SETUP: PROGRAMMING INSTRUCTIONS

Important Note: DIY programming is NOT available for this key fob. It must be programmed by a qualified professional.

1. **Professional Programming Required:** This smart key fob requires programming by a qualified automotive locksmith or dealership. DIY programming is not supported for this model.
2. **Key Blade Cutting:** The included uncut key blade must be cut by a local locksmith to match your vehicle's ignition.
3. **Vehicle Compatibility:** This key fob does not work with PUSH TO START smart key systems or PEPS (Passive Entry Passive Start) vehicles. The key must be inserted into the dash to start the vehicle.

For additional information or to find programming resources, you may refer to these websites, though professional programming is still required for this specific key fob:

<http://www.keyfobprogram.com>

ABOUT PROGRAMMING

Note:

1. *Carefully read the page fitment information, and ensure your car can be Self-Programming , Not all car models can be Self-Programming.*
2. *For a product can't be Self-Programming, it must be programmed by a qualified dealership or locksmith*
3. *Some keys with blank key blades need to be cut by local car locksmiths*
4. *DIY Self-Programming Need 1 working original keys*

Self-Programming Instructions:

1. *The control key fob is easy to follow step-by-step programming via the referring website which is included with the product details page.*
2. *Click the link, **No need to input any personal information and just close the ad. Find the vehicle brand, model, and year, then click "Remote Programming", Not "Key Programming", and get the corresponding programming instructions.***

OPERATING THE KEY FOB

Once the key fob has been professionally programmed and the key blade cut, you can use it to operate your vehicle's remote functions:

- **Lock:** Press the **Lock** button once to lock all vehicle doors.
- **Unlock:** Press the **Unlock** button once to unlock all vehicle doors.
- **Panic:** Press the **Panic** button to activate the vehicle's alarm. Press again to deactivate.
- **Remote Start:** Press the **Remote Start (x2)** button twice within a few seconds to remotely start your vehicle (if equipped). Refer to your vehicle's owner's manual for specific remote start procedures.

MAINTENANCE

The key fob comes with a pre-installed CR2032 battery. When the battery needs replacement, follow these general steps:

1. Carefully open the key fob casing.
2. Remove the old CR2032 battery.
3. Insert a new CR2032 battery, ensuring correct polarity (+/-).
4. Close the key fob casing securely.

Refer to the internal components image in the "Package Contents" section for guidance on battery location.

TROUBLESHOOTING

- **Key Fob Not Working After Purchase:** This key fob requires professional programming. If it is not functioning, it likely has not been programmed correctly by a qualified locksmith or dealership.
- **Vehicle Not Starting:** Ensure the key blade has been properly cut and the key fob is correctly programmed. Remember, this key fob requires insertion into the dash to start the vehicle and is not compatible with push-to-start systems.
- **Intermittent Functionality:** Check the battery. Although a new battery is pre-installed, extreme temperatures or prolonged storage can affect battery life. Replace with a new CR2032 battery if necessary.
- **Remote Range Issues:** Ensure there are no obstructions between the key fob and the vehicle. Large metal objects or other electronic devices can interfere with the signal.
