### Assembly Steps

1. Assemble the main metal frame components by connecting the vertical and horizontal bars. Ensure all connections are secure but do not fully tighten screws until all parts are aligned.

5. Once all components are in place and aligned, tighten all screws firmly using the provided L-shaped Allen wrench.
6. Install the adjustable foot pads at the bottom of the unit. These can be adjusted to level the rack on uneven surfaces.
7. Secure the unit to the wall using the durable anti-tip kit for added safety. This step is crucial to prevent accidental tipping.
