

GKU D600Pro

GKU D600Pro Dash Cam User Manual

Front and Rear 4K+1080P Dash Camera with WiFi & GPS

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your GKU D600Pro Dash Cam. Please read this manual thoroughly before using the device to ensure proper functionality and safety. The GKU D600Pro is designed to capture high-quality video footage of your journeys, offering enhanced security and peace of mind.

Key features include 4K front recording, 1080P rear recording, built-in GPS for tracking, 5.8GHz WiFi for fast data transfer, 24-hour parking monitoring, Super Night Vision, and G-sensor collision detection.

PACKAGE CONTENTS

Verify that all items listed below are included in your package:

- 1 x 4K Front Dash Cam
- 1 x 1080P Rear Dash Cam
- 1 x Car Charger (10ft USB-C Cigar Power Cable)
- 1 x 64GB SD Card
- 1 x User Manual
- 1 x Crowbar (for cable tucking)
- 2 x 3M Adhesive Tape
- 2 x Electrostatic Stickers
- 1 x Screwdriver
- 5 x Cable Clips

SETUP AND INSTALLATION

Follow these steps for proper installation of your GKU D600Pro Dash Cam:

1. **Prepare the Windshield:** Clean the area on your windshield where you intend to mount the front dash cam. Ensure it is free of dust and grease for optimal adhesive performance.
2. **Apply Electrostatic Sticker:** Place one of the electrostatic stickers on the cleaned area of the windshield. This helps in easy removal of the dash cam without leaving residue.
3. **Mount the Front Dash Cam:** Attach the 3M adhesive tape to the dash cam's bracket. Firmly press the dash cam onto the electrostatic sticker on the windshield, ensuring the lens has a clear view of the road. The 120° adjustable bracket allows for optimal angle adjustment.

4. **Insert SD Card:** The 64GB SD card is pre-inserted. If replacing or inserting a new card (supports up to 256GB),

ensure it is formatted before first use. The SD card slot is located on the side of the main unit.

5. **Connect Power:** Connect the USB-C end of the car charger cable to the dash cam. Route the cable neatly along the windshield edge and down to your vehicle's 12V cigarette lighter socket. Use the provided crowbar and cable clips to tuck the cable for a clean installation.

Image: Diagram illustrating the easy installation process of the GKU D600Pro dash cam, showing cable routing and connections.

6. **Install Rear Dash Cam:** Mount the rear dash cam on your rear windshield using the provided 3M adhesive tape. Connect the rear camera cable to the AV-IN port on the main front dash cam unit. Route the cable from the rear camera to the front unit, tucking it along the vehicle's interior trim.
7. **Power On:** Plug the car charger into the 12V cigarette lighter socket. The dash cam will automatically power on and

begin recording when your vehicle starts.

OPERATING INSTRUCTIONS

Basic Operation

- **Automatic Recording:** The dash cam automatically starts recording when powered on and stops when the power is cut off.
- **Loop Recording:** Newly recorded videos will automatically overwrite the oldest unlocked videos when the SD card is full. This ensures continuous recording.
- **Emergency Lock (G-Sensor):** In the event of a sudden collision or impact, the built-in G-sensor will automatically detect the event and lock the current video file, preventing it from being overwritten by loop recording.
- **Manual Lock:** Press the emergency lock button on the dash cam to manually lock the current recording.

App Control (GКУ GO App)

The GКУ D600Pro features 5.8GHz WiFi for faster data transfer and app control. Download the "GКУ GO" app from the Apple App Store or Google Play Store.

1. **Connect to WiFi:** Turn on the dash cam's WiFi via its settings. On your smartphone, connect to the dash cam's WiFi network (SSID and password can be found in the dash cam's settings or user manual).
2. **Live View:** Open the GКУ GO app to view a live feed from the front and rear cameras.
3. **Video Playback & Download:** Browse recorded videos, play them back, and download important footage directly to your smartphone.
4. **Settings Adjustment:** Adjust various dash cam settings, including resolution, parking mode, G-sensor sensitivity, and more, directly from the app.

Built-in 5GHz WiFi & GPS

Experience quicker previews, video editing, downloads, and easy social media sharing with the App.

Parking Monitoring

The D600Pro offers two 24/48/72H parking modes. A hardwire kit (not included) is required to enable continuous parking monitoring.

- **Collision Detection Mode:** Automatically records a 30-second emergency video upon detecting a collision while parked.

- **Time-Lapse Recording Mode:** Records at a low frame rate (1/2/5 frames per second) after the engine is off, conserving power and allowing for condensed playback of long parking periods.

Super Night Vision

Capture clear details even at night or in low-light

F1.8 Aperture

WDR

6 Glass Lens

GPS Functionality

The built-in GPS records driving speed (km/h or mph), route, and real-time latitude and longitude. GPS logs can be viewed on the app or played back on your PC using the provided activation code for the PC player.

MAINTENANCE

- **SD Card Formatting:** Regularly format the SD card (at least once a month) to ensure optimal performance and prevent data corruption. This can be done via the dash cam's settings or the GKU GO app.
- **Lens Cleaning:** Keep the camera lenses clean using a soft, lint-free cloth. Avoid abrasive materials that could scratch the lens.
- **Firmware Updates:** Check the GKU official website or the GKU GO app for available firmware updates. Keeping your firmware updated ensures the best performance and access to new features.
- **Temperature Considerations:** The D600Pro is designed to withstand extreme temperatures (-4°F to 158°F). However, prolonged exposure to direct sunlight in extremely hot conditions may affect device longevity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Dash cam does not power on.	No power supply; faulty car charger; loose connection.	Check car charger connection; ensure vehicle's 12V socket is working; try a different power source.
Video footage is blurry or unclear.	Protective film on lens; dirty lens; incorrect focus.	Remove protective film; clean lenses with a soft cloth; ensure proper mounting angle.
SD card error message.	SD card not formatted; incompatible SD card; faulty SD card.	Format the SD card in the dash cam; use a high-speed (Class 10 or U3) micro SD card; try a different SD card.
WiFi connection issues.	Incorrect password; too far from device; app issues.	Verify WiFi password; ensure close proximity to dash cam; restart app and dash cam.
Parking mode not working.	Hardwire kit not installed; parking mode not enabled in settings.	Install a hardwire kit (sold separately); enable parking mode in dash cam settings.

SPECIFICATIONS

Feature	Detail
Front Camera Resolution	4K (3840*2160P)
Dual Camera Resolution	4K/30FPS (Front) + 1080P/30FPS (Rear)
