4. MAINTENANCE AND CARE

Proper care extends the life of your mattress and maintains its performance.

General Care Instructions:

- **Mattress Protector:** It is highly recommended to use a mattress protector to shield against stains and spills, contributing to the mattress's overall health and lifespan.
- **Avoid Liquids:** Do not apply liquids directly to the mattress. Liquids can stain the fabric and worsen soiled areas. Moisture or chemicals can cause premature breakdown of the foam and damage the product.
- **Spot Cleaning:** For soiled areas, apply baking soda, let it stand for approximately 15 minutes, then vacuum. Repeat as needed.
- **Ventilation:** Air out the mattress as much as possible to maintain freshness.
- **Rotation:** Periodically rotate your mattress (head to foot) to promote even wear and extend its life. Do not flip the mattress.
