FORSINING Men's Automatic Skeleton Watch Instruction Manual

Model: FORSINING Men's Automatic Skeleton Watch
Brand: FORSINING

INTRODUCTION

Welcome to your new FORSINING Automatic Skeleton Watch. This manual provides essential information for setup, operation, maintenance, and troubleshooting to ensure optimal performance and longevity of your timepiece.

KEY FEATURES

- **Automatic Self-Winding Movement:** Powers automatically with wrist movement, eliminating the need for a battery.
- **Skeleton Dial Design:** Features a transparent dial that showcases the intricate internal mechanical movement.
- **Luminous Pointers:** Watch hands are designed to glow in the dark after absorbing sufficient light, enhancing readability in low-light conditions.
- **Durable Construction:** Built with a stainless steel crown and caseback, paired with a comfortable and robust silicone strap.
- **Water Resistance:** Designed for daily water exposure such as hand washing or light rain. It is not suitable for swimming, diving, or showering.

SETUP AND INITIAL WINDING

Your FORSINING automatic watch operates without a battery, powered by the natural motion of your wrist. For initial setup or if the watch has stopped, follow these steps:

1. **Manual Winding:** To initiate power, gently turn the crown clockwise approximately 15-20 times. This action winds the mainspring and starts the movement.
2. **Setting the Time:** Pull the crown out to the time-setting position. Turn the crown to adjust the hour and minute hands to the correct time. Once set, push the crown back in fully to secure the setting and maintain water resistance.
3. **Wearing the Watch:** After winding and setting, wear the watch for at least 8-10 hours daily. Consistent wrist movement will keep the watch powered. If worn less frequently, supplementary manual winding may be necessary to maintain accurate time.

Image: Close-up view of the watch's right side, highlighting the textured crown used for winding and setting the time.

Important Notes:

- Avoid exposing the watch to strong magnetic fields, as this can adversely affect its accuracy.
- If the watch stops after a period of inactivity, simply repeat the manual winding process as described above.

OPERATING YOUR AUTOMATIC WATCH

This watch is designed for ease of use, relying on your daily activities to maintain its power reserve.

Automatic Winding

The watch features an automatic self-winding mechanism. As you wear the watch, an internal rotor moves with your wrist, continuously winding the mainspring. This kinetic energy keeps the watch powered without the need for manual winding, provided it is worn regularly.

Image: Rear view of the watch, displaying the transparent caseback and the intricate automatic movement components.

Luminous Display

The watch hands are treated with a luminous material. After exposure to a light source, they will glow in darker conditions, improving readability at night. The intensity and duration of the glow are directly proportional to the amount and duration of light exposure.

CARE AND MAINTENANCE

Proper care ensures the longevity and optimal performance of your FORSINING watch.

- **Cleaning:** Regularly wipe the watch case and strap with a soft, dry cloth to remove dust and dirt. For the silicone strap, a slightly damp cloth can be used, followed by thorough drying.
- **Water Resistance:** This watch is water-resistant for daily activities such as hand washing or light rain. It is **not** suitable for swimming, diving, showering, or any activity involving prolonged water immersion or high-pressure water. Always ensure the crown is fully pushed in to maintain water resistance.
- **Temperature:** Avoid exposing the watch to extreme temperatures (both hot and cold) or sudden temperature changes, as these can affect the movement and seals.
- **Impact:** Protect the watch from strong impacts or shocks, which can damage the delicate internal mechanism.
- **Chemicals:** Avoid contact with solvents, detergents, perfumes, and cosmetic products, as they can damage the case, strap, or seals.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch stops or runs inaccurately.	Insufficient power reserve (not worn enough or not manually wound). Exposure to strong magnetic fields. Impact or damage to the movement.	Manually wind the watch by turning the crown 15-20 times. Wear the watch regularly (8-10 hours daily). Keep the watch away from strong magnets. If issues persist after winding and avoiding magnets, contact customer support.
Luminous hands do not glow.	Insufficient exposure to light.	Expose the watch dial to a bright light source for a few minutes to charge the luminous material.
Water inside the watch or fogging under crystal.	Crown not fully pushed in. Exposure to water beyond specified resistance. Damage to seals.	Immediately stop using the watch and contact customer support. Do not attempt to open the watch yourself.

SPECIFICATIONS

- **Movement:** Automatic Self-Winding Mechanical
- **Case Material:** Stainless Steel
- **Strap Material:** Silicone
- **Clasp Type:** Buckle
- **Water Resistance:** Daily water resistance (not for swimming, diving, or showering)
- **Model Number:** 6e6b3f30-a50f-4f06-8299-ec2a56f19460
- **Approximate Package Dimensions:** 5 x 2 x 1 inches
- **Approximate Package Weight:** 8 ounces

WARRANTY INFORMATION

FORSINING provides a 90-day limited manufacturer's warranty from the date of purchase. This warranty covers manufacturing defects in materials and workmanship under normal use.

The warranty does **not** cover:

- Damage resulting from improper handling, lack of care, accidents, or normal wear and tear.
- Water damage if the watch was exposed to conditions beyond its specified water resistance.
- Unauthorized repairs or modifications.

For warranty claims, please retain your proof of purchase and contact FORSINING customer support.

CUSTOMER SUPPORT

If you have any questions, concerns, or require assistance with your FORSINING watch, please contact our customer support team.

Contact information can typically be found on the retailer's website where the product was purchased or through the official FORSINING brand store on Amazon:

[Visit the FORSINING Store on Amazon](#)

When contacting support, please provide your model number (6e6b3f30-a50f-4f06-8299-ec2a56f19460) and a detailed description of the issue.
