SETUP

1. Install Backup Batteries (Optional but Recommended)

While the clock is not battery-operated for its main function, installing 2 AAA batteries (not included) will preserve your time and settings during a power outage. Locate the battery compartment on the back of the clock, insert the

batteries according to the polarity markings, and close the compartment.

2. Connect Power

Connect the provided USB charging cable to the clock's charging port and then plug the 5V/2A power adapter into a standard electrical outlet. The clock display will illuminate.

Image: Visual guide for initial setup steps.

3. Mounting the Clock

The clock can be wall-mounted using the two mounting holes on the back. Use the included nails and ruler to mark and secure the clock to your desired location. Ensure the clock is securely fastened before releasing it.

OPERATING INSTRUCTIONS

Clock Overview

Image: Front display features and their labels.

Image: Back panel features and their labels.

1. Setting Time and Date

1. Press the **SET** button on the remote control or the back of the clock to enter time setting mode.
2. Use the **+** and **-** buttons to adjust the hour, then press **SET** to confirm and move to minutes.
3. Repeat for minutes, year, month, and day.
4. Press **SET** again to exit setting mode.

2. 12/24 Hour Format Switching

Short press the **SET** button, then use the + or - button to toggle between 12-hour (with AM/PM indicator) and 24-hour formats.

3. Alarm Clock Settings

The clock supports two independent alarms.

1. Press the **ALARM 1/2 Setting** button on the back or the corresponding alarm button on the remote.
2. Use + and - to set the desired alarm time.
3. Press the alarm button again to confirm and activate the alarm. An alarm icon will appear on the display.
4. To turn off an alarm, press its corresponding alarm button again until the icon disappears.

4. Night Light Control

The clock features a bottom night light with multiple color options.

- Press the **Night Light** button on the remote to cycle through 8 fixed colors and 1 multi-color option.
- When the night light changes color, press the **OK** button on the remote to confirm and set the current color.
- To turn off the night light, cycle through the options until it is off.

9 Color Night Light or Turn Off

10 levels of brightness color lights for adjustment

Night Light

NOTE: When the night light changes color, it automatically changes color and can be confirmed by pressing the "OK" button when you like the color.

7. Timer Function

The clock includes a timer function for both forward counting (stopwatch) and backward counting (countdown).

- Press the **TIMER** button on the remote to activate the timer mode.
- Use the **+** and **-** buttons to set the desired countdown time (up to 99 minutes and 59 seconds).
- Press **START/STOP** to begin or pause the timer.
- Press **RESET** to clear the timer.

MAINTENANCE

- **Cleaning:** Wipe the clock display and body with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Battery Replacement:** If the clock loses time during a power outage, replace the 2 AAA backup batteries.
- **Storage:** If storing the clock for an extended period, disconnect it from power and remove the backup batteries.

TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|---------------------------------------|---|---|
| Clock display is off. | No power connection or power outage. | Ensure the power adapter is securely plugged into the clock and a working outlet. Check if there's a power outage. |
| Remote control not working. | Remote batteries are dead or incorrect orientation. Obstruction between remote and clock. | Replace remote batteries. Ensure line of sight to the clock's sensor. |
| Time is incorrect after power outage. | Backup batteries not installed or dead. | Install or replace 2 AAA backup batteries. Reset the time manually. |
| Night light not changing colors. | Not pressing 'OK' to confirm color selection. | After cycling to the desired color, press the OK button on the remote to set it. |
| Display is too bright/dim. | Brightness level needs adjustment. Auto-dimming sensor is active. | Use the Brightness +/- buttons on the remote to manually adjust. Ensure the auto-dimming sensor is not obstructed. |
