendly interface for preparing various coffee specialties.

3.1. Beverage Selection

Use the 3.5-inch color display and the six operating buttons to navigate through the menu. The display shows clear pictures and graphics of available options.

Figure 4: The E8's intuitive color display.

To prepare a drink:

1. Place a cup under the coffee spout.
2. Select your desired beverage from the display. The machine will automatically grind the beans and brew the coffee.
3. For milk-based drinks, ensure the milk system is connected and contains fresh milk.

3.2. Customization

The E8 allows for customization of drinks. Depending on the beverage, you can adjust parameters such as coffee strength, water volume, and milk foam quantity. These options are typically presented on the display before brewing.

3.3. Grinder Adjustment

The P.A.G.2 grinder setting can be adjusted using the ergonomically shaped selector switch. Adjusting the grinder allows you to fine-tune the fineness of the coffee grounds, impacting the flavor extraction. It is recommended to adjust the grinder only when the grinder is running.

4. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Jura E8.

4.1. Milk System Cleaning

The E8 features an automatic one-touch milk system cleaning process. Follow the prompts on the display to initiate this cycle. Regular cleaning prevents blockages and maintains hygiene.

Figure 7: Milk system cleaning.

4.2. Drip Tray and Coffee Grounds Container

The drip tray and coffee grounds container should be emptied and cleaned regularly. The design of the drip tray prevents water from spilling and allows for convenient removal with one hand.

4.3. Water Filter Replacement

The machine will prompt you when the water filter needs to be replaced. Follow the on-screen instructions for replacing the filter to ensure optimal water quality and prevent descaling issues.

4.4. Descaling

Depending on your water hardness and filter usage, the machine may require descaling. The display will guide you through the descaling process when necessary.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your Jura E8.

- **Issue: Coffee volume is significantly less than selected.**

Possible Cause: Blockage in the coffee spout or brewing unit, or an issue with the pump.

Solution: Perform a cleaning cycle for the coffee system. Ensure the brewing unit is clean. If the problem persists, contact Jura customer service.

- **Issue: Machine displays an error message.**

Possible Cause: Various internal issues.

Solution: Refer to the specific error code displayed on the screen and consult the detailed troubleshooting section in the full user manual or Jura's online support. Often, turning the machine off and on again can resolve temporary errors.

- **Issue: Milk foam is not consistent or absent.**

Possible Cause: Milk system is dirty or blocked, or milk is not cold enough.

Solution: Perform a thorough milk system cleaning. Ensure all components are correctly assembled. Use fresh, cold milk.

- **Issue: Coffee tastes weak or watery.**

Possible Cause: Grinder setting is too coarse, insufficient coffee dose, or old coffee beans.

Solution: Adjust the grinder to a finer setting (see Section 3.3). Ensure the bean hopper is filled with fresh beans. Check coffee strength settings.

If you encounter persistent issues not covered here, please refer to the comprehensive troubleshooting guide available on the official Jura website or contact their customer support.

6. SPECIFICATIONS

Feature	Detail
Brand	Jura
Model Name	E8
Item Model Number	15648
Color	Piano Black
Product Dimensions	11"D x 17.6"W x 13.8"H
Item Weight	22 pounds
Special Features	Auto Shut-Off, Integrated Coffee Grinder, Programmable, Removable Tank
Coffee Maker Type	Espresso Machine

Feature	Detail
Style	Modern, Compact
Specific Uses For Product	Cappuccino, Espresso, Latte
Included Components	Filter
Operation Mode	Fully Automatic
Voltage	120 Volts
Human Interface Input	Buttons
Unit Count	1.0 Count
