SETUP AND INSTALLATION

The car seat covers are designed for easy installation without the need to remove the original seats. Follow these steps for a smooth setup:

1. **Unpack Carefully:** When opening the package, avoid using sharp tools that could damage the seat covers.
2. **Identify Components:** Separate the front seat covers from the rear seat covers (if applicable for full set). A full set includes 2 front seat covers and 3 rear seat covers.
3. **Front Seat Installation:**
 - Align the front seat cover with the corresponding seat.
 - Gently slide the cover over the seat, ensuring it wraps around the entire backrest and cushion.
 - Secure any elastic bands or hooks under the seat for a snug fit.
4. **Rear Seat Installation (for Full Set):**
 - For the rear bench, position the cover and smooth it out.

- Secure the cover using the provided fasteners, ensuring full coverage and a tight fit.

5. **Adjust and Smooth:** Once installed, adjust the covers to remove any wrinkles and ensure a perfect fit. The split design allows for adjustment to fit various car seat sizes.

Important Note:

These seat covers feature a full cover design. If your original seat backrest has an integrated screen, the seat cover may affect its use. Please confirm your seat configuration before purchase.

OPERATING CONSIDERATIONS

While car seat covers do not have operational functions in the traditional sense, consider the following for optimal use:

- **Seat Belt Buckle Access:** Ensure that all seat belt buckles remain easily accessible and unobstructed after installation.
- **Heating and Ventilation:** These covers are compatible with seat heating and ventilation functions. Ensure proper airflow and heat transfer by smoothing out the covers.
- **Airbag Safety:** The split design ensures compatibility with airbags. Do not modify the covers in a way that could obstruct airbag deployment.

MAINTENANCE AND CARE

To ensure the longevity and appearance of your car seat covers, follow these simple maintenance guidelines:

- **Regular Cleaning:** For general cleaning, simply wipe the leather surface with a damp cloth.
- **Stain Removal:** For tougher stains, use a mild automotive leather cleaner applied to a soft cloth. Avoid harsh chemicals or abrasive cleaners.
- **Drying:** Allow the covers to air dry completely after cleaning. Do not use direct heat sources.
- **Avoid Sharp Objects:** Prevent contact with sharp objects that could puncture or scratch the leather surface.

TROUBLESHOOTING

If you encounter any issues during installation or use, please refer to the following common solutions:

- **Difficulty Installing:** Ensure the covers are correctly oriented for the specific seat (front/rear, left/right). Double-check that all elastic bands and hooks are properly secured.
- **Wrinkles or Loose Fit:** Adjust the cover by pulling and smoothing it firmly. The elastic nature of the material should allow for a snug fit.
- **Screen Obstruction:** As noted in the installation section, if your original seat backrest has an integrated screen, the full cover design may obstruct it. This is a design characteristic and not a defect.
- **Damage During Unpacking:** If the product was damaged by sharp tools during unpacking, this is not covered under typical product issues. Always exercise caution when opening packages.

If your issue is not resolved, please contact customer support for assistance.
