YOLEO 72x36 LED Bathroom Mirror User Manual

Model: 72x36 LED Bathroom Mirror | Brand: YOLEO

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your YOLEO 72x36 LED Bathroom Mirror. Please read this manual thoroughly before installation and use to ensure proper function and safety. Keep this manual for future reference.

SAFETY INFORMATION

WARNING: To reduce the risk of electric shock, fire, or injury, always follow these basic safety precautions.

- Handle with care to avoid breakage.
- Always use appropriate safety measures when installing, including eye protection and gloves.
- Keep electrical cords out of reach of children and pets.
- Do not use near water or in excessively damp environments to prevent electrical shock.
- Ensure the power supply is disconnected before any installation, maintenance, or cleaning.
- Professional installation is recommended for hardwired connections.

PRODUCT FEATURES

Dual Light Sources for Maximum Brightness

The mirror features both front and back lighting, providing bright, shadow-free illumination suitable for various tasks like makeup application, shaving, and skincare. Both light sources can be controlled independently.

Adjustable Brightness and 3 Color Temperatures

Both front and back lighting are dimmable. Adjust the brightness by a long press on the touch switch. Choose from three color temperatures: 3000K (warm light), 4000K (natural light), and 6000K (white light) to suit your preference and needs.

Smart Defogging with Memory Function

The quick-start defog feature keeps the mirror clear after a shower. The defog function automatically shuts off after one hour to save energy. The memory function recalls your last lighting settings for convenience.

Eco-Friendly and Clearer Reflection

Constructed from 4MM copper-free, eco-friendly glass, this lighted vanity mirror is more environmentally friendly and corrosion-resistant. It provides a brighter, clearer reflection and resists stains better than traditional tempered glass.

Flexible Power Options

The mirror offers both plug-in and hardwired power options. It includes a separate switch for quick shutdown. For hardwiring, professional installation is recommended.

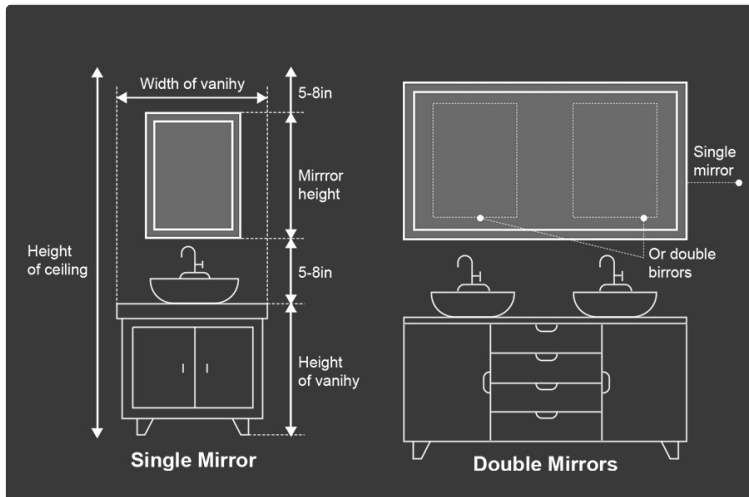

Ensuring safe use

The plugs and power drivers have got UL certification.

Durable and Easy Installation

The mirror has undergone rigorous testing, including drop, impact, and heavy pressure tests, to minimize transport damage. It includes screws and hooks for easy mounting, allowing for vertical or horizontal orientation.

Mirror Size Selection Guide:

Width:

Choose a mirror that is narrower or the same width as your vanity.

Height:

Ensure the mirror leaves 5-8 inches of clearance above the vanity and below the ceiling.

Placement:

For double vanities, we recommend a single large mirror for a luxurious and elegant look, or consider two smaller mirrors for a practical and cost-effective choice.

These recommendations aim to help you create a balanced and refined bathroom aesthetic.

INSTALLATION GUIDE

Before beginning installation, ensure all necessary tools are available and the power supply to the installation area is turned off. The mirror can be mounted vertically or horizontally.

Wall Mounting Steps:

1. **Prepare the Wall:** Pick the proper wall location. Use a level ruler, the wall-hanging bar, and a pencil to mark the drilling holes accurately.
2. **Drill Holes:** Drill holes at the marked positions on the wall.
3. **Insert Anchors:** Use a hammer to drive the expansion anchors through the holes in the bar, then into the holes on the wall.
4. **Secure the Bar:** Screw the screws into the expansion anchors to firmly secure the wall-hanging bar.
5. **Hang the Mirror:** Carefully hang the mirror onto the secured bars and adjust its position as needed.
6. **Connect Power:** Choose between plug-in or hardwired connection. For hardwiring, ensure a qualified electrician performs the connection.

Easy to install

- 1 Mount the holder onto the wall.
- 2 Hang the mirror using the bracket.
- 3 Power it via Plug or Hardwire.

OPERATION INSTRUCTIONS

The YOLEO LED Bathroom Mirror is equipped with touch-sensitive controls integrated into the mirror surface.

- **Power On/Off:** Tap the power icon to turn the mirror lights on or off.
- **Adjust Brightness:** With the lights on, long-press the brightness icon to cycle through dimming levels (10% to 100%). Release when the desired brightness is reached.
- **Change Color Temperature:** Tap the color temperature icon to switch between 3000K (warm), 4000K (natural), and 6000K (white) light.
- **Activate Defogger:** Tap the defogger icon to activate the anti-fog function. The defogger will automatically turn off after one hour.

- **Memory Function:** The mirror will remember your last brightness and color temperature settings when turned off and on again.

MAINTENANCE

To ensure the longevity and optimal performance of your YOLEO LED Bathroom Mirror, follow these maintenance guidelines:

- **Cleaning:** Use a soft, damp cloth and a mild, non-abrasive glass cleaner to clean the mirror surface. Avoid harsh chemicals or abrasive materials that could damage the mirror or its coating.
- **Frame Care:** Wipe the frame with a soft, dry cloth. Do not use liquid cleaners directly on the frame.
- **Electrical Components:** Ensure the mirror is unplugged or the power is off before cleaning any electrical components. Do not spray water directly onto the mirror's electrical parts.
- **Inspection:** Periodically check for any loose connections or damage to the wiring. If any damage is found, discontinue use and contact a qualified electrician or the manufacturer.

TROUBLESHOOTING

If you encounter issues with your YOLEO LED Bathroom Mirror, refer to the following common problems and solutions:

- **Lights Not Turning On:**
 - Check if the mirror is properly plugged into a working outlet or if the hardwired connection is secure.
 - Ensure the wall switch (if applicable) is in the 'ON' position.
 - Verify that the power supply to the circuit is active (check circuit breaker).
- **Defogger Not Working:**
 - Ensure the defogger function is activated by tapping its touch icon.
 - Allow a few minutes for the defogger to heat up and clear the mirror surface.
- **Lights Flickering or Dim:**
 - Check for stable power supply.
 - Ensure the brightness setting is not at its lowest level. Adjust using the touch control.
- **Touch Controls Unresponsive:**
 - Ensure the mirror surface is clean and dry, as moisture or dirt can interfere with touch sensitivity.
 - Try turning the mirror off and on again using the main power switch or by unplugging it for a few seconds.

If these steps do not resolve the issue, please contact YOLEO customer support for further assistance.
