Video: Highlights the 4000mAh battery and 15-hour recording capability of the KJ23Pro.

- **Night Vision with Five IR Lights:** Excels in low light conditions with its five IR lights, providing clear visibility and recording quality even in complete darkness. Perfect for night patrols and surveillance.

Image: The camera's night vision feature with five IR lights ensures clear footage in low-light environments.

- **Loop Recording:** Defaults to 10-minute video segments. When memory card storage reaches its limit, the device automatically overwrites the oldest recordings, ensuring continuous capture of the latest important videos.

Default to Loop Recording Support long video fragment

Vedio Length

- 30min (MAX)
- 15min
- 10min (Default)
- 5min
- 0
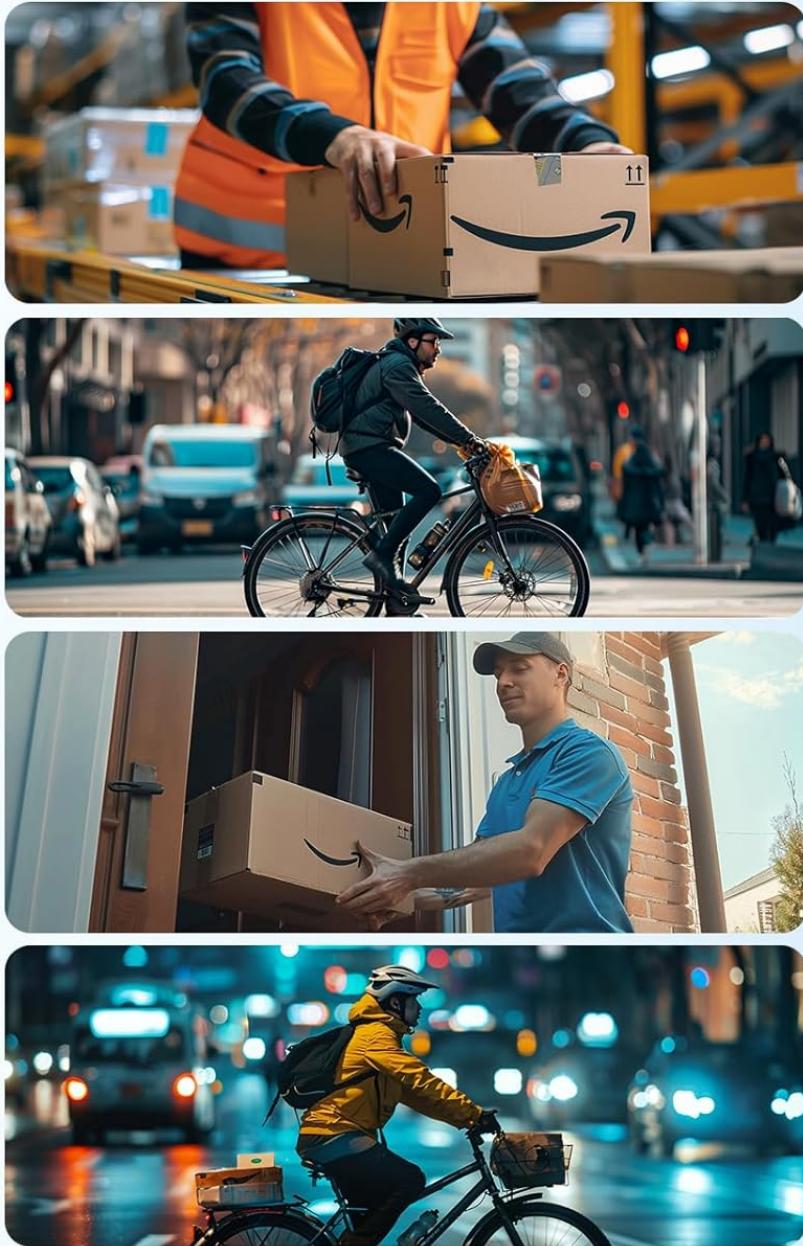

Image: Explanation of the loop recording feature, which manages storage by overwriting older files.

- **Built-in 128GB Memory:** Comes with 128GB of built-in memory, offering ample storage for high-definition video and audio files without frequent changing memory cards. Ready to use out of the box.

# Ready to Use Out of the Box

Support long video fragment
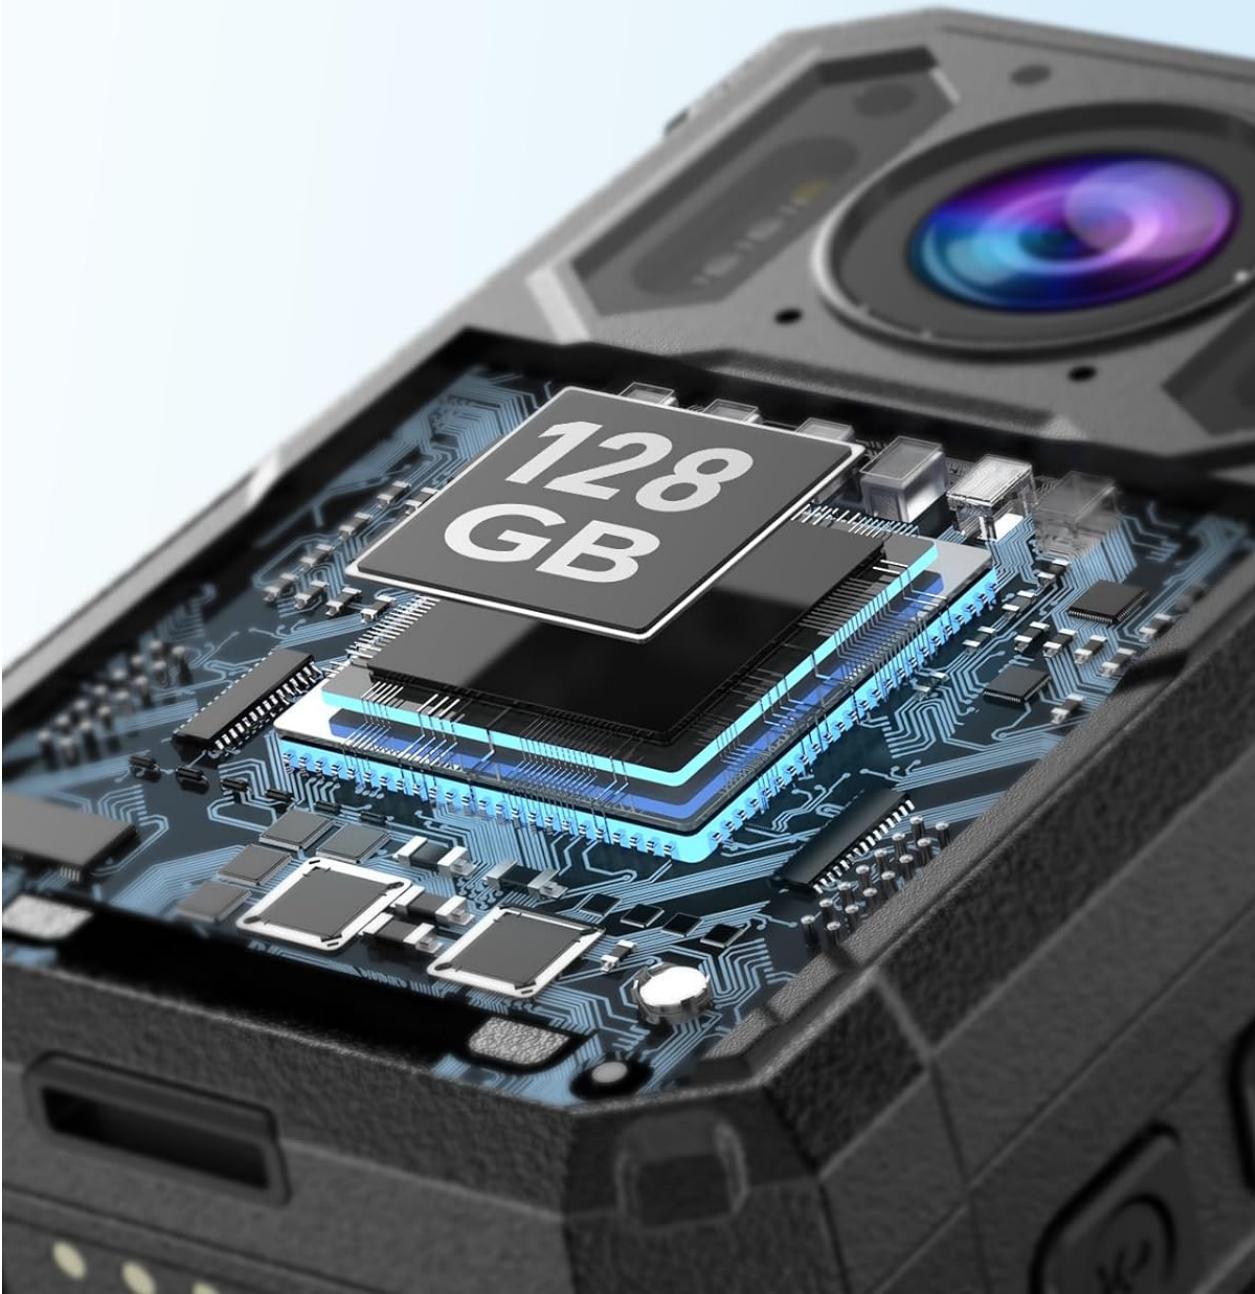

Image: The camera includes 128GB of internal storage for immediate use.

- **USB-C Interface:** Features a USB-C interface for faster and more reliable data transfer, saving valuable time and enhancing convenience for file backup.

- **IP66 Water-resistant:** Designed with an IP66 rating, protecting against water splashes and suitable for outdoor use in various weather conditions.
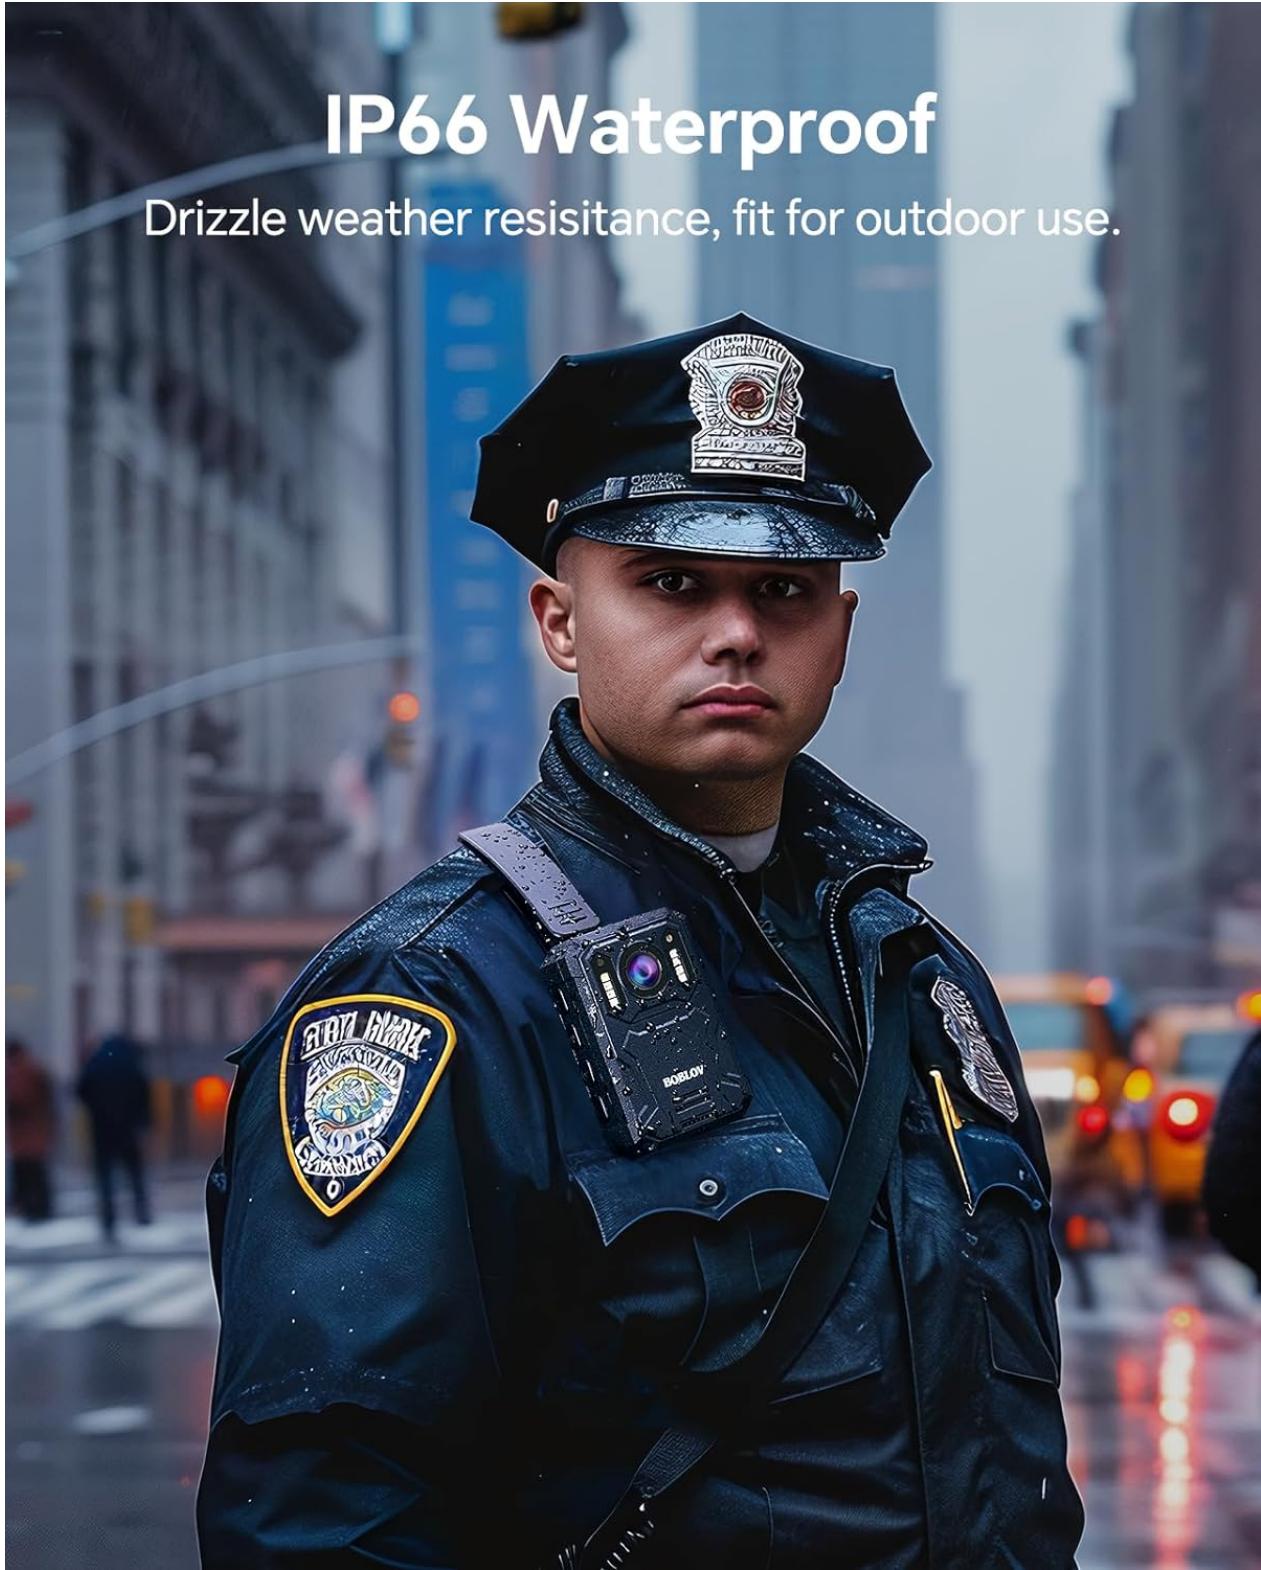

Image: The IP66 water-resistant design allows for use in various weather conditions.

4. SETUP

4.1 Charging the Camera

Before first use, fully charge the BOBLOV KJ23Pro. Connect the provided USB-C cable to the camera's USB-C port and the other end to the car charger or a compatible USB power adapter. The charging indicator will show the charging status and turn off when fully charged.

4.2 Attaching Clips

The KJ23Pro comes with two types of clips: a long 360° shoulder clip and a short 360° back clip. To attach a clip,

align the clip's base with the slot on the back of the camera and slide it in until it clicks securely into place. To remove, press the release button on the clip and slide it out.

4.3 Car Mount Installation

The included car bracket allows you to use the KJ23Pro as a dash camera. Attach the camera to the car bracket using the appropriate clip. Secure the suction cup of the car bracket to your vehicle's windshield in a position that provides a clear view of the road without obstructing your driving view.

5. OPERATING INSTRUCTIONS

5.1 Basic Operation

- **Power On/Off:** Press and hold the Power button (bottom button on the side) to turn the camera on or off.
- **Photo Capture:** Press the Photo button (bottom button on the side with camera icon) to take a still picture.
- **Video Recording:** Press the Video button (middle button on the side with movie camera icon) to start video recording. Press again to stop.
- **Audio Recording:** Press the Audio button (top button on the side with microphone icon) to start audio-only recording. Press again to stop.

5.2 Night Vision

The KJ23Pro automatically activates its infrared (IR) lights in low-light conditions to enable night vision. You can also manually control the IR lights by pressing the dedicated light bulb button (top button on the side).

5.3 Menu Navigation

To access the camera's settings menu, turn on the camera and press the 'M' button located below the screen. Use the arrow buttons (< and >) to navigate through the menu options. Press the 'OK' button to select an option or confirm a setting. To exit the menu, press the circular button on the side.

5.4 Usage Scenarios Video

Video: Shows the KJ23Pro being used in various daily work and outdoor scenarios.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution. Avoid abrasive materials or harsh chemicals.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery regularly. Charge the camera periodically if it's not used for extended periods.

7. TROUBLESHOOTING

Issue	Possible Cause	Solution
Camera does not turn on	Low battery; System crash	Charge the camera; Press and hold the power button for 10 seconds to reset.

Issue	Possible Cause	Solution
Cannot connect to computer	Faulty USB cable; Driver issue	Try a different USB-C cable; Ensure correct drivers are installed on your computer.
Video/Photo quality is poor	Lens is dirty; Low light conditions; Incorrect settings	Clean the lens; Use night vision; Adjust resolution settings in the menu.
Memory full	Too many files stored	Transfer files to a computer and delete from camera; Ensure loop recording is enabled.

For more detailed troubleshooting, please refer to the full user manual or contact customer support.
