## 2. Important Safety Information

**WARNING:** Failure to follow these warnings and instructions could result in serious injury or death.

- Do not exceed the weight capacity of **350 lbs** for the bed.
- Always use the stairs to access the bed. Do not jump onto or off the bed.
- Be cautious of sharp edges and potential pinch points during assembly.
- Always follow the assembly instructions carefully to prevent instability or collapse.
- Ensure the bed is securely anchored to the wall using the provided anti-tipping device to prevent wobbling and ensure stability.
- Use a mattress that is **4 to 6 inches thick** to ensure adequate guardrail height for safety.
- Regularly check all bolts and connections to ensure they remain tight.
- Keep children away from the assembly area until the bed is fully assembled.

## 3. Assembly Instructions

Assembly of the Bellemave Twin XL Loft Bed requires careful attention to detail. It is recommended that two adults perform the assembly. An electric screwdriver can significantly assist with tightening bolts.

### 3.1. General Assembly Tips

- Unpack all components and verify against the parts list (not provided in this document, refer to your package insert).

- Lay out all parts on a soft, clean surface to prevent scratches.
- Pay close attention to the illustrations in your detailed assembly guide, noting specific orientations of holes and components to avoid incorrect assembly.
- Do not fully tighten all bolts until the entire structure is assembled and aligned.

### 3.2. Anti-Tipping Device Installation

The loft bed includes an anti-tipping device for enhanced stability. This device should be securely fastened to a wall stud. If baseboards prevent direct wall contact, a wooden spacer may be required between the bed frame and the wall to ensure proper attachment.
