MAINTENANCE

Proper care and maintenance will extend the life of your LAVA ME AIR guitar and ensure it continues to perform at its best.

- **Cleaning:** Use a soft, dry microfiber cloth to wipe down the guitar body, neck, and strings after each use. For stubborn grime, a small amount of guitar-specific cleaner can be applied to the cloth (not directly to the guitar).
- **Storage:** Always store your guitar in its padded gig bag when not in use. This protects it from dust, scratches, and environmental fluctuations. Avoid exposing the guitar to extreme temperatures or humidity, and keep it out of direct sunlight.
- **String Replacement:** Replace strings regularly to maintain optimal tone and playability. The frequency depends on your playing habits. When replacing, ensure proper string winding on the tuning pegs.
- **Truss Rod Adjustment:** The LAVA ME AIR features a built-in truss rod for neck relief adjustments. If you notice changes in string action (too high or too low) or fret buzzing, minor adjustments may be necessary using the provided Allen key. For significant adjustments or if you are unsure, consult a professional guitar technician.
- **Battery Care:** Avoid completely draining the guitar's internal battery for extended periods. Charge the guitar regularly, especially if it will be stored for a long time, to maintain battery health.
