Inefala RM

Inefala 2+64G Android 15 CarPlay Car Stereo User Manual

Model: RM | Compatible with Chevrolet Chevy Malibu 2011-2015

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Inefala 2+64G Android 15 CarPlay Car Stereo. Please read this manual thoroughly before using the product to ensure proper function and safety.

VEHICLE COMPATIBILITY

This upgraded replacement dash kit is designed for Chevrolet Chevy Malibu models from 2011 to 2015.

Important: Before purchasing and installation, verify that the power cable port on the detail page matches your original car's port. If the back of your car's CD player resembles the "Not Fit" image below, this product is not compatible. Contact customer service for suitable product advice if needed.

PACKAGE CONTENTS

The package includes the following items:

- Inefala Android Radio for Chevrolet Chevy Malibu
- 1 x Power Cable
- 1 x Original USB Cable
- 1 x Radio Antenna
- 1 x CANBUS
- 1 x RCA Harness
- 1 x GPS Antenna
- 1 x AHD Backup Camera
- 1 x Rear Camera Input Cable
- 1 x External Microphone
- 2 x USB Cables
- 1 x Installation Tool & Accessories

Image: Visual representation of the package contents and the dimensions of the head unit.

INSTALLATION GUIDE

Pre-Installation Test

Before full installation, perform a quick test:

1. Connect the red and yellow wires of the car stereo together, then connect them to the positive pole of the 12V battery.
2. Connect the black wire to the negative pole of the battery.
3. If the car stereo functions normally during this test, proceed with the full installation. If not, recheck the wiring and contact support if issues persist.

Wiring Connections

Refer to the port details and wiring diagrams for correct connections.

Backup Camera Wiring

The waterproof AHD camera is included for reverse assistance. Follow these steps for wiring:

1. Connect Cable 1 and Cable 5: Connect the positive pole of the car reversing light cable.
2. Connect Cable 2: Connect the negative pole of the car reversing light cable.
3. Connect Cable 3 and Cable 4: Connect to the reverse trigger wire of the power cable (labeled "Reverse/Back"). No need to connect if without this wire. Pull it out and connect it if the last step doesn't work.

Note: The reversing input must be plugged in even when the reversing camera is not used. Otherwise, your WiFi and Bluetooth signals may be affected.

How to Connect the Backup Camera?

Cable 1 and cable 5: Need connect the positive pole of the car reversing light cable.

Cable 2: Connect the negative pole of the car reversing light cable.

Cable 3 and Cable 4: Connects to the reverse trigger wire of power cable (labeled "Reverse/Back"). No need to connect if without this wire. Pull it out and connect it if last step doesn't work.

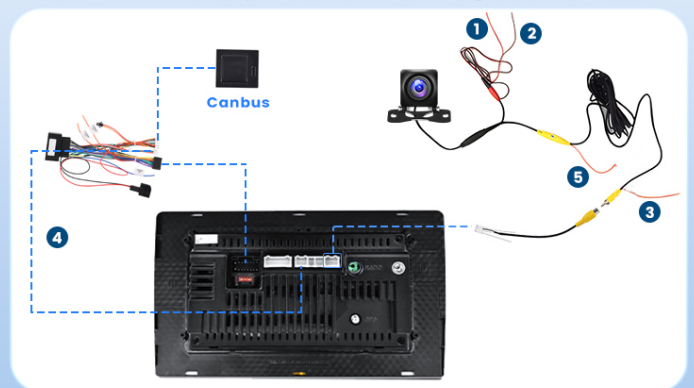

Image: Diagram illustrating the connection points for the AHD backup camera.

Steering Wheel Control Setup

The unit supports steering wheel controls for quick reactions and adjustments.

- **Without CANBUS box:** Activation of steering wheel controls requires key learning in settings.
- **With CANBUS box:**

- a. Connect the 20-pin white port in the power cable to the CANBUS itself, and the remaining 8-pin white port to

the corresponding port on the back of the radio.

- b. Match the car model in "Settings - Factory Setting (Password 1234) - Can Settings".

OPERATING INSTRUCTIONS

Your Inefala car stereo features a 9-inch 1024x600 HD touchscreen with an Android 15 operating system, offering a range of functions for an enhanced driving experience.

User Interface and Themes

The device features a specially designed blue main UI and 28 desktop themes. Long press on the desktop's blank space to switch between different themes.

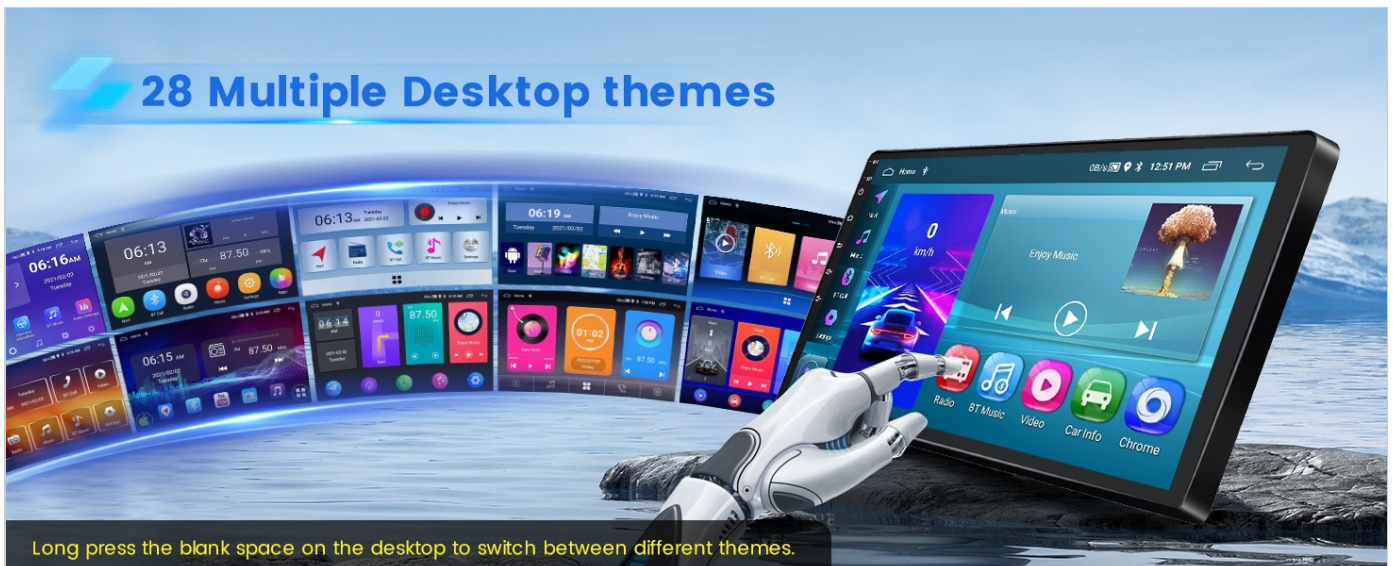

Image: Displays various desktop themes available on the car stereo.

Wireless CarPlay & Android Auto

Enjoy seamless integration with your smartphone via wireless or wired CarPlay and Android Auto. This allows for voice control and access to phone functions like music, navigation, calls, and messages.

- **Wireless Connection:**

- Turn on your phone's Bluetooth, search for the car stereo's Bluetooth, and pair it.
- Click the "CPLink" / "Android Auto" app on the car stereo. (If your cell phone is Android, you may need to install the "Android Auto" app in advance).
- Wait for a few seconds, and the CarPlay/Android Auto wireless connection will happen automatically.
- After the first successful connection, simply turn on Bluetooth, and it will start automatically. You can then use functions like voice assistant, navigation, music playback, and hands-free calls.

• **Wired Connection:**

- Connect your iOS/Android cell phone via the phone's original USB cable.
- Click the "CPLink" / "Android Auto" app on the car stereo. (If your cell phone is Android, you may need to install the "Android Auto" app in advance).
- Wait for a few seconds, and the CarPlay/Android Auto wired connection will happen automatically.

Note: For some Samsung and Huawei phones, Android Auto and Mirror Link functionality may not be fully supported. The phone needs to support Google Services and have the "Android Auto" app installed.

Image: Illustrates the wireless and wired connection methods for CarPlay and Android Auto.

Mirror Link (iOS/Android)

Synchronize your cell phone's content, such as videos and navigation, to the car stereo's larger screen using the phone's original USB cable. Compatible with iOS phones (one-way control) and Android phones (two-way control).

Image: Depicts the Mirror Link feature, showing content mirrored from a smartphone to the car stereo.

GPS Navigation & WiFi Connection

The unit supports both offline and online GPS navigation. You can download free offline maps (e.g., Waze) or use online maps. With WiFi connectivity, you can download various apps like YouTube and TikTok for entertainment.

Image: Shows GPS navigation interface and various apps available via WiFi connection.

Audio Features: EQ & Split Screen

Adjust your audio experience with the built-in EQ settings, offering presets like pop, rock, and jazz, or a customizable user profile. The split-screen function allows you to display multiple applications simultaneously, such as navigation and FM radio.

Image: Displays the equalizer (EQ) settings interface for audio customization.

Image: Demonstrates the split-screen feature, showing two applications running side-by-side.

Bluetooth & FM/RDS Radio

The built-in Bluetooth 4.2 module enables music playback, hands-free calls, and phonebook download. The FM/RDS radio allows you to listen to music, weather forecasts, traffic updates, and news. You can save up to 18 favorite radio stations.

USB DVR Support

The unit supports USB DVR (Digital Video Recorder) functionality, allowing you to record your drives. A USB DVR camera is optional and sold separately.

Image: Shows the car stereo screen displaying a DVR recording, with an optional USB DVR camera.

VIDEO DEMONSTRATION

Your browser does not support the video tag.

Video: This video demonstrates the various functions and user interface of the Inefala Android car radio, including theme switching, music playback, EQ settings, radio, video playback, file management, settings, and CarPlay/Android Auto connections.

| Connectivity Protocol | Bluetooth, Wi-Fi |
| Model Year Compatibility | 2011-2015 Chevrolet Chevy Malibu |

TROUBLESHOOTING

- **Steering Wheel Control Issues:** If steering wheel controls are not functioning, ensure the CANBUS box is correctly connected (if applicable) and the car model is matched in "Settings - Factory Setting (Password 1234) - Can Settings". For units without a CANBUS box, perform key learning in settings.
- **Abnormal Dashboard Display (Chinese Characters):** If the dashboard displays abnormal Chinese characters, contact customer service to obtain the necessary upgrade package.
- **Power Cable Port Mismatch:** Double-check that the provided power cable port matches your original car's port.
- **Missing or Damaged Accessories:** If the wiring harness is different or accessories are missing/damaged, contact the customer service department for assistance.
- **CarPlay/Android Auto/Mirror Link Connectivity:** Ensure your phone supports Google Services and has the "Android Auto" app installed for Android Auto. Note that some Samsung and Huawei phones may have limited

compatibility.

- **WiFi/Bluetooth Signal Issues:** Ensure the reversing input is plugged in, even if a camera is not used, as it can affect WiFi and Bluetooth signals.

WARRANTY AND SUPPORT

Your Inefala car stereo comes with a **1-Year Warranty**.

For any questions, technical support, or issues, please contact Inefala Direct customer service. You can typically find contact information on the seller's page or through your purchase platform.

How to reach us:

1. Click "Inefala Direct" on the product page.
2. Click "Ask a question".
3. Provide details of your issue, including relevant pictures or videos, to help resolve the problem faster.

Installation tips & How to reach us?

A quick test before installation:

1. The red and yellow wires of the car stereo are combined first, then connected to the positive pole of the 12V battery. The black wire is connected to the negative pole of the battery.
2. After 2 seconds, check the car stereo, if the screen lights up, it means that the car stereo is functioning normally. If you test that the car player turns on, but the device does not work after installation, recheck the installation procedure.

Warm tips:

1. Please double-check that the power cable port we provide matches the port of your car
2. No need to connect the all sockets if they don't fit, because the harness may contains spare sockets to match different car model years
3. If the wiring harness is different or the accessories are missing or damaged, please refer them to our CS Department for processing, and we will resend them for you
