Feilifan A-EF-SE

Feilifan 13-Piece Accessory Kit for Eufy RoboVac X8 / X8 Hybrid Robot Vacuum

Model: A-EF-SE

1. COMPATIBILITY

This accessory kit is designed for use with the following robot vacuum cleaner models:

- Eufy RoboVac X8
- Eufy RoboVac X8 Hybrid

Please verify your vacuum cleaner model before installing any replacement parts.

2. PACKAGE CONTENTS

The Feilifan 13-piece accessory kit includes the following items:

- 1x Main Brush
- 3x Mop Pads
- 3x Filter
- 6x Side Brushes
- 1x Cleaning Brush

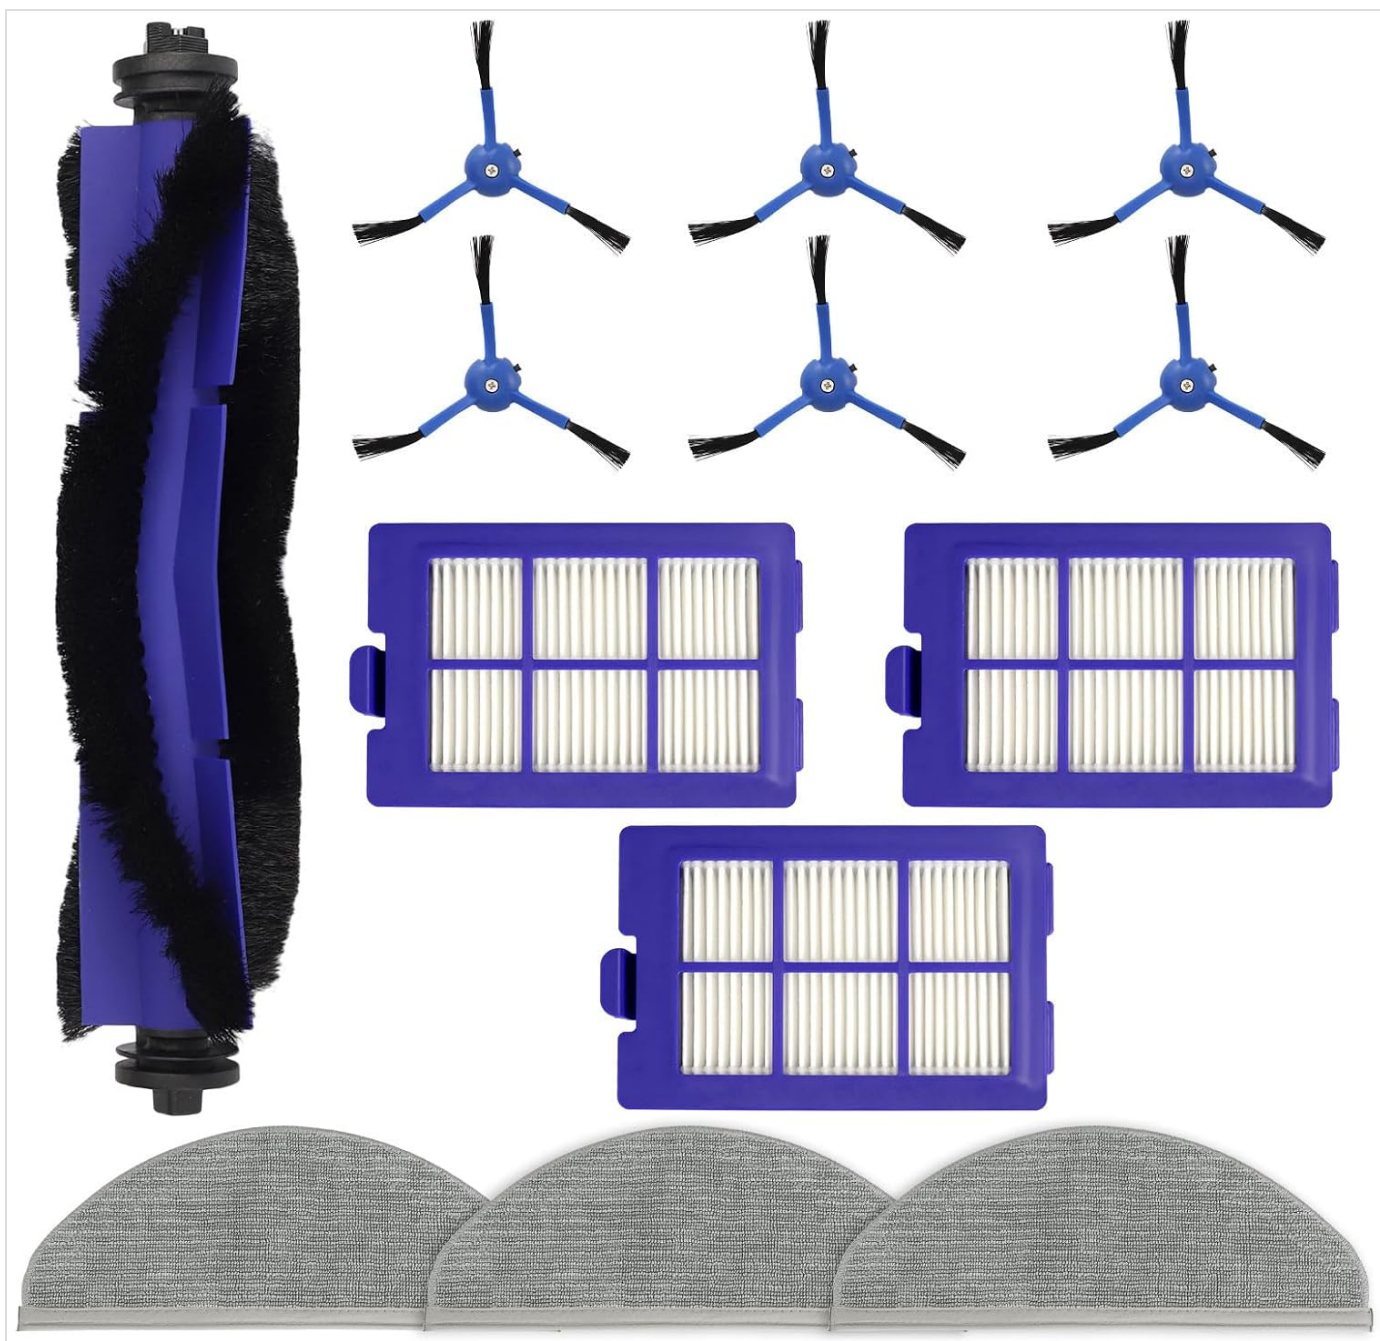

Image: Overview of the Feilifan 13-piece accessory kit, showing all included components: main brush, mop pads, filters, side brushes, and a cleaning brush.

3. SETUP AND INITIAL USE

Upon first use or after replacing parts, ensure your robot vacuum is properly set up for optimal performance.

3.1. Initial Mapping

Allow the robot vacuum to complete an initial mapping run of your home. This enables the device to learn the layout of your rooms and the placement of furniture, optimizing its cleaning path and preventing collisions.

3.2. Boundary Strips (if applicable)

If your model includes magnetic boundary strips, place them around areas you wish the robot to avoid, such as wires or specific furniture pieces. The robot will detect these strips and adjust its cleaning path accordingly.

4. OPERATING INSTRUCTIONS

To start a cleaning cycle, press the power button on the robot vacuum or use the accompanying remote control/app. The

robot will navigate and clean according to its programmed settings or mapped layout.

4.1. Noise Level

The robot vacuum operates at a moderate noise level, allowing for normal household activities to continue without significant disruption.

4.2. Cleaning Effectiveness

The vacuum is designed to effectively clean various floor types, including hardwood and carpet, picking up debris and pet hair. Regular maintenance of accessories ensures consistent cleaning performance.

5. MAINTENANCE

Routine maintenance of your accessory kit is crucial for maintaining the robot vacuum's optimal performance. Refer to the following guidelines:

5.1. Main Brush Replacement

The main brush should be cleaned regularly and replaced every 6-12 months, or when visibly worn, to ensure effective debris collection.

Rubber Main Brushes

Image: Detailed view of the main brush, highlighting its design for effective cleaning and ease of replacement.

5.2. Side Brush Replacement

Clean side brushes monthly and replace them every 3-6 months, or if they become visibly worn or bent. This ensures thorough cleaning along edges and in corners.

Side Brushes

High-speed rotating side brushes for more efficient cleaning.

Image: Close-up of the side brushes, showing their three-arm design and how they attach to the robot vacuum. A screwdriver is used for installation.

Video: Instructions on how to replace the side brush for your Eufy RoboVac X8. The video demonstrates unscrewing the old brush and attaching the new one.

5.3. Filter Cleaning and Replacement

Clean the filter weekly and replace it every 3 months. Filters are washable; ensure they are completely dry before reinstallation to prevent damage.

HEPA-Filter

The filter is made from a special material that captures 99.97% of fine dust.

Image: Illustration of the HEPA filter, demonstrating its ability to capture fine dust and showing it being rinsed with water for cleaning.

5.4. Mop Pad Cleaning

Mop pads should be cleaned after each use. They are made from premium microfiber, are machine washable, and designed not to scratch floors.

Upgraded Reusable Mop Pads

100% Premium
microfiber

Video: Overview of the replacement accessory kit for Eufy X8 Pro, demonstrating the replacement process for various components including filters, side brushes, and the main brush.

6. TROUBLESHOOTING

6.1. Robot Gets Stuck

If the robot vacuum gets stuck on an object, such as clothing or wires, it is designed to shut itself off to prevent damage. Clear the obstruction and restart the cleaning cycle.

6.2. Battery Life and Charging

The robot vacuum is equipped with intelligent navigation that allows it to return to its charging base when the battery is low or a cleaning cycle is complete. Ensure the charging base is accessible and plugged in.

7. SPECIFICATIONS
