Carbon Fiber Filter and HEPA Filter Replacement Kit

USER MANUAL

Model: 2269

1. Introduction

This user manual provides essential information for the installation, operation, and maintenance of your EtlIN Carbon Fiber Filter and HEPA Filter Replacement Kit. Designed for specific COWAY air purifier models, this kit ensures optimal air quality by effectively capturing dust, allergens, odors, and other airborne particles.

Regular replacement of your air purifier filters is crucial for maintaining the efficiency and longevity of your appliance, as well as ensuring a clean and healthy indoor environment.

2. Package Contents

Please verify that all items listed below are included in your package:

- 1 x Primary Carbon Cotton Filter (Black)
- 1 x HEPA Filter (Black frame with green pleated media)

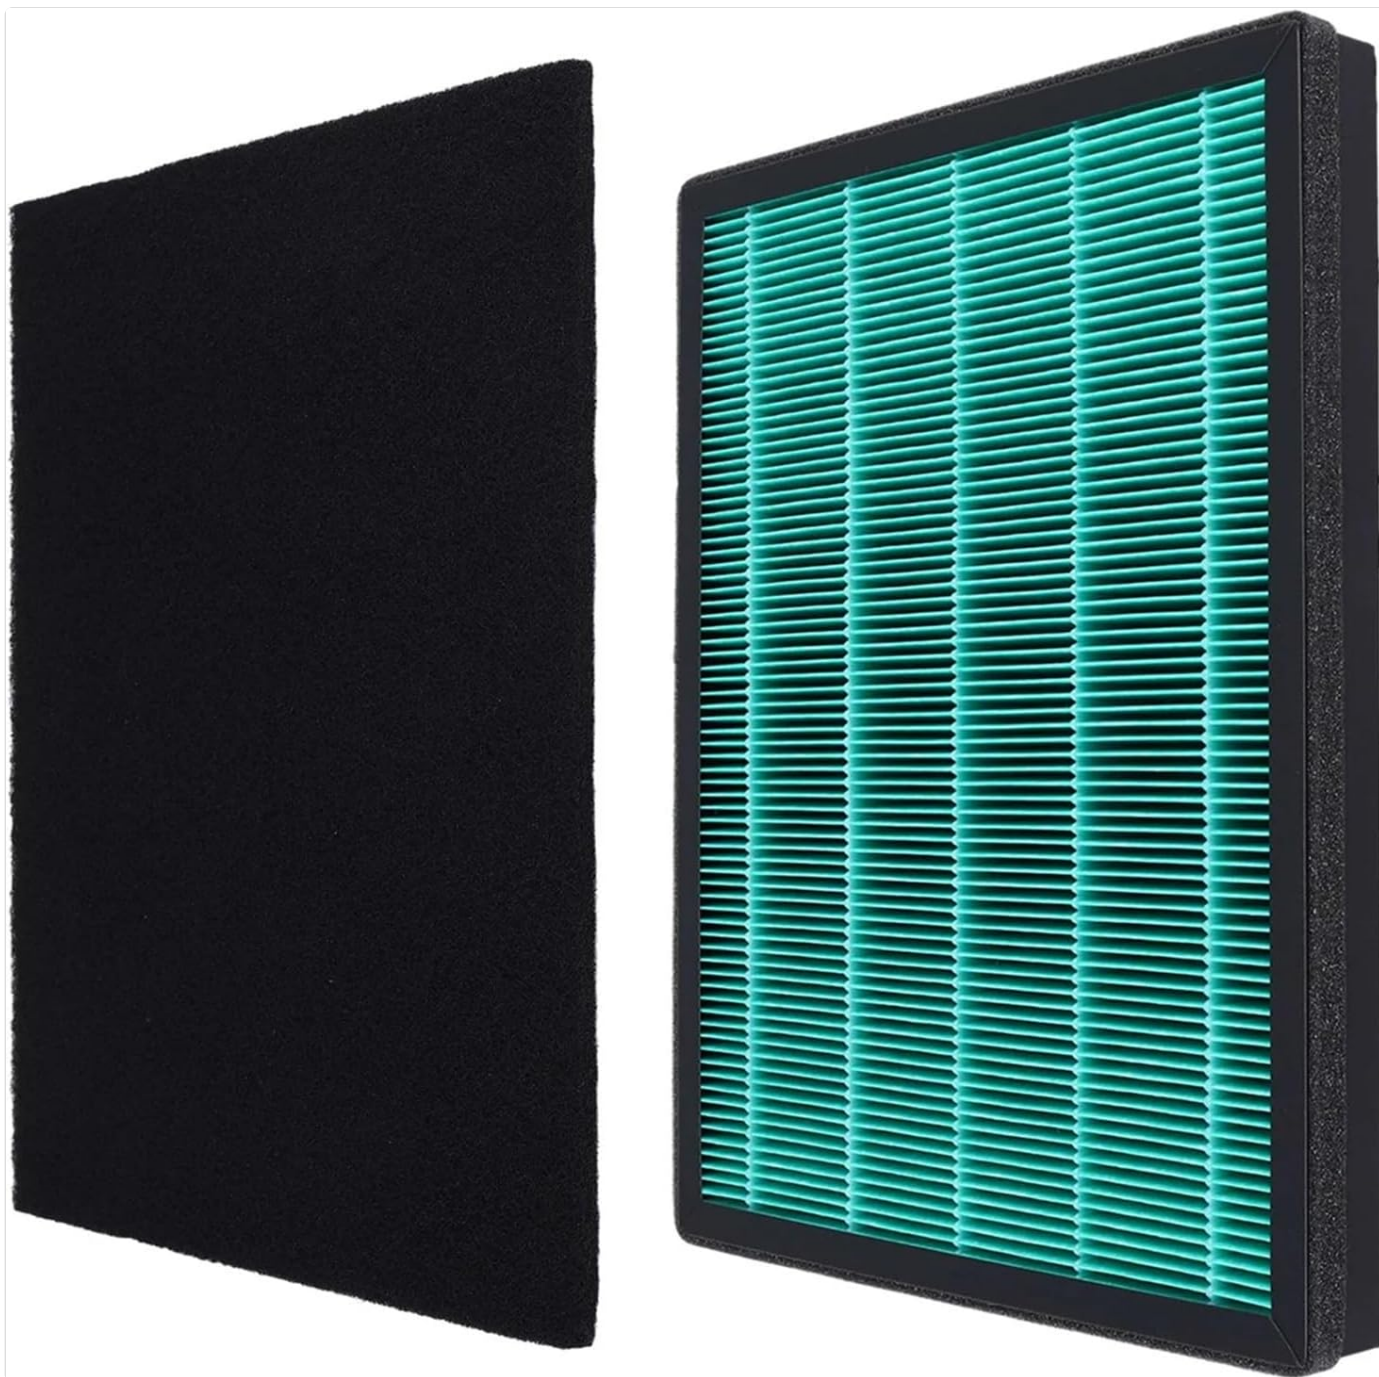

Figure 2.1: The primary carbon filter (left) and the HEPA filter (right) included in the kit.

3. Compatibility

This filter replacement kit is specifically designed for the following COWAY air purifier models:

- COWAY AP-1009CH
- COWAY AP-1008DH
- COWAY AP-1012GH
- COWAY AP-4072DH

Please ensure your air purifier model matches one of the listed models for proper fit and performance.

4. Installation Guide

Follow these steps to replace the filters in your COWAY air purifier:

1. **Power Off and Unplug:** Before beginning, ensure your air purifier is turned off and unplugged from the power outlet. This is a critical safety step.
2. **Access Filter Compartment:** Locate and open the filter compartment cover on your air purifier. Refer to your air purifier's original manual if you are unsure how to access this compartment.
3. **Remove Old Filters:** Carefully remove the old primary carbon filter and HEPA filter from the air purifier. Dispose of them according to local regulations.
4. **Identify Filter Orientation:** Observe the front and back of the HEPA filter. The HEPA filter typically has a distinct pleated side and a less pleated side.

Figure 4.1: Front and back view of the HEPA filter. Ensure correct orientation during installation.

5. **Install HEPA Filter:** Insert the new HEPA filter into the air purifier's filter slot. Ensure it is seated firmly and correctly oriented as per your air purifier's design.
6. **Install Primary Carbon Filter:** Place the primary carbon cotton filter directly on top of the newly installed HEPA filter. These two filters work in conjunction to provide comprehensive air purification.

PURIFY THE AIR

primary carbon cotton .HEPA filter

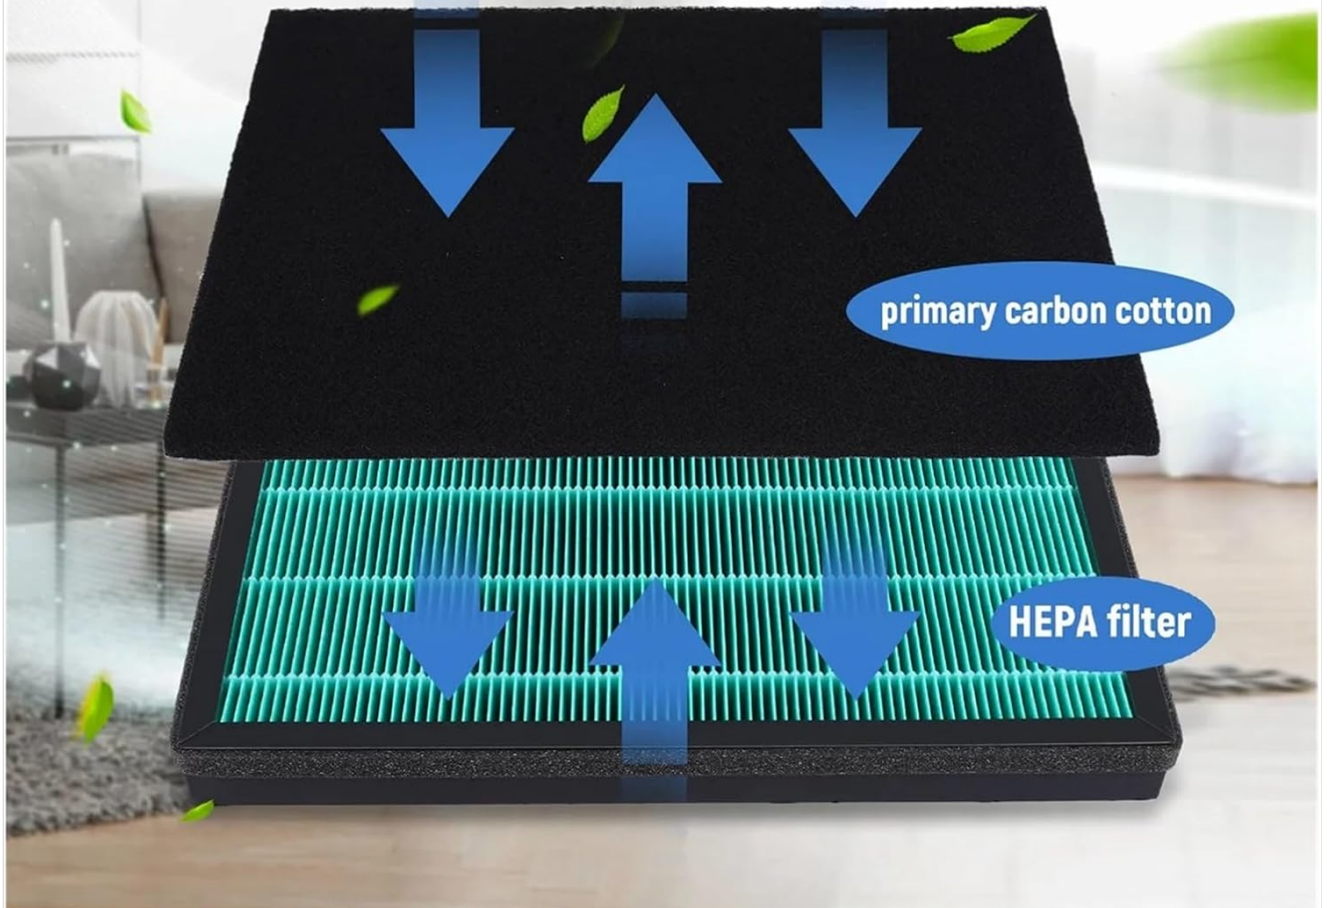

Figure 4.2: Correct layering of the primary carbon filter over the HEPA filter. Air flows through both layers.

7. **Close Compartment:** Securely close the filter compartment cover.
8. **Restore Power:** Plug the air purifier back into the power outlet and turn it on. Some air purifiers may require a filter reset button to be pressed after replacement. Consult your air purifier's manual for specific instructions.

5. Operation and Maintenance

Once installed, the filters will immediately begin purifying the air. For optimal performance and air quality, adhere to the following maintenance guidelines:

- **Filter Lifespan:** The lifespan of the filters depends on usage frequency and air quality in your environment. As a general guideline, it is recommended to replace both the primary carbon filter and the HEPA filter every 6 to 12 months.
- **Indicator Lights:** Pay attention to your air purifier's filter replacement indicator light, if available. This light will signal when it's time to replace the filters.
- **Regular Cleaning:** While the filters themselves are not washable, you can gently vacuum the exterior of the primary carbon filter (if accessible without damaging it) to remove larger dust particles between replacements. Do not wash

the HEPA filter.

- **Air Quality:** If you notice a decrease in air purifier performance, increased odors, or visible dirt on the filters before the recommended replacement interval, consider replacing them sooner.

Figure 5.1: The dual filtration system effectively purifies the air.

6. Troubleshooting

If you encounter issues after replacing your filters, consider the following:

- **Air Purifier Not Turning On:**
 - Ensure the air purifier is securely plugged into a working power outlet.
 - Verify that the filter compartment cover is fully closed and latched. Some models have a safety switch that prevents operation if the cover is not properly secured.
- **Reduced Airflow or Odors Persist:**

- Check that both the HEPA filter and the primary carbon filter are installed correctly and are not obstructed.
- Confirm that the filters are compatible with your specific COWAY air purifier model.
- If the issue persists shortly after replacement, the air quality in your environment might be exceptionally poor, requiring more frequent filter changes.

- **Filter Reset Light Still On:**

- Many air purifiers require a manual reset of the filter indicator light after filter replacement. Refer to your air purifier's original user manual for instructions on how to reset the filter life indicator.

7. Specifications

Attribute	Detail
Brand	EtlIN
Model Number	2269
Compatible Air Purifiers	COWAY AP-1009CH, AP-1008DH, AP-1012GH, AP-4072DH
Filter Type	Primary Carbon Cotton Filter, HEPA Filter
Material	Plastic (frame), Cotton (carbon filter), Synthetic Fibers (HEPA media)
Color	Black (carbon filter), Black/Green (HEPA filter)
Approximate Product Weight	50 grams (total package)
Approximate Package Dimensions (L x W x H)	3 x 2 x 1 cm

8. Warranty and Support

This product is covered by a standard manufacturer's warranty against defects in materials and workmanship. For specific warranty terms and conditions, please refer to the product packaging or contact the seller directly.

If you have any questions, require technical assistance, or need to report a defect, please contact your point of purchase or the manufacturer's customer support. Please have your product model number (2269) and purchase details ready when contacting support.
