- **Spills:** Immediately wipe up any spills to prevent staining or damage to the engineered wood.
- **Hardware:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten as necessary to maintain stability.
- **Environment:** Avoid placing the desk in direct sunlight or near heat sources, which can cause material degradation or discoloration.

5. TROUBLESHOOTING

5.1 Desk Stability Issues

- **Wobbling:** Ensure all screws are securely tightened. Check that the desk is placed on a level surface. Adjustable feet (if present) can be used to compensate for uneven floors.
- **Uneven Tabletop:** If the tabletop appears uneven after initial assembly, loosen the screws

connecting the tabletop sections, gently adjust and level, then re-tighten.

5.2 Power Outlet/USB Issues

- **No Power:** Ensure the main power cord is securely plugged into a functional wall outlet. Verify the red On/Off switch on the power strip is in the 'On' position.
- **Device Not Charging:** Check the device's charging cable and ensure it is properly connected to both the device and the USB port/AC outlet. Test with another device or cable if possible.

5.3 LED Light Malfunctions

- **Lights Not Turning On:** Ensure the LED strip is properly connected to its power source and controller. Check the remote control battery or app connection.
- **App Connectivity:** If using the app, ensure Bluetooth is enabled on your device and the app is correctly paired with the LED controller. Refer to the separate LED light manual for pairing instructions.
