Key Features:

- **Large Digital Display:** 4.6-inch numbers for easy readability from a distance.
- **Rechargeable Battery:** Built-in lithium polymer battery, eliminating the need for constant battery replacements. Includes a 9.8-foot USB charging cable.
- **Atomic Time Synchronization:** Automatically sets and adjusts time via radio wave signals (WWVB). Supports PST, CST, MST, EST time zones.
- **Automatic Backlight:** Built-in ambient light sensor automatically illuminates the screen in dark environments. Two adjustable brightness levels (Low Light, High Light) or can be turned off.
- **Temperature Display:** Shows indoor temperature in Celsius (°C) or Fahrenheit (°F).
- **Date Display:** Displays month and date.
- **Multiple Modes:** Functions as a clock, alarm, and timer.

- **Daylight Saving Time (DST):** Automatic adjustment for DST.
- **Easy Mounting:** Designed for both wall mounting and tabletop use.

Setup

Initial Charging:

Before first use, fully charge the clock. Connect the provided USB charging cable to the clock's charging port (5V2A charging adapter not included) and a USB power source. The clock has a battery low display indicator to notify you when charging is needed.

Mounting Options:

The clock can be placed on a tabletop or mounted on a wall.

Wall Mounting:

1. Choose a suitable location on the wall.
2. Use the provided mounting hardware (screws, wall anchors) and the bubble spirit level to ensure the clock is level.
3. The clock features three small holes reserved for wall studs and a hanging hook for secure installation. Double-sided tape can also be used for additional stability.

Power On/Off:

Locate the "POWER OFF/ON" switch on the back of the clock to turn it on or off.

Atomic Time Synchronization:

The clock automatically searches for radio wave signals (WWVB) to set the correct time. This process typically occurs daily. Ensure the clock is placed in an area with good signal reception.

If the atomic time synchronization fails or you are outside the reception area, you may need to set the time manually.

Manual Time and Date Setting:

Refer to the buttons on the back of the clock (e.g., SET, +/12/24, -/°C/°F).

1. Press the **SET** button to enter setting mode.
2. Use the **+/12/24** and **-/°C/°F** buttons to adjust values.
3. Press **SET** again to confirm and move to the next setting.
4. Settings typically include: Time Zone, Hour, Minute, Year, Month, Day.

12/24 Hour Format:

Press the **+/12/24** button to switch between 12-hour and 24-hour display formats.

Temperature Display (°C/°F):

Press the **-/°C/°F** button to switch the temperature display between Celsius (°C) and Fahrenheit (°F).

Brightness Adjustment:

The clock features an ambient light sensor that automatically adjusts backlight brightness. You can manually select between two levels (Low Light, High Light) or turn the backlight off.

Image: The KMMKGG clock illustrating its two brightness settings: "Low Light" and "High Light," with a slider control.

Specific controls for brightness adjustment are usually located on the back of the clock or accessible via the SET menu.

Alarm Settings:

The clock supports up to three sets of alarm clocks. Use the**ALARM** button (or similar) to access and set alarms. Follow the on-screen prompts or refer to the specific button labels for setting alarm time and activating/deactivating alarms.

Timer Function:

The clock includes a countdown/count-up timer function. Activate the timer mode using the appropriate button (e.g., **TIMER**) and set the desired duration. The large display makes it suitable for use in various settings.

Daylight Saving Time (DST):

The clock features automatic DST adjustment. Ensure the DST function is enabled if you reside in an area that observes Daylight Saving Time. This setting is usually found within the time setting menu.

Maintenance

- **Cleaning:** Wipe the clock with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Charging:** Recharge the clock when the low battery indicator appears. Avoid overcharging or completely draining the battery for extended periods to prolong battery life.
- **Storage:** If storing the clock for a long period, ensure it is fully charged and stored in a cool, dry place.

Troubleshooting

Problem	Possible Cause	Solution
Clock does not turn on.	Battery is depleted. Power switch is off.	Charge the clock using the USB cable. Ensure the "POWER OFF/ON" switch is in the ON position.
Time is incorrect or not setting automatically.	Poor atomic signal reception. Incorrect time zone setting.	Move the clock to a location with better signal reception (e.g., near a window, away from electronics). Manually set the time and ensure the correct time zone is selected.
Backlight is too dim or too bright.	Brightness level needs adjustment.	Adjust the brightness settings (Low Light/High Light) or turn off the automatic backlight feature if desired.
Temperature display is inaccurate.	Clock is exposed to direct heat/cold sources.	Ensure the clock is placed in a stable room temperature environment, away from vents or windows.
Charging light does not come on.	Faulty USB cable or power adapter.	Try using a different USB cable or a known working 5V2A USB power adapter.
