4. Maintenance and Care

Proper care will help maintain the quality and extend the life of your Beautyrest Black mattress.

General Care Instructions:

- **Mattress Protector:** Always use a mattress protector to shield against stains and spills. This is crucial for the overall health and lifespan of your mattress.
- **Avoid Liquids:** Do not apply liquids directly to the mattress. Liquids can stain the fabric, worsen soiled areas, and cause premature breakdown of the foam, damaging the product.
- **Cleaning Spills:** For soiled areas, apply baking soda, let it stand for approximately 15 minutes, then vacuum. Repeat as necessary.
- **Air Circulation:** Air out the mattress as much as possible to maintain freshness.

- **Do Not Bend:** Avoid bending or folding the mattress, as this can damage the internal components.

5. Troubleshooting

This section addresses common concerns you might encounter with your new mattress.

Common Issues and Solutions:

- **New Mattress Odor:** A new mattress may have a slight odor upon unboxing. This is normal and will dissipate over a few days. Ensure good ventilation in the room.
- **Initial Discomfort:** It can take several weeks for your body to adjust to a new mattress. Continue to use it regularly to allow for this adjustment period.
- **Body Impressions:** Minor body impressions (less than 1.5 inches) are normal and indicate the mattress conforming to your body. Regular rotation can help minimize this.
- **Noise:** If you notice unusual noises, check that the mattress is properly seated on a stable foundation and bed frame. Ensure all frame components are tightened.
