2. Powering On/Off

- To power on: Press and hold the power button located on the side of the device until the screen illuminates.
- To power off: Press and hold the power button, then select "Power off" from the on-screen options.

3. Initial Setup and Wi-Fi Connection

Upon first power-on, follow the on-screen prompts to select your preferred language and connect to a Wi-Fi network. The device supports dual-band 2.4GHz and 5GHz Wi-Fi for a stable connection.

4. Expanding Storage

The innioasis G1 comes with 80GB of internal storage and includes a 64GB memory card. You can expand the storage further up to 1TB using the built-in Micro SD card slot. Insert a compatible Micro SD card into the designated slot on the device.

Maintenance

Battery Care

- To maximize battery lifespan, avoid completely draining the battery frequently.
- Charge the device using the recommended 5V=2A power adapter.
- The battery provides approximately 15-25 hours of music playback (depending on earbud type) or 4-5 hours of video playback on a full charge.

Storage Management

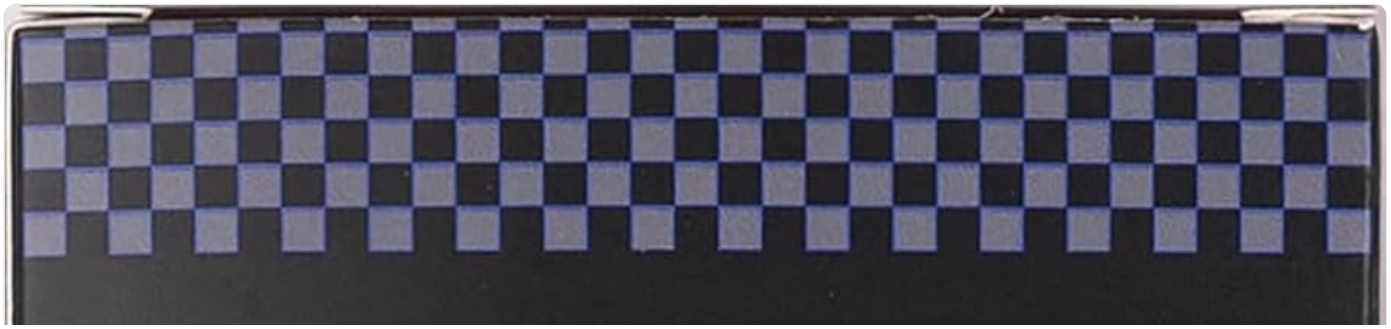

- Regularly manage your stored files to optimize performance.
- Utilize the expandable storage (up to 1TB via Micro SD card) for large media libraries.

Troubleshooting

If you encounter issues with your innioasis G1 MP3 player, consider the following general troubleshooting steps:

- **Device not powering on:** Ensure the battery is charged. Connect to a power source and try again.
- **No sound:** Check volume levels, ensure headphones/speakers are properly connected or Bluetooth paired.
- **Wi-Fi connection issues:** Verify Wi-Fi password, ensure the device is within range of the router, and try restarting both the device and the router.
- **App not responding:** Close the app and reopen it. If the issue persists, restart the device.
- **Slow performance:** Close unused applications and clear cache if available. Consider reducing the number of files stored on internal memory.
