8. MAINTENANCE

To ensure the longevity and optimal performance of your charging station:

- Keep the device clean and dry.
- Avoid exposing it to extreme temperatures or direct sunlight.
- Do not attempt to disassemble or repair the device yourself. Contact customer support if issues arise.
- Use only the provided Type-C cable or a certified equivalent.

9. TROUBLESHOOTING

Q: Controller is not charging.

A: Ensure the Type-C cable is securely connected to both the charging station and the power adapter. Verify the power adapter is functioning and providing 5V/1A output. Re-seat the controller on the charging dock to ensure proper contact with the pin connector.

Q: LED indicator is not lighting up.

A: Check the power connection. If the station is powered, the LED should be solid blue when in standby or breathing blue when charging. Try a different power outlet or Type-C cable.

Q: Charging is slow.

A: Ensure your power adapter provides at least 5V/1A output. Lower power adapters may result in slower charging times. Avoid charging in extremely hot environments.
