SETUP AND ASSEMBLY

Your RedLemon bed frame is delivered in two separate packages, which may arrive on different days. Please ensure you have received both packages before beginning assembly. All parts are labeled and numbered for ease of identification. Follow the included instructions carefully.

General Assembly Guidelines:

- **Two-Person Assembly Recommended:** While it is possible for one person to assemble, having two individuals will significantly ease the process, especially when handling larger components like the headboard and frame sections.
- **Tools:** A drill with adjustable torque settings can expedite assembly. Exercise caution to avoid overtightening screws, which can strip the material.
- **Component Identification:** Verify all parts against the provided parts list before starting. Each component is clearly labeled.
- **Location:** Assemble the bed frame in its intended final location, as it is heavy and may be difficult to

move once fully constructed.

Key Structural Features:

- **Robust Construction:** The frame is crafted from high-density engineered wood, reinforced with a metal skeleton and two additional support legs in the center for enhanced stability.
- **Wood Slats:** Features 20 robust hardwood slats with an upgraded locking system, designed to support up to 800 lbs and ensure a noise-free experience. No box spring is required.
