SwanKiss ES X3

SwanKiss ES X3 UV-C Toothbrush Sanitizer and Holder

Model: ES X3 | **Brand:** SwanKiss

PRODUCT OVERVIEW

The SwanKiss ES X3 is a portable UV-C toothbrush sanitizer and holder designed to maintain the cleanliness of your toothbrush. It utilizes UV-C technology to sanitize toothbrush heads and features a smart automatic sensor for operation. Its compact design and magnetic mounting option make it suitable for both home and travel use. The device is rechargeable via USB-C and includes a warm air heating function for drying when plugged in.

Enhanced Dual-band UV Disinfection

Authoritative certification with a 99.9% sterilization rate

360°

Only 3 Mins

KEY FEATURES

- **UV-C Technology:** Employs UV-C light to sanitize toothbrush heads, aiming to reduce contaminants.

- **Smart Automatic Sensor:** Initiates a 3-minute sanitization cycle automatically when the cover is closed. The sanitization process pauses if the cover is opened during operation.

- **Warm Air Drying:** Features a warm air heating design for thorough toothbrush drying. This function requires the device to be plugged in to operate.

- **USB Rechargeable:** Equipped with a 300mAh battery and a Type-C USB port for charging. A full charge provides up to 30 days of use for the sanitization function.

- **Magnetic Mounting:** Designed for easy mounting to surfaces like bathroom mirrors or walls using smart magnet technology, eliminating the need for drilling.

- **Universal Compatibility:** Includes adjustable silicone clips to accommodate various toothbrush types, including electric and manual toothbrushes.

Protects Oral Health Clean And Clear

90% of oral problems are related to the bacteria on toothbrush

Magnetic Wall Mounting

The SwanKiss ES X3 can be easily mounted to a wall or mirror without drilling. Follow these steps:

1. Clean the desired installation area thoroughly.
2. Peel off the adhesive backing from the included iron plate.
3. Stick the iron plate firmly to the wall and wait for 12 hours to ensure strong adhesion.
4. Remove the protective film from the iron plate and attach the device magnetically.
5. Hang your toothbrush in the holder.
6. The device can be easily detached and carried for travel as needed.

No DrillingNo Wall Damage

1. Clean the installation area.	2. Peel off the adhesive backing of the iron plate.	3. Stick to the wall and wait for 12 hours.
4. Remove the protective film from the iron plate and attach the device.	5. Hang the toothbrush.	6. Easily detach and carry whenever needed.

OPERATING INSTRUCTIONS

Sanitization Cycle

The SwanKiss ES X3 features a smart automatic sensor. To initiate a sanitization cycle:

1. Place your toothbrush head into the designated slot within the device.
2. Close the cover securely. The device will automatically begin a 3-minute UV-C sanitization cycle.
3. If the cover is opened during the cycle, the sanitization process will automatically stop to ensure user safety. Close the cover again to resume.

Warm Air Drying Function

For optimal drying, the warm air heating function can be activated:

1. Ensure the device is plugged into a power source using the USB-C cable.
2. The warm air drying function will operate while the device is connected to power, helping to keep the toothbrush dry and inhibit bacterial growth.

MAINTENANCE

To ensure the longevity and effectiveness of your SwanKiss ES X3, regular cleaning is recommended.

- **Cleaning the Interior:** The device features a detachable rubber seal for easy cleaning of the interior. Gently remove the seal, clean the internal surfaces with a damp cloth, and ensure it is dry before reattaching.
- **Exterior Cleaning:** Wipe the exterior of the device with a soft, dry cloth. Avoid using abrasive cleaners or solvents.

Image: A close-up view of the device showing the detachable rubber seal for cleaning.

TROUBLESHOOTING

- **Device Not Activating:** If the UV light does not turn on when the cover is closed, ensure the device is sufficiently charged. If the issue persists, try opening and closing the cover firmly to ensure the sensor is engaged.

- **Reduced Effectiveness:** If you notice a decrease in performance, ensure the device is regularly cleaned as per the maintenance instructions. Accumulated residue can affect UV light exposure and drying efficiency.

- **Drying Function Not Working:** Confirm that the device is plugged into a power source for the warm air drying function to operate.
