## SETUP

1. **Unpack Components:** Carefully remove all track pieces, connectors, launchers, and vehicles from the storage box.
2. **Prepare the Box:** The storage box itself is a key component.
  - The bottom of the box features a built-in 2-to-1 racing lane.
  - The lid of the box can be detached and used as a 4-way crash zone.
3. **Connect Track Pieces:** Use the various track segments and connectors to build your desired layout. Pieces are designed to clip together easily. Experiment with different lengths and curves to create unique tracks.
4. **Integrate Launchers:** Attach the two included launchers to the starting points of your track. Ensure they are securely fastened to provide optimal car propulsion.
5. **Place Vehicles:** Position the Hot Wheels cars at the starting line of your track, ready for action.

## OPERATING INSTRUCTIONS

---

1. **Launching Cars:** Place a Hot Wheels car into the launcher. Press the launcher mechanism firmly to propel the car onto the track.
2. **Racing:** For the 2-to-1 racing lane, place two cars at the starting points and launch them simultaneously to see which car reaches the finish line first.
3. **Stunts and Crashes:** Utilize the 4-way crash zone and other stunt components (like loops or ramps) to create exciting collisions and aerial maneuvers. Experiment with car speed and trajectory for different outcomes.
4. **Expanding the Track:** This set is compatible with other Hot Wheels Track Builder sets (sold separately), allowing for endless expansion and customization of your track world.

## MAINTENANCE

---

- **Cleaning:** To clean the track pieces and components, wipe them with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the plastic.
- **Storage:** When not in use, store all track pieces, connectors, launchers, and vehicles back inside the Deluxe Stunt Box. The box is designed for compact storage and portability. Ensure all pieces are dry before storing.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Track pieces do not connect securely.	Misalignment or debris in connectors.	Ensure connectors are clean and align the pieces correctly before pushing them together firmly.
Cars are not launching with enough speed.	Improper car placement or weak launcher activation.	Ensure the car is fully seated in the launcher. Press the launcher button/lever with sufficient force.
Cars fall off the track frequently.	Loose track connections or unstable track layout.	Check all track connections for tightness. Ensure the track is on a flat, stable surface. Adjust curves or inclines if necessary.
