4. Operating Instructions (How to Play)

The objective of Sudoku Square is to fill all empty spaces on your game board with the colored puzzle shapes, ensuring no blank spaces remain and all your pieces are used. There are 248,832 unique puzzles, each with at least one solution.

1. **Solo Play:** Challenge yourself against the clock. After setting up the board with stoppers, arrange your colored puzzle shapes to completely fill the grid. Try to beat your best time!
2. **Two-Player Race:** Each player sets up their own board with stoppers based on the same dice roll. On the

count of three, both players race to be the first to completely fill their grid with the colored puzzle shapes. The first player to successfully fill their board wins!

3. **Solving the Puzzle:** Strategically place the various colored shapes onto the grid. Shapes can be rotated to fit, but they cannot overlap or extend beyond the grid boundaries. The stoppers cannot be moved once placed.
