## PartCatalog PC-3013358

# PartCatalog Rear Fog Light Bulb for Saturn SL2 (1991-2002) - Installation Guide

Model: PC-3013358

## INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of the PartCatalog OE replacement rear fog light bulb, compatible with Saturn SL2 models from 1991 to 2002. This bulb is designed to meet or exceed original equipment specifications, ensuring reliable performance and a direct fit for your vehicle.

## Fitment Chart

Please check that your vehicle is included in this fitment chart.  
If your vehicle is not listed in this chart, *this part will not fit.*

| Years     | Make   | Model | Notes   |
|-----------|--------|-------|---|
| 1991-2002 | Saturn | SL2   | Compatible with multiple vehicle models for dome light bulb installation. |

## PRODUCT COMPATIBILITY

This PartCatalog rear fog light bulb (Model: PC-3013358) is specifically designed as an Original Equipment (OE) replacement for the following vehicle:

- **Make:** Saturn
- **Model:** SL2
- **Years:** 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002

Please refer to the fitment chart below to confirm compatibility with your specific vehicle model and year. If your vehicle is not listed, this part may not fit.

## PRODUCT FEATURES

- **OE Replacement:** Engineered to match the fit, form, and function of the original factory part.
- **High Quality:** Manufactured to meet or exceed original equipment performance and quality standards.
- **Direct Fit:** Designed for straightforward installation without modifications.
- **Reliable Performance:** Ensures consistent and effective illumination for rear fog light functionality.

## INSTALLATION INSTRUCTIONS

**Safety Precaution:** Before beginning any automotive repair, ensure the vehicle is turned off, the parking brake is engaged, and the battery is disconnected to prevent accidental electrical shorts or injury. Allow any hot components to cool down before handling.

### Tools Required:

- Screwdriver (Phillips or flathead, depending on vehicle trim)
- Gloves (optional, to avoid transferring oils to the bulb)

### Step-by-Step Guide:

1. **Locate the Rear Fog Light Assembly:** Identify the rear fog light housing on your Saturn SL2. This is typically located in the rear bumper or taillight assembly. Consult your vehicle's owner's manual for the exact location if needed.
2. **Access the Bulb:** Depending on your vehicle's design, you may need to remove a portion of the taillight assembly, a trim panel, or access the bulb from underneath the vehicle. Use a screwdriver if necessary to remove any retaining screws or clips.
3. **Remove the Old Bulb:** Once the bulb socket is accessible, twist the socket counter-clockwise to unlock it from the housing. Gently pull the socket out. The old bulb can then be pulled straight out from the socket or twisted counter-clockwise, depending on its base type.
4. **Inspect the Socket:** Check the bulb socket for any signs of corrosion or damage. Clean if necessary.
5. **Install the New Bulb:** Carefully insert the new PartCatalog rear fog light bulb into the socket. Avoid touching the glass portion of the bulb with bare hands, as oils can reduce bulb life. If you accidentally touch it, wipe it clean with a lint-free cloth and rubbing alcohol. Ensure the bulb is seated firmly.
6. **Reinstall the Socket:** Insert the bulb socket back into the light housing and twist it clockwise to lock it into place.
7. **Reassemble:** Reattach any panels or taillight assemblies that were removed during the process. Ensure all screws and clips are securely fastened.
8. **Test the Light:** Reconnect the vehicle's battery. Turn on your vehicle's ignition and activate the rear fog lights to ensure the new bulb is functioning correctly.

## **OPERATION**

The PartCatalog rear fog light bulb functions as a direct replacement for your vehicle's original rear fog light. Once installed, it will operate in conjunction with your vehicle's existing lighting system. Activate your vehicle's rear fog lights via the designated switch on your dashboard or steering column, as per your Saturn SL2's owner's manual. The bulb provides enhanced visibility for vehicles behind you in conditions of reduced visibility, such as fog, heavy rain, or snow.

## MAINTENANCE

This rear fog light bulb is designed for long-lasting performance and typically requires no routine maintenance. However, periodic checks are recommended:

- **Visual Inspection:** Periodically check the rear fog lights to ensure both are illuminating correctly.
- **Cleanliness:** Keep the exterior lens of the fog light assembly clean from dirt, mud, or snow to ensure maximum light output.
- **Replacement:** If the bulb dims significantly or stops working, replace it with another PartCatalog OE replacement bulb (Model: PC-3013358) following the installation instructions.

## TROUBLESHOOTING

| Problem                                    | Possible Cause  | Solution   |
|--|---|--|
| Bulb does not light up after installation. | <ul style="list-style-type: none"><li>◦ Bulb not seated correctly in socket.</li><li>◦ Faulty bulb.</li><li>◦ Corroded socket or wiring.</li><li>◦ Blown fuse for the fog light circuit.</li><li>◦ Faulty fog light switch.</li></ul> | <ul style="list-style-type: none"><li>◦ Remove and re-seat the bulb firmly.</li><li>◦ Test the bulb with a multimeter or try a known working bulb.</li><li>◦ Clean the socket contacts or inspect wiring for damage.</li><li>◦ Check and replace the appropriate fuse in your vehicle's fuse box.</li><li>◦ Consult a qualified mechanic for switch diagnosis and replacement.</li></ul> |
| Bulb flickers or is dim.                   | <ul style="list-style-type: none"><li>◦ Loose connection in the socket.</li><li>◦ Corrosion in the socket.</li><li>◦ Aging bulb (though new).</li></ul>   | <ul style="list-style-type: none"><li>◦ Ensure the bulb is securely seated.</li><li>◦ Clean the socket contacts.</li><li>◦ Replace the bulb if it's new and still flickering/dim.</li></ul>  |
