## TROUBLESHOOTING

---

If you encounter any issues with your dining table set, consider the following common troubleshooting steps:

- **Wobbling Table/Chairs/Bench:** Ensure all assembly screws and bolts are fully tightened. Uneven flooring can also cause wobbling; try repositioning the furniture or using shims if necessary.
- **Missing Parts:** If any parts were missing upon delivery, refer to the contact information in the Support section to request replacements.
- **Difficulty during Assembly:** Double-check the assembly instructions. Sometimes, parts may be oriented incorrectly. Do not force components together.
