Roasting:

This roaster oven is ideal for roasting large items like turkeys (up to 28 lbs) or other meats.

1. Place the roasting rack inside the removable pan.
2. Prepare your food (e.g., turkey) and place it on the roasting rack.
3. Cover the roaster oven with the self-basting lid. The lid captures steam and circulates it back onto the food, ensuring moisture and enhancing flavor without frequent basting.
4. Set the temperature control knob to your desired roasting temperature (e.g., 325°F to 450°F).
5. Allow the roaster to preheat. The indicator light will turn off when the desired temperature is reached.
6. Cook until the food reaches the appropriate internal temperature.

Defrost Function:

The defrost setting allows for quick thawing of frozen foods, such as a turkey, before cooking. Set the knob to 'DEFROST' (approximately 275°F) to begin the thawing process.

Keep Warm Function:

The 'KEEP WARM' setting (approximately 150°F) maintains the perfect serving temperature for your cooked food, allowing you to prepare meals in advance without worrying about them cooling down.
