7. TROUBLESHOOTING

7.1. Doors Not Aligning

If the cabinet doors appear misaligned or have gaps, adjust the hinges. The hinges are fully adjustable. Refer to the assembly instructions for detailed guidance on how to loosen or tighten the tension screws to achieve proper alignment.

7.2. Drawer Sticking

Ensure the drawer slides are clean and free of debris. Check that the drawer is assembled correctly and that all screws on the slides are tightened. If the issue persists, re-check the assembly of the drawer and its runners.

7.3. Cabinet Instability

Verify that the cabinet is placed on a flat, level surface. Ensure all assembly screws are securely tightened. Confirm that the anti-tipping device is correctly installed and anchored to the wall. If the cabinet still feels unstable, re-check all assembly steps.
