1.2 Applicable Car Models

This product is designed for the following vehicle models:

- GMC Yukon: 2007-2013
- Chevrolet Tahoe / Suburban: 2007-2013

1.3 Installation Overview

The installation process involves removing the factory radio, connecting the new head unit's wiring harness, and securing the new unit in place. Ensure the vehicle's battery is disconnected before starting any electrical work.

Step 1: Remove the Factory Radio Trim and Unit

Carefully pry off the dashboard trim surrounding the factory radio. Once the trim is removed, unscrew and detach the existing radio unit.

Step 2: Connect Wiring Harness and Accessories

Connect the provided wiring harness to the new head unit and the vehicle's existing connectors. Ensure all

connections are secure. Connect the GPS antenna, external microphone, and rear camera signal wire as needed. The harness is labeled for ease of connection.

Step 3: Install the New Head Unit

Carefully place the new Junsun head unit into the dashboard opening, ensuring no wires are pinched. Secure it with screws and reattach the dashboard trim.

2. OPERATING INSTRUCTIONS

2.1 Android 13 System Basics

The unit operates on an Android 13 system with 2GB RAM, ensuring smooth performance. Connect to Wi-Fi to access and download various free applications from the Application Store, similar to a smartphone.

2.2 Wireless CarPlay & Android Auto

Connect your iPhone or Android phone via USB cable to enable wireless CarPlay or Android Auto. This feature allows you to:

- Use smart voice assistants for commands.
- Access navigation apps for directions.
- Make and receive calls.
- Send and receive messages.
- Enjoy music and other entertainment apps.

CarPlay & Android Auto

2.7 High-Definition Visual Experience

The 1280*720 resolution delivers exquisite image quality with true-to-life colors, providing an immersive visual experience for navigation, entertainment, and rearview imagery.

3. MAINTENANCE

To ensure optimal performance and longevity of your Junsun Car Radio Stereo, follow these maintenance guidelines:

- Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents that may damage the display or finish.
- Software Updates:** Periodically check for software updates via the system settings when connected to Wi-Fi. Updates can improve performance, add features, and fix bugs.
- Temperature:** Avoid exposing the unit to extreme temperatures for extended periods.

4. TROUBLESHOOTING

If you encounter issues with your Junsun Car Radio Stereo, refer to the following common problems and solutions:

- **No Power/Display:** Ensure all power cables are securely connected. Check the vehicle's fuse box for any blown fuses related to the radio.
- **No Sound:** Verify speaker connections. Check the volume settings on the unit and ensure the mute function is not active. If using an external amplifier, ensure it is powered on and correctly connected.
- **Bluetooth Connectivity Issues:** Ensure Bluetooth is enabled on both the head unit and your mobile device. Try unpairing and re-pairing the devices. Check the Bluetooth settings for auto-connect options.
- **GPS Not Working:** Ensure the GPS antenna is properly installed and has a clear line of sight to the sky. Check GPS settings within the unit.
- **Steering Wheel Controls Not Responding:** Verify the steering wheel control wiring is correctly connected. Access the unit's settings to configure or recalibrate the steering wheel buttons. Some users have reported needing to adjust CAN-related settings for proper functionality.
- **Display Issues (e.g., black screen):** If the screen goes black, try restarting the unit. Check all display cable connections.
- **Incorrect Time/Date:** Go to the 'Date & time' settings. Turn off 'GPS sync time' and 'Use network-provided time' if you are not using a dedicated SIM card for internet. Manually set the correct time zone and time.

5. SPECIFICATIONS

Feature	Detail
