Leadfan Leadfan Car Stereo B0D3THWBNF

Leadfan 10.1" Touchscreen Car Stereo User Manual

For Honda Civic (2006-2011) - Model: B0D3THWBNF

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Leadfan 10.1" Touchscreen Car Stereo. Please read this manual thoroughly before using the product to ensure proper functionality and safety. Keep this manual for future reference.

2. APPLICABLE MODELS

This car stereo is specifically designed for the following vehicle models:

- Honda Civic (2006, 2007, 2008, 2009, 2010, 2011)

Important Compatibility Notes:

- Not suitable for Honda Civic EX series models.
- Not compatible with vehicles equipped with a premium audio system (e.g., J.B.L or B.O.S.E.).
- Not compatible with vehicles that have a factory navigation screen.

Before purchasing and installing, please verify the model and year of your car, as well as the shape and size of your vehicle's center console, to ensure compatibility.

4. SETUP & INSTALLATION

4.1 Pre-Installation Checks

- Ensure your vehicle is compatible with the stereo (refer to Section 2).

- Disconnect the vehicle's battery before starting installation to prevent electrical shorts.
- Gather all necessary tools (e.g., screwdrivers, wire strippers, electrical tape).

4.2 Wiring and Connections

The included wiring harness is designed for plug-and-play installation for compatible Honda Civic models. Connect the main power cable harness to your vehicle's existing wiring. Ensure all connections are secure.

- **Power Cable:** Connect the main power cable to the corresponding vehicle harness.
- **RCA Cable:** Use for external audio/video input/output connections.
- **USB Cables:** Connect for USB device input (e.g., media playback, phone charging).
- **GPS Antenna:** Connect the GPS antenna and mount it in a location with a clear view of the sky (e.g., dashboard, under the windshield).
- **Radio Antenna:** Connect your vehicle's existing radio antenna.
- **Camera Input:** Connect the backup camera cable to this input.

4.3 Backup Camera Installation

The backup camera provides a rear view when reversing. Follow these steps for installation:

1. Mount the backup camera at the rear of your vehicle, typically near the license plate.
2. Connect the camera's video output cable to the "Rear View Input" on the car stereo.
3. Connect the camera's power wire to the vehicle's reversing light positive (+) wire. This ensures the camera activates when the vehicle is in reverse.
4. Connect the camera's ground wire to a suitable chassis ground point.
5. Ensure the reversing trigger cable (often a pink wire from the power cable harness) is connected to the reversing light positive (+) as well. This signals the stereo to switch to the camera view.

5. OPERATING INSTRUCTIONS

5.1 Power On/Off and Basic Navigation

After installation, reconnect the vehicle battery. The unit should power on with the ignition. Use the 10.1" IPS touchscreen for all operations. The Android system provides an intuitive interface for accessing various functions.

5.2 Wireless Apple CarPlay & Android Auto

Connect your smartphone wirelessly via Bluetooth and Wi-Fi to access Apple CarPlay or Android Auto. This allows integration of phone functions like navigation, music, messages, and voice control (Siri/Google Assistant) directly on the stereo display.

- **Voice Control:** Activate by saying "Hi, Siri" or "OK, Google" to issue commands.

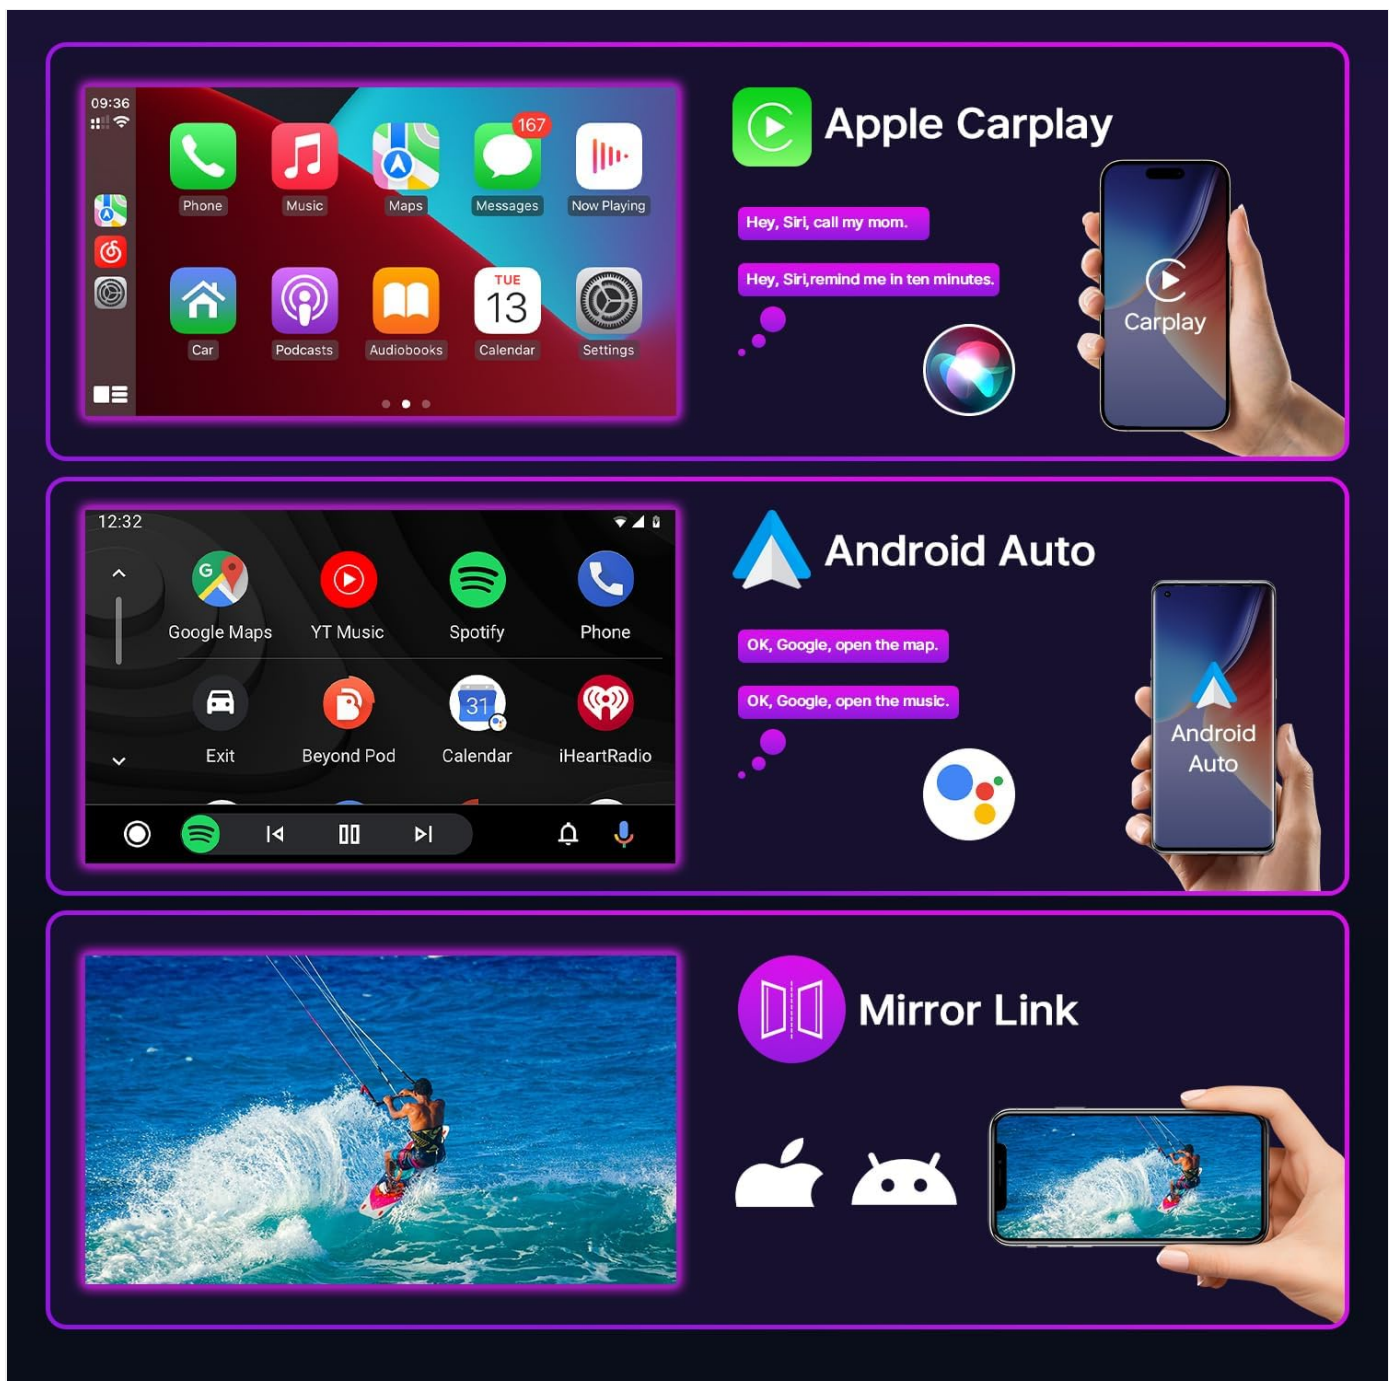

Image 5.1: Apple CarPlay and Android Auto interface examples.

5.3 Mirror Link Function

The Mirror Link feature allows you to display your smartphone's screen directly on the car stereo. iOS devices support wireless connection, while Android devices support both wireless and wired connections.

5.4 GPS Navigation

The stereo includes a built-in GPS navigation system. It supports both offline maps (downloadable) and online maps. For real-time navigation and traffic updates, connect to Wi-Fi or a mobile hotspot.

5.5 Wi-Fi Connectivity

Connect the stereo to a Wi-Fi network or your mobile hotspot to access online features, download applications, and update software. Ensure the Wi-Fi antenna is properly connected for optimal signal strength.

WiFi Connection

Connected to WiFi, you can download or delete software, equivalent to your other phone.

GPS Navigation

Wireless stereo car audio provides offline and online maps, which is very convenient

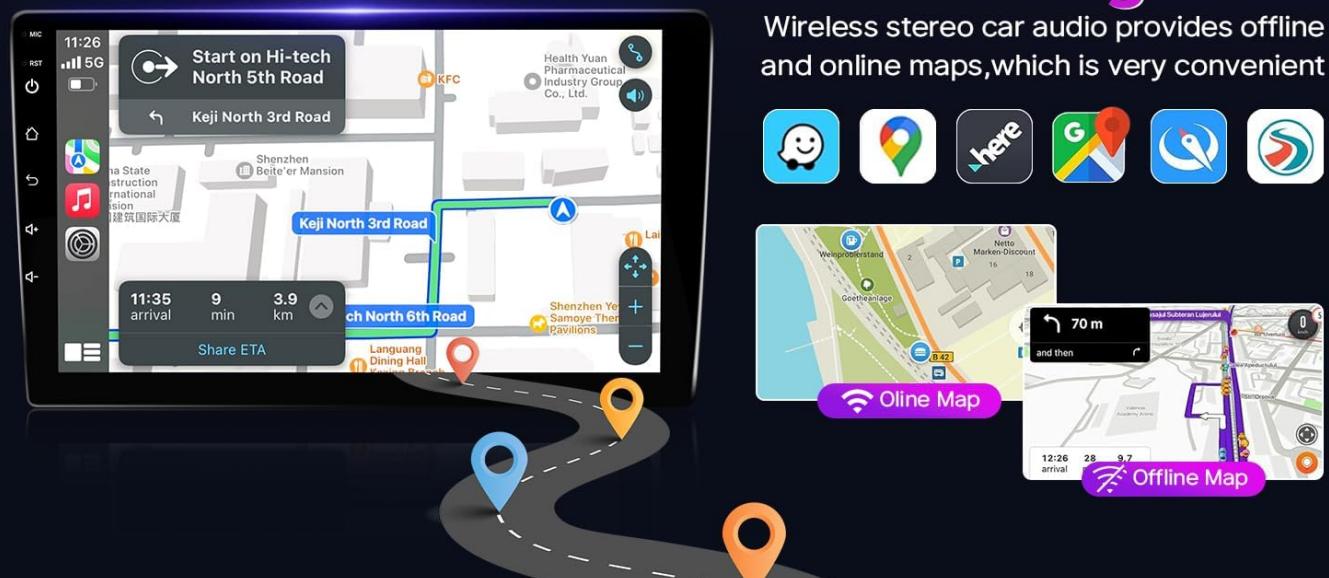

Image 5.2: Wi-Fi connectivity and GPS navigation display.

5.6 Bluetooth 5.1

Pair your phone via Bluetooth 5.1 for hands-free calling, answering calls, and wireless audio streaming. Access your phone's contact list and call history directly from the stereo.

5.7 FM Radio

Tune into your favorite FM radio stations. The stereo supports station scanning and saving presets.

5.8 Steering Wheel Control (SWC)

After correct wiring, the stereo supports learning your vehicle's steering wheel buttons. This allows you to control functions like volume, track changes, and call answering directly from your steering wheel for convenience and safety.

5.9 Backup Camera Display

When the vehicle is shifted into reverse, the stereo automatically displays the feed from the connected backup camera. The

camera features a 170° wide-angle lens, IP68 waterproofing, and night vision for enhanced visibility.

Image 5.3: Bluetooth, FM Radio, SWC, and Backup Camera features.

5.10 EQ Settings

Adjust the audio equalizer (EQ) settings to customize the sound output to your preference. Various presets and manual adjustments are available.

5.11 Split Screen Function

The split screen feature allows two applications to be displayed and operated simultaneously on the 10.1-inch screen. For example, you can use navigation on one side and music playback on the other.

6. MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Cleaning the Screen:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **General Cleaning:** Keep the unit free from dust and debris. Use a soft brush or compressed air to clean vents and button areas.
- **Software Updates:** Periodically check for available software updates via Wi-Fi to ensure the system has the latest features and bug fixes.
- **Avoid Extreme Temperatures:** Do not expose the unit to extreme heat or cold for prolonged periods, as this can affect performance and lifespan.

7. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No Power	Loose power connection, blown fuse, vehicle battery disconnected.	Check power cable connections. Inspect vehicle fuses. Ensure battery is connected.
No Sound	Volume too low, mute activated, incorrect audio source, loose speaker wires.	Increase volume. Check mute status. Select correct audio source. Verify speaker wire connections.
Bluetooth/Wi-Fi Connectivity Issues	Antenna not connected, incorrect pairing, signal interference.	Ensure Wi-Fi/Bluetooth antenna (part of rear camera wire) is connected. Re-pair device. Move away from interference sources.
GPS Not Working / Inaccurate	GPS antenna not properly placed, no satellite signal, offline maps not downloaded.	Ensure GPS antenna has clear sky view. Connect to Wi-Fi for online maps or download offline maps.
Backup Camera Not Displaying	Camera power/video cable loose, reverse trigger wire not connected.	Check all camera connections. Ensure reverse trigger wire is connected to the reverse light positive.
Touchscreen Unresponsive	Temporary software glitch, screen protector interference.	Restart the unit (turn vehicle off and on). Remove any thick screen protectors.

If the problem persists after attempting these solutions, please contact customer support.
