4. SETUP AND ASSEMBLY

Assembly of the Vicco Iva Craft Table requires careful attention to detail. Please follow the included assembly instructions step-by-step. It is highly recommended to have two people for assembly.

1. **Unpack and Identify Parts:** Carefully unpack all components. Lay them out on a soft, clean surface. Refer to the parts list in the separate assembly instructions to identify each piece. Note that some parts may not be explicitly marked, requiring careful comparison with the diagrams.
2. **Prepare Tools:** A screwdriver is the recommended tool for assembly. Ensure you have the correct type and size.
3. **Follow Diagrams:** The assembly instructions contain detailed diagrams. Pay close attention to the orientation of each piece and the type of hardware used for each connection. Particular care should be taken when assembling drawer runners and other intricate mechanisms.
4. **Secure Connections:** Ensure all screws and fasteners are tightened securely, but do not overtighten, as this can damage the particle board material.

6. MAINTENANCE

The Vicco Iva Craft Table is constructed from easy-care, melamine resin-coated 16 mm particle board. To maintain its appearance and functionality:

- **Spills:** Clean up spills immediately to prevent staining or damage to the material.
- **Heat and Moisture:** Avoid placing hot items directly on the surface. Protect the table from excessive moisture.
- **Hardware:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary, but do not overtighten.

7. TROUBLESHOOTING

If you encounter issues during assembly or use, consider the following:

- **Difficulty with Assembly:** If the assembly instructions are unclear or parts are difficult to identify, carefully re-examine the diagrams. Ensure you are using the correct parts for each step. Patience is key, as some furniture assemblies can be complex.
- **Unstable Table:** Check that all screws and connections are fully tightened. Ensure the table is placed on a level surface.

- **Drawers Not Sliding Smoothly:** Verify that the drawer runners are installed correctly and are free from obstructions. Ensure the drawers are not overloaded.
- **Damage During Shipping:** If any components arrived damaged, do not proceed with assembly. Contact customer support for replacement parts.
