6. MAINTENANCE

- **Cleaning the Bed Frame:** Wipe the bed frame surfaces with a soft, damp cloth. Avoid using abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Fastener Checks:** Periodically (e.g., every 3-6 months) check all screws, bolts, and connections to ensure they are still tight. Re-tighten if necessary to maintain stability and safety.
- **Mattress Care:** The DANAED mattress is reversible (winter and summer side). Rotate and flip the mattress regularly (e.g., every 3 months) to ensure even wear and prolong its lifespan. Follow any specific care instructions provided with the mattress.
- **Drawer Maintenance:** If drawers become stiff, clean the runners and apply a small amount of silicone spray or wax to ensure smooth operation.

7. TROUBLESHOOTING

- **Bed feels wobbly:** Check all assembly fasteners and tighten any that are loose. Ensure the bed is placed on a level surface.
- **Drawers are difficult to open/close:** Inspect the drawer runners for obstructions or damage. Clean the runners and apply a lubricant if needed. Ensure the drawer is correctly aligned in its track.
- **Squeaking noises:** Identify the source of the squeak. Often, it's a loose joint. Tighten the corresponding fasteners. Applying a small amount of wax or silicone spray to joints can also help.
- **Missing parts during assembly:** Carefully re-check all packaging. If parts are genuinely missing, contact Vente-unique customer support with your purchase details.
