DAYETTE AP303/304 Smoke Wildfire Filter

DAYETTE AP303/304/305/405 Air Purifier Filter Instruction Manual

Model: AP303/304 Smoke Wildfire Filter

INTRODUCTION

This manual provides essential information for the proper use, installation, and maintenance of your DAYETTE AP303/304/305/405 Replacement H14 HEPA Air Purifier Filter. This filter is specifically designed to enhance air quality by effectively capturing smoke, wildfire particles, and various airborne contaminants.

PRODUCT FEATURES AND SPECIFICATIONS

The DAYETTE H14 HEPA Air Purifier Filter utilizes a comprehensive 4-stage filtration system to ensure superior air purification.

- **Pre-filter Layer:** Captures large particles such as dust, lint, fibers, and pet hair.
- **H14 True HEPA Layer:** Removes 99.997% of airborne particles as small as 0.1 microns, including dust, smoke particles, pollen, and dander.
- **Activated Carbon Layer:** Absorbs smoke, odors, fumes, and volatile organic compounds (VOCs).
- **Net Filter:** Provides an additional layer to catch large particles from the air.

Compatibility

This filter is specifically designed for use with DAYETTE AP303, AP304, AP305, and AP405 Air Purifier models.

Perfect Fit for Best Performance

Compatible With DAYETTE AP303/AP304 Air Purifier

Only use **DAYETTE** replacement filters for best results and product performance.

INSTALLATION AND SETUP

Follow these steps to properly install your new air purifier filter:

1. **Step 1: Turn off and Unplug.** Turn off the air purifier and unplug the power cord from the electrical outlet.
2. **Step 2: Open Cover and Remove Old Filter.** Open the purifier cover by releasing the notches on both sides of the device. Carefully remove the old filter.
3. **Step 3: Install New Filter.** Remove the new filter from its protective plastic bag. Install the new filter into the air purifier. Ensure the side marked "FRONT" on the filter element faces outward, and the active carbon faces inward.
4. **Step 4: Reset Filter Indicator.** Close the purifier cover. Plug the power cord back in. Press and hold the HEPA button on the control panel until you hear beeps to complete the reset of the filter indicator.

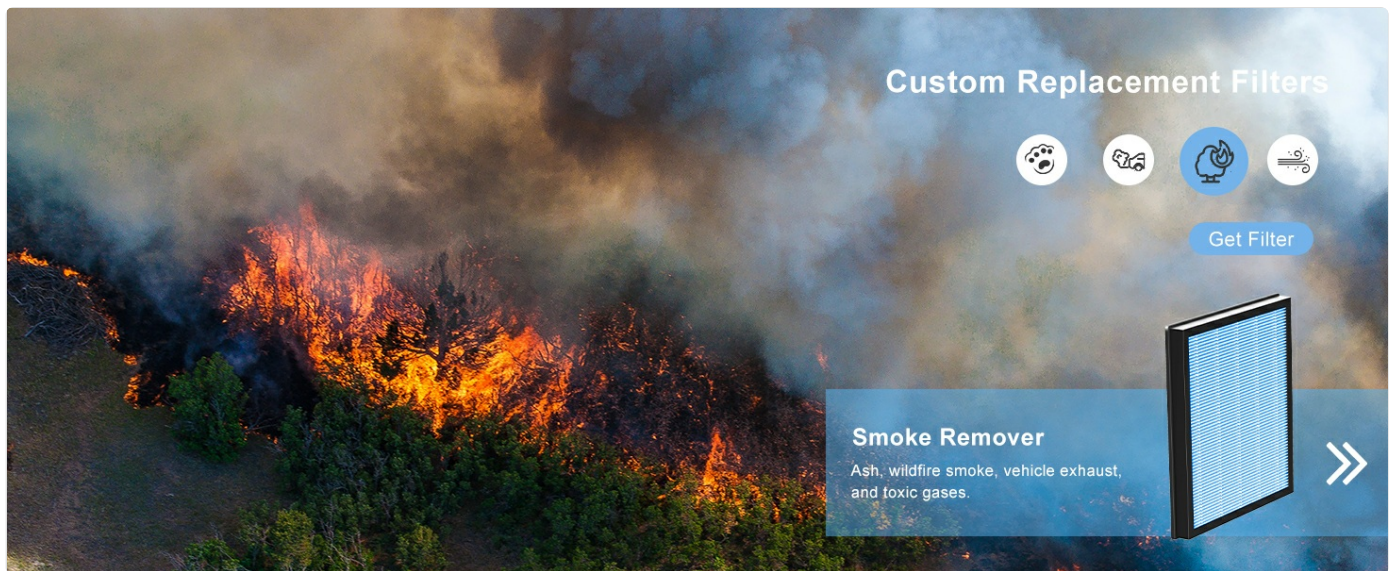

Image: A four-panel visual guide demonstrating the filter replacement process: 1) Unplugging the device, 2) Opening the purifier cover, 3) Installing the new filter, and 4) Resetting the filter indicator.

MAINTENANCE

For optimal performance, it is recommended to replace the air purifier filter every 4-6 months. Filter life may vary depending on air quality and usage frequency.

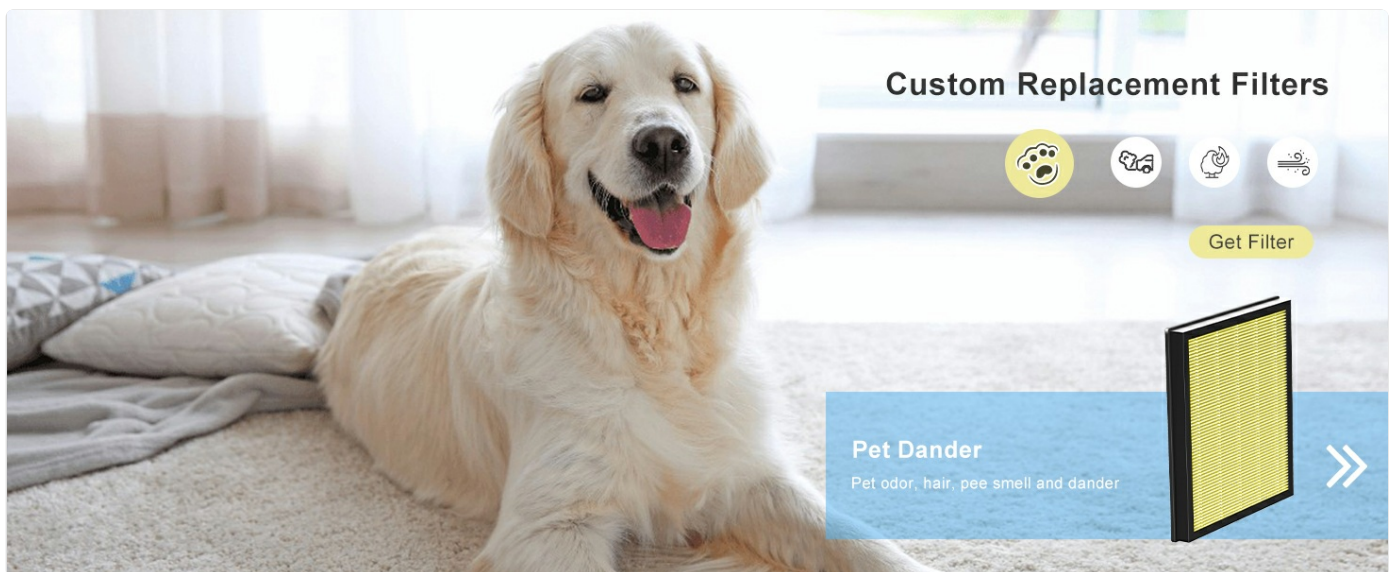

Image: Two air purifier filters shown side-by-side with a text overlay indicating "Replace Every 4-6 Months", emphasizing the recommended replacement schedule.

Cleaning the Filter

The H14 HEPA filter is not washable. Attempting to wash the filter will damage its filtration capabilities. Replace the filter as recommended.

TROUBLESHOOTING

If you encounter issues with your air purifier after filter replacement, consider the following:

- **Filter Indicator Light Remains On:** Ensure the filter is correctly installed and the filter reset procedure (Step 4 in Installation) has been performed correctly. If the light persists, repeat the reset process.
- **Reduced Airflow or Performance:** Check if the protective plastic bag has been fully removed from the new filter. Ensure the filter is seated properly within the air purifier. If the filter is old, it may be clogged and require replacement.

- **Unusual Odors:** A new filter may emit a slight odor initially, which should dissipate quickly. If strong or persistent odors occur, ensure the filter is genuine DAYETTE and installed correctly.

PRODUCT SPECIFICATIONS

Specification	Detail
Product Dimensions	11.5 x 10 x 2 inches
Item Weight	1.8 pounds
Model Number	AP303/304 Smoke Wildfire Filter
Filtration Type	H14 True HEPA with 4-Stage Filtration (Pre-filter, True HEPA, Activated Carbon, Net Filter)
Particle Removal Efficiency	99.997% of particles down to 0.1 microns
Included Components	2*AP303/304 Smoke Wildfire Filter
