1. INTRODUCTION

The KUAFU Lawn Mower Lift Jack, model GO-3711, is designed to assist with the maintenance and repair of lawn mowers and garden tractors. This telescopic jack provides a stable and secure way to lift your equipment, allowing for easier access to the underside for tasks such as blade changes, cleaning, and general inspection. Its adjustable lifting height and user-friendly operation make it a versatile tool for various equipment sizes.

Key features include:

- **Adjustable Lifting Height:** Accommodates different sizes and types of lawn mowers and garden tractors.
- **Stability:** Provides a stable platform, preventing movement or tipping during maintenance.
- **User-Friendly Operation:** Designed for straightforward use with intuitive controls.
- **Space-Saving Storage:** Features a folding mechanism for compact storage.

The lawn tractor jack is for Ride on Lawn Mowers & Garden Tractors.

2. SAFETY INFORMATION

Always prioritize safety when operating the KUAFU Lawn Mower Lift Jack. Failure to follow these safety guidelines may result in injury or damage to equipment.

- **Read Instructions:** Familiarize yourself with all instructions before use.
- **Stable Surface:** Always operate the lift jack on a firm, level, and stable surface.
- **Weight Capacity:** Do not exceed the maximum weight capacity of the lift jack. Ensure your equipment's weight is within the jack's limits.
- **Secure Placement:** Ensure the lawn mower or garden tractor is properly centered and secured on the lift jack's support arms.
- **Chock Wheels:** Always chock the rear wheels of the equipment once it is lifted to prevent accidental movement. If only the front is lifted, chock the front wheels.
- **Lock Mechanism:** Verify that the lift jack's locking mechanism is fully engaged before working under the equipment.

- **Personal Protective Equipment (PPE):** Wear appropriate safety gear, such as gloves and safety glasses.
- **Clear Area:** Keep the work area clear of obstructions and bystanders.
- **Supervision:** Never leave equipment unattended while it is raised on the lift jack.
- **Lower Carefully:** Lower the equipment slowly and carefully, ensuring no one is in the path of descent.

Figure 2: Ensure the equipment is stable and secure on the lift jack before performing any maintenance.

3. PACKAGE CONTENTS

Upon opening the package, verify that all components are present and undamaged. The package should contain:

- 1 x KUAFU Lawn Mower Lift Jack (disassembled components)

Note: No installation accessories or detailed instructions are included in the package. Assembly is required.

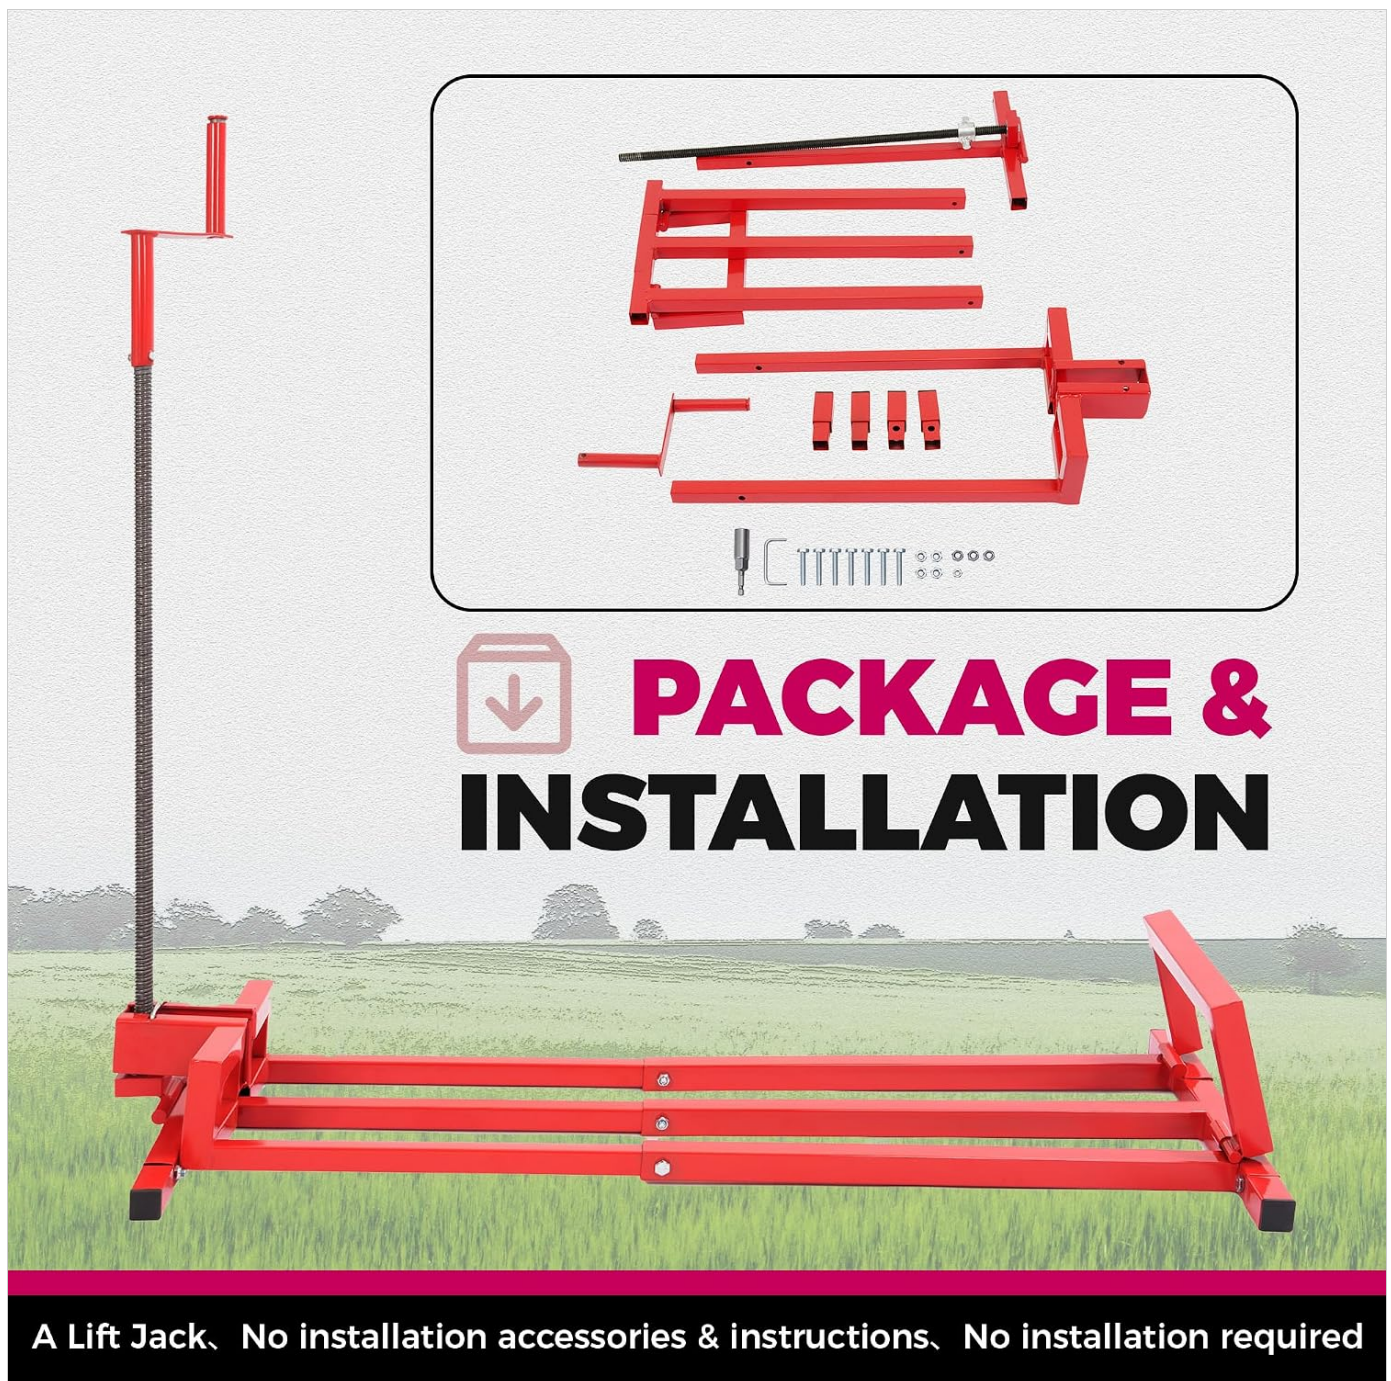

Figure 3: Contents of the package, showing the disassembled lift jack components.

4. SETUP AND ASSEMBLY

The KUAFU Lawn Mower Lift Jack requires assembly. While detailed instructions are not provided, assembly can be completed by referring to the product images and understanding the basic structure. You will need the following tools (not included):

- Two 13 mm or 1/2 inch wrenches (for most bolts and lock nuts)
- One 10 mm or 3/8 inch wrench (for smaller bolts)
- Phillips head screwdriver (for smaller bolts)
- Rubber mallet (may be helpful for fitting parts)

Assembly Steps (General Guidance):

1. Identify all components from the package. Refer to Figure 3 for a visual guide of the parts.
2. Begin by assembling the main frame components, connecting the base sections and the upright support arms.
3. Attach the lifting screw mechanism to the frame, ensuring it is correctly aligned with the crank handle attachment point.

4. Secure all bolts and nuts firmly. Ensure all connections are tight to maintain stability during operation.
5. Attach the crank handle to the lifting screw.
6. Once assembled, visually inspect the jack to ensure all parts are correctly fitted and secured.

5. OPERATING INSTRUCTIONS

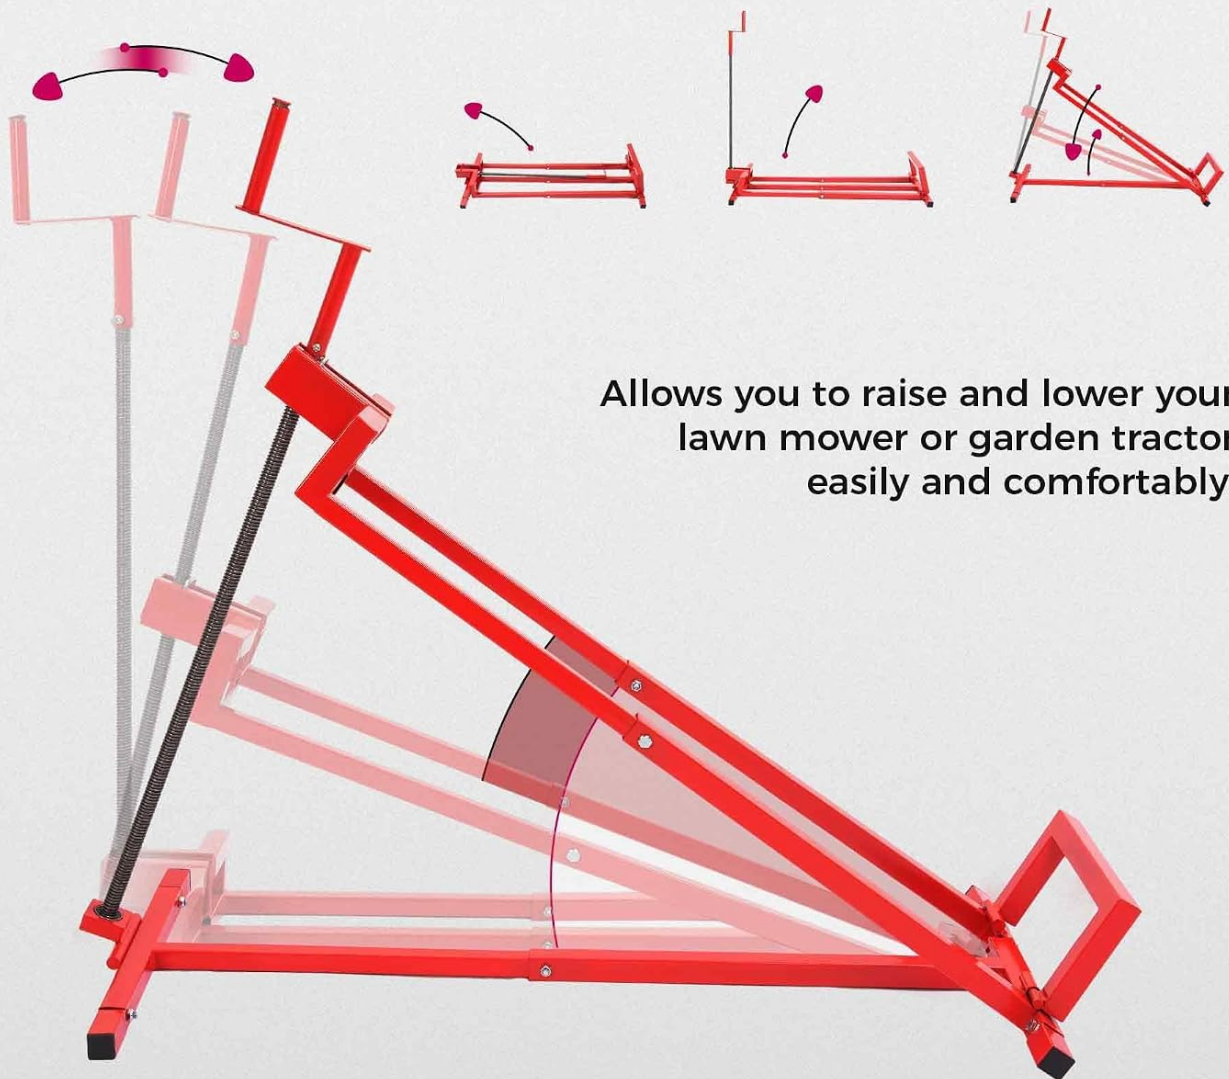

Follow these steps for safe and effective operation of your KUAFU Lawn Mower Lift Jack:

1. **Prepare the Work Area:** Ensure the area is clear, level, and firm.
2. **Position the Jack:** Place the lift jack on the ground in front of the equipment you intend to lift.
3. **Drive On:** Carefully drive the front wheels of your lawn mower or garden tractor onto the support arms of the lift jack. Ensure the wheels are centered and fully seated.
4. **Secure Equipment:** Once the equipment is on the jack, ensure it is stable. It is highly recommended to chock the rear wheels of the equipment to prevent any backward movement.
5. **Lift the Equipment:** Use the crank handle to slowly raise the front of the equipment. Turn the handle clockwise to lift and counter-clockwise to lower. The jack allows for adjustable lifting height and angle.
6. **Engage Lock:** Once the desired height is reached, ensure any integrated locking mechanisms are engaged to secure the jack in the raised position.

7. **Perform Maintenance:** With the equipment safely lifted and secured, you can now perform necessary maintenance tasks.
8. **Lower the Equipment:** When finished, ensure all tools are removed from under the equipment. Disengage any locking mechanisms and slowly turn the crank handle counter-clockwise to lower the equipment back to the ground.
9. **Remove Equipment:** Once fully lowered, carefully drive the equipment off the lift jack.

CONTROL THE ANGLE RAISING AND LOWERING

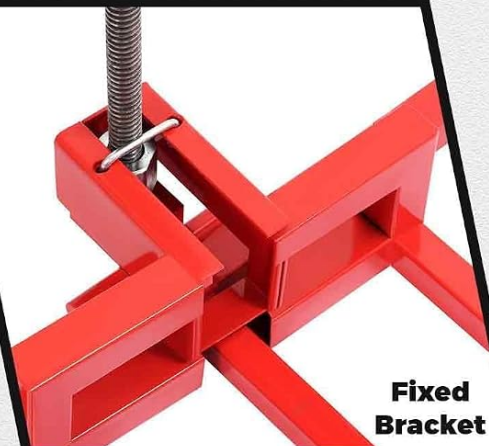

Allows you to raise and lower your lawn mower or garden tractor easily and comfortably.

EASY TO USE

Durable

**Fixed
Bracket**

**Foldable
Design**

Figure 7: The durable crank handle facilitates easy operation, and the fixed bracket ensures stability. The foldable design aids in storage.

6. MAINTENANCE

Proper maintenance will extend the life of your KUAFU Lawn Mower Lift Jack.

- **Cleaning:** After each use, wipe down the lift jack to remove dirt, grass, and debris.
- **Lubrication:** Periodically apply a light lubricant to the screw mechanism and moving parts to ensure smooth operation.
- **Inspection:** Regularly inspect all bolts, nuts, and structural components for tightness and signs of wear or damage. Tighten any loose fasteners.
- **Storage:** When not in use, fold the lift jack for compact storage. Store it in a dry, protected area to prevent rust and corrosion.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Difficulty turning crank handle / Stiff operation	Lack of lubrication on screw mechanism; debris in mechanism.	Apply a suitable lubricant to the screw rod. Clean any visible debris.
Jack feels unstable when lifting	Equipment not centered; uneven ground; loose fasteners.	Ensure equipment is centered. Move to a level, firm surface. Check and tighten all assembly fasteners. Always chock wheels.
Missing power tool attachment	Product description states "Manual Handle & Power Tool Extension Red" but reviews indicate it might be missing.	Contact KUAFU customer support for assistance regarding missing parts. Some users have modified the crank rod for drill attachment.

8. SPECIFICATIONS

Model	GO-3711
Brand	KUAFU
Material	Alloy Steel
Color	Red
Item Weight	16.53 Pounds (approx. 7.5 kg)
Adjustable Lifting Height	Refer to Figure 8 for detailed dimensions.
Foldable Design	Yes
