

Miyavix A3526

Miyavix Screen Protector for PODOFO 6.2-inch Motorcycle Wireless Carplay Monitor A3526

Instruction Manual

1. PRODUCT OVERVIEW

This Miyavix screen protector is specifically designed for the PODOFO 6.2-inch Motorcycle Wireless Carplay Monitor, model A3526. It provides essential protection for your device's screen while enhancing visibility and usability.

Key features include an anti-glare finish to reduce reflections from sunlight and fluorescent lights, a smooth surface that resists fingerprints, and high-definition compatibility to maintain screen clarity. The film is made from high-quality Japanese materials and processed domestically to ensure reliability.

3. INSTALLATION GUIDE

This screen protector is a self-adhesive type, requiring no double-sided tape or additional adhesive for application. Follow these steps for a clean and easy installation:

1. **Clean the Screen:** Use the provided cleaning cloth to thoroughly wipe the PODOFO monitor screen. Ensure there is no dust, dirt, or fingerprints remaining. A dust-free environment is recommended.
2. **Peel Backing:** Carefully peel off a small portion (about 3 cm) of the protective film's backing sheet from one end. Avoid touching the adhesive side.
3. **Align the Film:** Align the exposed adhesive edge of the screen protector with one edge of your monitor screen. Take care to match the cutouts for any sensors or cameras.
4. **Apply Gradually:** Slowly and steadily lower the rest of the film onto the screen, gradually peeling off the remaining backing sheet as you go. Use a soft card (not included) or your finger wrapped in the cleaning cloth to gently push out any air bubbles towards the edges.
5. **Remove Air Bubbles:** If bubbles appear, gently lift the nearest edge of the film and re-apply, pushing the air out. Small bubbles may disappear over 24-48 hours.

4. OPERATING INSTRUCTIONS

Once installed, the screen protector functions seamlessly with your PODOFO A3526 monitor. Its anti-glare properties reduce reflections, making the screen easier to view in various lighting conditions, including direct sunlight or under fluorescent lights. The smooth surface ensures optimal touch sensitivity and allows for comfortable finger gliding, while also minimizing fingerprint smudges.

5. MAINTENANCE

To maintain the clarity and effectiveness of your screen protector:

- Wipe the screen gently with a soft, lint-free cloth (such as the one provided) to remove dust and smudges.
- For stubborn marks, lightly dampen the cloth with water or a screen-safe cleaning solution. Avoid harsh chemicals or abrasive materials.
- Do not apply excessive pressure when cleaning, as this may damage the screen or the film.

6. TROUBLESHOOTING

If you encounter issues during or after installation:

- **Bubbles:** Most small bubbles will dissipate within 24-48 hours. For larger bubbles, gently lift the

nearest edge of the film and re-apply, pushing the air out with a soft card or cloth.

- **Dust Particles:** If dust is trapped under the film, carefully lift the film near the dust particle using a piece of tape. Use another piece of tape to dab and remove the dust from the adhesive side of the film or the screen.
- **Misalignment:** If the film is significantly misaligned, carefully peel it off and re-apply. If the film becomes damaged during re-application, please refer to the warranty information.

7. SPECIFICATIONS

Manufacturer	Miyavix
Brand	Miyavix
Compatible Model	PODOFO 6.2-inch Motorcycle Wireless Carplay Monitor A3526
Product Model Number	OTPDFOA3526/12
Special Features	Low Reflection (High-Definition Compatible), Anti-Fingerprint, Bubble-Free
