BrickBling 10341

BrickBling LED Light Kit for LEGO 10341 NASA Artemis Space Launch System - Classic Version Instruction Manual

Model: 10341

INTRODUCTION

This manual provides detailed instructions for installing and operating your BrickBling LED Light Kit, designed specifically for the LEGO 10341 NASA Artemis Space Launch System. This kit enhances your model with dynamic lighting. Please note that the LEGO model itself is not included with this light kit.

SETUP AND INSTALLATION

Detailed, step-by-step installation instructions are provided digitally. To access these, please follow the instructions printed in the booklet included with your package. This will direct you to a website where you can find PDF and video guides tailored for your specific model.

General Installation Tips:

- Handle LED lights and wires gently to avoid damage.
- Ensure wires are neatly tucked away to maintain the aesthetic of your LEGO model.
- Test connections periodically during installation to confirm proper functionality.

OPERATING INSTRUCTIONS

The BrickBling LED Light Kit can be powered via a USB cable, which is included in the package. For optimal lighting performance, using the USB cable is recommended. The kit can also be powered by batteries (not included), offering portability.

- **USB Power:** Connect the provided USB cable to the light kit and a compatible USB power source (e.g., a USB wall adapter, power bank, or computer USB port).
- **Battery Power (Optional):** If using batteries, insert the correct type and number of batteries into the battery box (if included with your specific kit variant).

Once connected to a power source, the lights will illuminate. There are no additional controls for this Classic Version Light

kit; it operates in an automatic mode.

MAINTENANCE

To ensure the longevity and optimal performance of your LED light kit:

- **Cleaning:** Gently dust the lights and wires with a soft, dry cloth. Avoid using liquid cleaners directly on the electrical components.
- **Storage:** If disassembling or storing the model, carefully disconnect and store the light kit components to prevent tangling or damage to the delicate wires and LEDs.
- **Handling:** Avoid excessive bending or pulling of the wires, as this can cause internal damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lights do not turn on.	No power, loose connection, damaged wire/LED.	<ul style="list-style-type: none">◦ Ensure the USB cable is securely connected to both the light kit and a working power source.◦ Check all wire connections for tightness.◦ Inspect wires and LEDs for visible damage.
Some lights are not working.	Loose connection to specific light, damaged individual LED.	<ul style="list-style-type: none">◦ Verify connections for the non-working lights.◦ If an individual LED is damaged, contact customer support for assistance.
