6. MAINTENANCE

To ensure the longevity and hygiene of your cat tree:

- **Cleaning:** The manufacturer recommends dry cleaning only for the fabric components. Use a vacuum cleaner with a brush attachment to remove loose fur and debris. For spot cleaning, use a damp cloth with mild soap and allow to air dry completely.
- **Stability Check:** Periodically check all screws and connections for tightness. Re-tighten any loose parts to maintain the tree's stability.
- **Sisal Rope:** Inspect sisal scratching posts for wear and tear. While durable, sisal will fray over time with regular use.

7. TROUBLESHOOTING

- **Tree is wobbly:** Ensure the adjustable tension rod(s) at the top are fully extended and securely tightened against the ceiling. Check all screws for tightness.
- **Missing parts:** If any parts are missing upon unboxing, please contact PEQUITI customer support immediately.
- **Cats not using the tree:** Encourage your cats by placing treats or catnip on different levels. Play with them around the tree to help them explore.
