IMPORTANT SAFETY INFORMATION

Your safety is paramount. This electric blanket has undergone rigorous testing and holds ETL Certification and UL964 Test Authentication, ensuring compliance with American safety standards. It features lower electromagnetic radiation and NTC overheating protection technology with an 8-hour auto shut-off to prevent overheating.

General Safety Guidelines:

- Always disconnect the power cord from the wall outlet before detaching the controller cord from the blanket.
- Do not plug the main power cord into the wall outlet until the heated product is completely set up.
- Never submerge cords or the control unit in water.
- Never dry clean or use bleach on the blanket.
- Never iron the heated blanket.

Not Recommended for Use By:

- Infants or very small children.

- Individuals with disabilities.
- Anyone who is immobile or cannot operate the controls properly.
- Anyone who is insensitive to heat (e.g., a person with poor circulation).
- Anyone who cannot or will not understand these directions.

PACKAGE CONTENTS

- 1 x Homemate Heated Electric Blanket (Queen Size, 84"x90")
- 2 x Detachable Controllers (for dual control)

SETUP INSTRUCTIONS

1. **Unpack the Blanket:** Carefully remove the electric blanket from its packaging.
 2. **Position the Blanket:** Lay the blanket flat on your bed, ensuring it is evenly spread and not bunched up.
 3. **Connect the Controllers:** For Queen size blankets, two controllers are provided for dual-zone warmth control. Locate the connection ports on the blanket. Align the arrows on the controller cord with the arrows on the blanket's connection port and firmly push to connect. Ensure a secure connection.
 4. **Plug into Power Outlet:** Once both controllers are securely connected to the blanket, plug the power cords into a standard 120V, 60HZ wall outlet.
-

Smart Dual Controller

Individually Adjust Each Side Warmth Level for the Perfect Sleep,
No More Battles for Thermally Incompatible Couples.

OPERATING INSTRUCTIONS

Each controller operates independently, allowing two users to customize their warmth settings.

1. **Power On/Off:** Press the power button on the controller to turn the blanket on or off.
2. **Adjust Heat Level:** Use the temperature buttons (usually marked with '+' and '-') to select your desired heat level. The blanket offers 10 heat levels, ranging from 86°F to 113°F.
3. **Set Auto-Off Timer:** Use the timer button to set the automatic shut-off duration. Options typically include 1, 2, 4, 6, or 8 hours. The blanket will automatically turn off after the selected time for safety and energy conservation.

PRODUCT FEATURES

- **Premium Material:** Made from 220gsm double-sided flannel, offering exceptional softness and warmth even without electricity. The fabric is durable and resistant to shedding.

- **Advanced Heating Wire:** Utilizes heating wire designed and produced by a Japanese company, ensuring advanced technology, stronger insulation, and flame resistance. The 2.2 mm diameter heating wire is barely noticeable for enhanced comfort.
- **Smart Dual Control:** Queen size blankets include two independent controllers, allowing each user to set their preferred warmth level without affecting the other side.
- **Long Power Cord:** A 14.3-foot power cord provides flexibility for use in various locations, such as on a bed or sofa.

LONGER INSULATED HEATING WIRE

MAINTENANCE AND CARE

This electric blanket is machine washable for easy care.

1. **Disconnect Cords:** Before washing, always disconnect all controller cords from the blanket.
2. **Machine Wash:** Place the textile portion of the blanket (without cords) into the washing machine. Use a warm water setting on a gentle or delicate cycle.

3. **Drying:** For best results, air-dry the blanket. If using a dryer, select a low-temperature setting. Do not plug in the blanket until it is completely dry.
4. **Avoid:** Never dry clean, use bleach, or iron the heated blanket.

TROUBLESHOOTING

Blanket Not Heating Up:

- Ensure the main power cord is securely plugged into a functional wall outlet.
- Verify that the controller cord is firmly attached to the blanket's connection port.
- Check if the power button on the controller has been pressed and a heat level is selected.
- If the issue persists, unplug the blanket from the wall outlet, disconnect and reconnect the controller, and then plug it back in.
